# DerHexer

---

Martin Rulsch, 2. Vandalenjägertreffen, Frankfurt am Main, 13. Mai 2012

# DerHexer

---

- seit Sept. 2005 angemeldet, seit April 2006 aktiv → ~ 150.000 Bearbeitungen in dewiki, ~ 250.000 weltweit
- Administrator in dewiki Oktober 2006 → > 170.000 Logbuchaktionen
- Administrator in enwiki Juli 2007 → > 140.000 Logbuchaktionen
- Steward in metawiki Dezember 2007 → ~ 9.000 Stewardaktionen, weitere ~580.000 Logbuchaktionen, darunter ~ 5.500 Oversightaktionen
- Oversight in metawiki August 2009–Oktober 2011, seit April 2012 → ~ 4.000 Oversightaktionen
- seit Dez. 2006 Mitglied von WMDE, seit Nov. 2011 im Präsidium

# Stewards

---

- zur Entlastung der Entwickler 2004 gedacht: vollständiger Zugang von metawiki aus in alle ~ 800 Projekte, über Webinterface und nicht in der Datenbank ([Link](#))
- Neuwahlen: 1–2x jährlich von globaler Community während dreier Wochen gewählt → GlobalSiteNotice; Wahl von Stewards organisiert;  $\geq 80\%$  Zustimmung,  $\geq 30$  Pro-Stimmen;  $\geq 18$  Jahre + volljährig, Administrator  $\geq 3$  Monate; Identifikation gegenüber WMF
- Wiederwahlen: immer im Februar/März; endgültige Entscheidung durch Election Committee der Stewards
- zurzeit 43 Stewards, Axpde und Barras ebenfalls deutschspr. Stewards, Thogo zurzeit pausierend, da Ombudsmann ehemals Fantasy, spacebirdy, eptalon

Edit user groups

Changing user rights of user **DerHexer** ( [talk](#) | [contribs](#) | [membership in global groups](#) )

You may alter the groups this user is in:

- A checked box means the user is in that group.
- An unchecked box means the user is not in that group.
- A \* indicates that you cannot remove the group once you have added it, or vice versa.

Member of: [Oversighters](#), [Stewards](#) and [Administrators](#)

Implicit member of: [Autoconfirmed users](#)

#### Groups you can change

- bot
- administrator
- bureaucrat
- CheckUser
- steward
- account creator
- importer
- transwiki importer
- IP block exempt
- oversight
- flooder
- autopatroller
- confirmed user
- translation administrator

Reason:

## User rights log

- [\(show/hide\)](#) 2012-04-09T15:13:54 [Barras](#) ( [talk](#) | [contribs](#) | [block](#) ) changed group membership for [User:DerHexer](#) from steward to steward, administrator and oversight (<https://meta.wikimedia.org/?oldid=3629178#DerHexer.40meta> and <https://meta.wikimedia.org/?oldid=3629160>)
- [\(show/hide\)](#) 2011-10-24T06:00:01 [DerHexer](#) ( [talk](#) | [contribs](#) | [block](#) ) changed group membership for [User:DerHexer](#) from oversight, steward and administrator to steward (*resigned rarely used oversight and sysop access*)

# Stewards

---

- Vergabe von lokalen und globalen Benutzerrechten ([Link](#))
- globale Sperren von Benutzern und IPs ([Link](#), [Link](#))
- in kleineren Projekten Aktionen, die von der Community nicht selbst geleistet werden können
  - vor allem Aufräumarbeiten (darunter auch Oversightaktionen), tw. abgenommen von Global sysops
- sonst agieren Stewards nach Konsens und im Notfall
- bis April 2008 war für jedes einzelne Projekt eine Rechteänderung vonnöten, um eingreifen zu können
- seit SUL gibt es globale Benutzergruppen wie die Stewards ([Link](#)) → Besitz vieler passiver Rechte, die je nach Bedarf aktiv genutzt werden können – rund 50 von 100 ([Link](#))

Remember to start the username with a capital letter.

### Edit user groups

Changing user rights of user **Hoo man** ( [talk](#) | [contribs](#) | [User rights management](#) )

You may alter the groups this user is in:

- A checked box means the user is in that group.
- An unchecked box means the user is not in that group.
- A \* indicates that you cannot remove the group once you have added it, or vice versa.

