

HE DID NOT FEAR DEATH.

IT IS A POWERFUL LIGHT.

Letter from John Brown to His Cousin Never Before Published

He Declared He Did Not Consider It Any Disgrace to Hang—Believed It Was God's Will.

A dispatch from New Hartford, Conn., says: Rev. Luther Humphrey, a cousin of the famous abolitionist John Brown, died here recently. Among his effects has been found a letter written by John Brown during his incarceration at Charlestown, Va., after his raid on Harper's Ferry. It is claimed that it has never been published before. It is dated "Charlestown, Jefferson county, Va., 19th November, 1859," and is as follows:

"Rev. Luther Humphrey—My dear friend: Your kind letter of the 12th is received; more now before me.

"So far as my knowledge goes as to our mutual kindred, I suppose I am the first since the landing of Peter Brown from the Mayflower who has either been confined in prison or banished. But, my dear old friend, let not that fact alone grieve you. You cannot have forgotten grieved us. We cannot have forgotten him, and where our grandfather, Capt. John Brown, fell in 1776, and that he too, might have perished on the scaffold had circumstances been even a little different.

"The fact that a man dies under the hand of an executioner or other than his own is not of much character, as I suppose, but his great and good man, as I suppose, but his hand so does not prove any other man who has died in the same way was good or otherwise.

"Whether I have any reason to be of good cheer or not, in view of my end, I can assure you that I do not, and that I am totally blind. I do not really expect to live long, for I am past 70 years of age, and the strengthening and consoling that you so faithfully implore in my behalf, God of our fathers reward your fidelity.

"I neither feel mortified, degraded nor is the least ashamed of my imprisonment, my chain or my near prospect of death by hanging. I feel assured that I shall not die without one hair shall fall from my head, without my heart failing, and will also feel the love long been endeavoring to hold exactly such a part as God has chosen. See the passage in Isaiah which you have quoted.

"No part of my life has been more happily spent than that I have spent here, and I humbly trust that no part has been spent to better purpose. I would not say this boastingly, but thanks be unto God who gives us the victory through infinite grace.

"I should be sixty years old were I to live till May 9, 1860. I have enjoyed much of life as it is and have been remarkably prosperous, having early learned to regard the welfare and prosperity of others as my own. I have never, since my arrival, required a moment of sleep, so that I conclude that I have already enjoyed

a remarkable story of endurance. From Twin Creek, O., comes a remarkable story of endurance. Frank Horsley, a woodman, who lives along the rocky hills of Upper Twin Creek, was out in search of ginseng root a few weeks ago. He had taken with him his squirrel rifle, a short gun about three and a half feet long. As he was climbing an almost vertical cliff the rifle was knocked backward from his shoulder by the overhanging limb of a tree. As it fell it struck another limb and was discharged, the bullet striking him in the thigh and coming out at the groin, making a ghastly wound.

He managed to drag himself back home, and his wife stopped the flow of blood and tied the leg up in a piece of old sheet. Three weeks afterward she called at the office of Dr. Frizzell, of Buena Vista, to get some medicine for her husband, "pills," being her expressed preference. He "was not eatin' right," she said, and seemed to be bilious. It was only incidentally that the doctor was informed of the terrible wound that was keeping Horsley flat on his back at the lonely cabin in the hills. They had not thought it worth while to get a doctor for that, but considered biliousness an ailment with which it was not safe to temporize. The doctor went out to see him of his own accord at the first opportunity and found him in a fair way to ultimate recovery, although the leg was terribly swollen still and must have caused fearful suffering.

She refused to do so. When her own gowns wore out she made dresses of old rags and quilts. In summer she went without shoes and in cold weather she wrapped rags about her feet. For 20 years she has rarely been outside of her house and never beyond the high board fence she was never seen outside of that fence.

A curious story is related as the reason for her strange life. When she married her second husband 30 years ago she was a beautiful woman, fond of society. He insisted, it is alleged, that she wear out the dresses of her deceased wife before new ones were purchased.

She refused to do so. When her own

gowns wore out she made dresses of old rags and quilts. In summer she went without shoes and in cold weather she wrapped rags about her feet. For 20 years she has rarely been outside of her house and never beyond the high board fence she was never seen outside of that fence.

THE YIELD OF COTTON.

Reports Show an Average of 161 Pounds Per Acre.

Canadian Surveyor Reports Outlook on Bonanza and Eldorado Creeks.

Preliminary reports to the statistician of the department of agriculture indicate an average yield of 181 pounds of cotton per acre.

The principal state averages are as follows: North Carolina, 164; South Carolina, 159; Georgia, 178; Alabama, 155; Mississippi, 220; Louisiana, 245; Texas, 165; Arkansas, 215; Tennessee, 132; Oklahoma, 225; Indian Territory, 300.

In the main the crop has been picked in excellent condition, the weather having been highly favorable. There is not the slightest apparent disposition on the part of the department's large corps of correspondents to overestimate the effect of unfavorable conditions during the growing season, or to conceal or minimize the importance of such conditions as have been favorable, and while the figures now published are subject to revision in the final report, they are believed to approximately represent the actual condition of the crop.

TO GO AFTER GOLD.

Well Equipped Party Ready to Start for Central America.

When the schooner *Vine* sails from San Francisco she will carry the members of one of the best-equipped expeditions which has gone out of this port to look for gold in Central America.

They are officers of the Spanish-American developing and mining camp. They say they have concessions from San Salvador, Costa Rica and Guatemala for 60,000 acres of territory which lies at a point of contact with the countries covering the mineral development of the tracts. The claim is made that the company has a capital stock of \$2,000,000, with one-half paid up. The officers of the company who are here are: Willis A. Ansonock, Walter Granham, Henry H. Darby, of England. The stock of the company is owned, according to the statements of Ansonock, in Cleveland, O., and England, one of the principal men in it being Sir Anthony Bradley, of Dover, England.

New Meat Preserving Method.

Two Frenchmen, Revel and Campanie, have patented a novel process for preserving meat, doing entirely away with smoking and pickling. It consists in merely dipping the fresh meat into a strong solution of potassium iodide for ten minutes and then hanging up to dry. For a number of days the meat remains perfectly fresh and after that it begins to dry, forming a hard crust, while the inner portions remain fresh indefinitely, so it is claimed.

Gas in a Bedroom.

A burning gas jet is unhealthy in a bedroom, because one gaslight gives rank the pearl first, the ruby second and the diamond third.

Ideal Food.

The London Chronicle says that the baked banana is the ideal food for nervous and anemic brain-workers.

Monkeys Buried with Military Honors.

A pet monkey belonging to Gunner's Mate William Bentley of the naval academy at Annapolis recently died and was buried with honors. Six sailors acted as pallbearers. Carpenter John Jones made the coffin. The monkey was named "Chink." He was purchased by Mr. Bentley last January at Rio Janeiro and was a favorite aboard ship. His death resulted from convulsions caused by eating too freely of yellow paint, with which the deck of the frigate *Faith* was being covered.

Precious Stones.

In popularity precious stones now rank the pearl first, the ruby second and the diamond third.

Cheapest.

A burning gas jet is unhealthy in a bedroom, because one gaslight gives rank the pearl first, the ruby second and the diamond third.