Member of: [Global rollbackers](#), [Global sysops](#) and [Interface editors](#)

#### Groups you can change

- API High Limit Requestor
- global bot
- global rollbacker
- global sysop
- indic bot
- new wikis importer
- ombudsman
- staff
- abuse filter editor
- interface editor
- founder
- global-ipblock-exempt
- recursive exporter
- steward
- system administrator

Reason:

## Global rights log

- [\(show/hide\)](#) 2011-06-20T20:01:06 [PeterSymonds](#) ([talk](#) | [contribs](#) | [block](#)) changed global group membership for [User:Hoo man](#) from [Global\\_rollback](#), [Global\\_sysops](#) to [Global\\_rollback](#), [Global\\_sysops](#), [editinterface](#) (*IRC request*)
- [\(show/hide\)](#) 2011-06-20T15:28:11 [Dungodung](#) ([talk](#) | [contribs](#) | [block](#)) changed global group membership for [User:Hoo man](#) from [Global\\_rollback](#), [Global\\_sysops](#), [editinterface](#) to [Global\\_rollback](#), [Global\\_sysops](#) (*he's done, again*)

# Global user manager

## Manage user data

User name:

[Suppress local users](#)

## Global user info

- **User ID:** 217
- **Registered:** 2008-03-25T10:19:24 (4 years ago)
- **Home wiki:** [en.wikipedia.org](http://en.wikipedia.org)
- **Total editcount:** 226,622
- **Locked:** no
- **Hidden level:** no

## Set global account status

You can use this form to change the status of this global account.

Locked:  Account is not locked  
 Account is locked from editing

Hidden:  Account is not hidden  
 Account is hidden from public lists  
 Account is hidden completely. This will suppress only the username in edits on all wikis, but will not affect the edits themselves.

Reason:

Other/additional reason:

## Delete account

Deleting the global account will delete any global preferences, unattach all local accounts, and leave the global name free for another user to take. All local accounts will continue to exist. The passwords for local accounts created before the merge will revert to their pre-merge values.

Please do not delete any vandal accounts; **lock them** and if a wiki wants to rename it, unmerge the selected from the *Fully merged accounts* even if that account is only unified on one wiki.

Reason:

## Unmerge local accounts

◆	Local wiki	◆	Attached on	◆	Method	◆	Blocked	◆	Edit count	◆
<input type="checkbox"/>	<a href="http://aa.wikipedia.org">aa.wikipedia.org</a>		2008-03-25T19:19:02		admin-merged account (?)		—		12	
<input type="checkbox"/>	<a href="http://aa.wikibooks.org">aa.wikibooks.org</a>		2008-03-25T10:19:24		confirmed by password (?)		—		2	
<input type="checkbox"/>	<a href="http://ab.wikipedia.org">ab.wikipedia.org</a>		2008-03-25T10:19:24		confirmed by password (?)		—		2	
<input type="checkbox"/>	<a href="http://ab.wiktionary.org">ab.wiktionary.org</a>		2008-03-25T10:19:24		confirmed by password (?)		—		2

# Globally block an IP address

([List of globally blocked IP addresses](#) | [Remove a global block](#) | [Change local status for a global block](#) | [Edit block reasons](#))

You can use this page to block an IP address on all wikis.

## Block an IP address globally

IP address:

Expiry:

Other time:

Reason:

Other/additional reason:

Options:  Block anonymous users only

# Global group management

## Existing groups

The following global groups have been configured. You may view or edit the permissions assigned to a group, if you have permission to. A group may be deleted by removing all rights from it.

- API High Limit Requestors ([view/edit](#))
- Global bots ([view/edit](#))
- Global rollbackers ([view/edit](#))
- Global sysops ([view/edit](#))
- Indic Bots ([view/edit](#))
- New wikis importers ([view/edit](#))
- Ombudsmen ([view/edit](#))
- Staff ([view/edit](#))
- Abuse filter editors ([view/edit](#))
- Interface editors ([view/edit](#))
- Jimbo Wales' group ([view/edit](#))
- Global IP block exempt ([view/edit](#))
- Recursive export ([view/edit](#))
- Stewards ([view/edit](#))
- System administrators ([view/edit](#))

## Create a new group

You can use this form to assign permissions to a new group. Note that a group does not exist unless it has permissions assigned to it.

New group name:

Name of group: steward

Localised name of group: Stewards ([edit](#))Localised name of group members: steward ([edit](#))Member list: [List of users with steward rights](#)Set of wikis where this group is active:  ([edit](#))

Assigned permissions:

- View hidden abuse log entries ([abusefilter-hidden-log](#))
- Hide entries in the abuse log ([abusefilter-hide-log](#))
- View the abuse log ([abusefilter-log](#))
- View detailed abuse log entries ([abusefilter-log-detail](#))
- Modify abuse filters ([abusefilter-modify](#))
- Modify abuse filters with restricted actions ([abusefilter-modify-restricted](#))
- Revert all changes by a given abuse filter ([abusefilter-revert](#))
- View abuse filters ([abusefilter-view](#))
- View abuse filters marked as private ([abusefilter-view-private](#))
- Use higher limits in API queries ([apihighlimits](#))
- Edit semi-protected pages ([autoconfirmed](#))
- Have one's own edits automatically marked as patrolled ([autopatrol](#))
- Delete pages with large histories ([bigdelete](#))
- Block other users from editing ([block](#))
- Block a user from sending e-mail ([blockemail](#))
- Be treated as an automated process ([bot](#))
- Search deleted pages ([browsearchive](#))
- Automatically login with global account ([centralauth-autoaccount](#))
- Lock or hide global account ([centralauth-lock](#))
- Merge their account ([centralauth-merge](#))
- Suppress global account ([centralauth-oversight](#))
- Unmerge global account ([centralauth-unmerge](#))
- Manage central notices ([centralnotice-admin](#))
- Check user's IP addresses and other information ([checkuser](#))
- Import pages from a file upload ([importupload](#))
- Bypass IP blocks, auto-blocks and range blocks ([ipblock-exempt](#))
- Mark rolled-back edits as bot edits ([markbotedits](#))
- Merge the history of pages ([mergehistory](#))
- Mark edits as minor ([minoredit](#))
- Alter visibility on the feedback dashboard ([moodbar-admin](#))
- Move pages ([move](#))
- Move root user pages ([move-rootuserpages](#))
- Move pages with their subpages ([move-subpages](#))
- Move files ([movefile](#))
- Not have minor edits to discussion pages trigger the new messages prompt ([nominornewtalk](#))
- Not be affected by rate limits ([noratelimit](#))
- Mass delete pages ([nuke](#))
- Override the spoofing checks ([override-antispoof](#))
- Export pages including linked pages up to a depth of 5 ([override-export-depth](#))
- View a previously hidden revision with Extension:Oversight ([oversight](#))
- Mark versions of pages for translation ([pagetranslation](#))
- Mark others' edits as patrolled ([patrol](#))
- Change protection levels and edit protected pages ([protect](#))
- Bypass automatic blocks of proxies ([proxyunbannable](#))
- Purge the site cache for a page without confirmation ([purge](#))
- Read pages ([read](#))
- Rename users ([renameuser](#))

- View the checkuser log (`checkuser-log`)
- Save books as community page (`collectionsaveascommunitypage`)
- Save books as user page (`collectionsaveasuserpage`)
- Create new user accounts (`createaccount`)
- Create pages (which are not discussion pages) (`createpage`)
- Create discussion pages (`createtalk`)
- Delete pages (`delete`)
- View deleted history entries, without their associated text (`deletedhistory`)
- View deleted text and changes between deleted revisions (`deletedtext`)
- Delete and undelete specific revisions of pages (`deleterevision`)
- Edit pages (`edit`)
- Edit the user interface (`editinterface`)
- Edit other users' CSS files (`editusercss`)
- Edit other users' CSS and JavaScript files (`editusercssjs`)
- Edit other users' JavaScript files (`edituserjs`)
- Make global blocks (`globalblock`)
- Bypass global blocks (`globalblock-exempt`)
- Disable global blocks locally (`globalblock-whitelist`)
- Edit membership to global groups (`globalgroupmembership`)
- Manage global groups (`globalgrouppermissions`)
- Remove global blocks (`globalunblock`)
- Hide revisions from administrators with Extension:Oversight (`hiderevision`)
- Block a username, hiding it from the public (`hideuser`)
- Import pages from other wikis (`import`)
- Overwrite existing files (`reupload`)
- Override files on the shared media repository locally (`reupload-shared`)
- Quickly rollback the edits of the last user who edited a particular page (`rollback`)
- Send e-mail to other users (`sendemail`)
- Lock and unlock the database (`siteadmin`)
- Perform CAPTCHA-triggering actions without having to go through the CAPTCHA (`skipcaptcha`)
- View private logs (`suppressionlog`)
- Not create redirects from source pages when moving pages (`suppressredirect`)
- Review and restore revisions hidden from administrators (`suppressrevision`)
- Override the title blacklist (`tboverride`)
- Override the username blacklist (`tboverride-account`)
- Bypass automatic blocks of tor exit nodes (`torunblocked`)
- Edit using the translate interface (`translate`)
- Change workflow state of message groups (`translate-groupreview`)
- Import offline translations (`translate-import`)
- Manage message groups (`translate-manage`)
- Review translations (`translate-messagereview`)
- Unblock themselves (`unblockself`)
- Undelete a page (`undelete`)
- View a list of unwatched pages (`unwatchedpages`)
- Upload files (`upload`)
- Upload files from a URL (`upload_by_url`)
- Edit all user rights (`userrights`)
- Edit user rights of users on other wikis (`userrights-interwiki`)
- Use of the write API (`writeapi`)

Reason:

## Global rights log

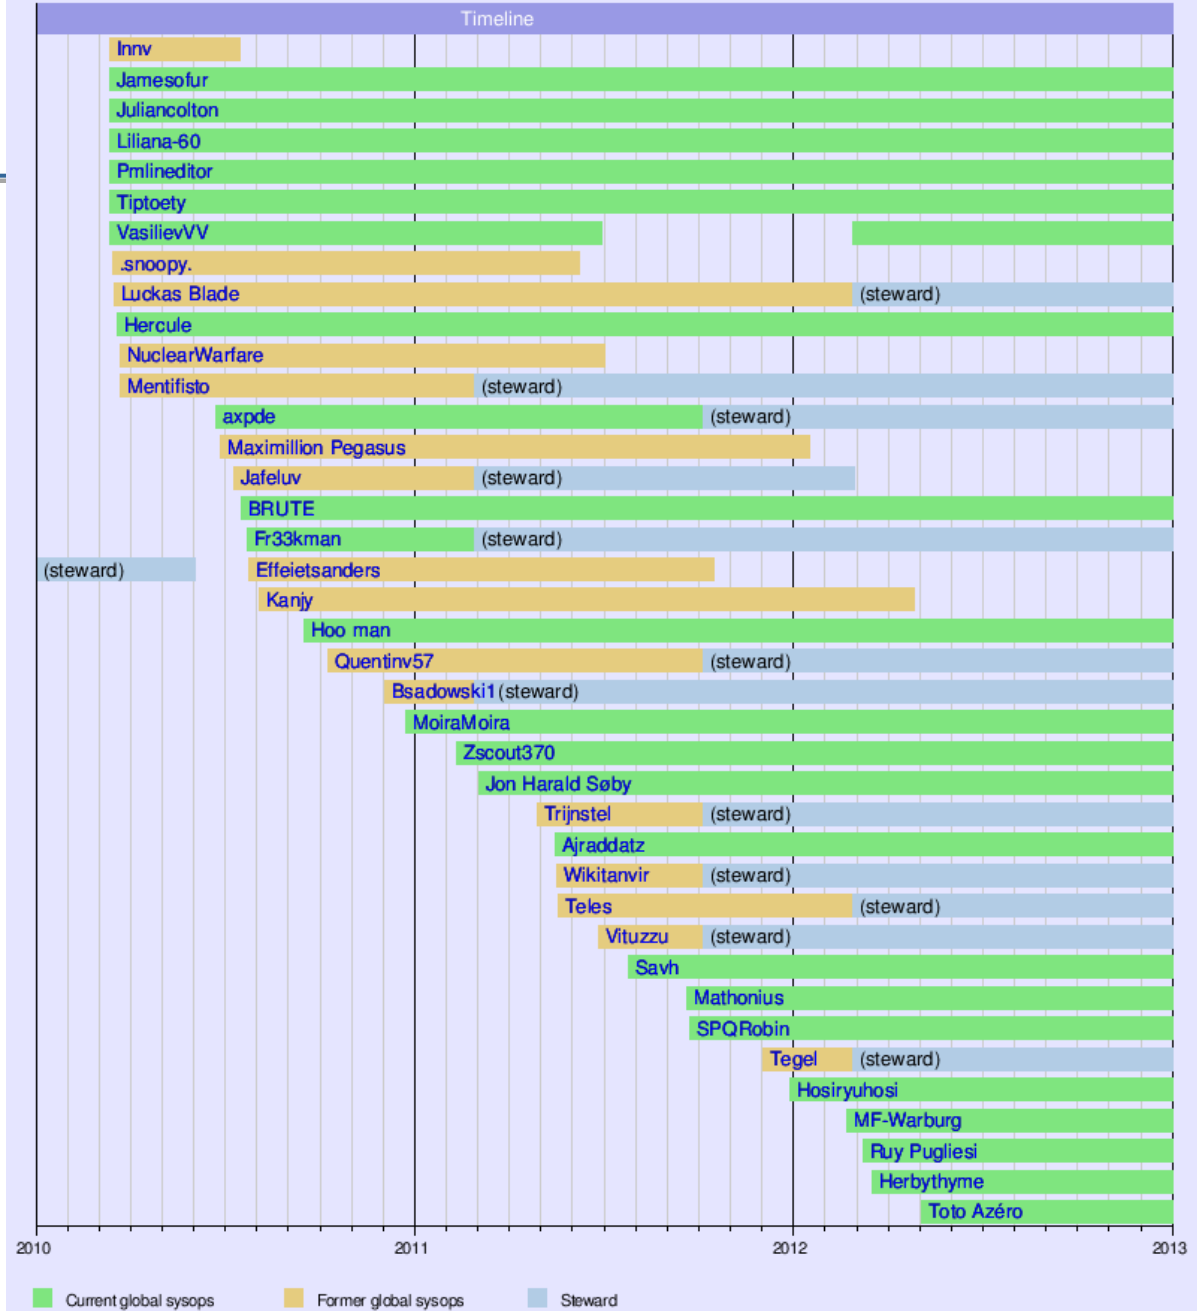

- [\(show/hide\)](#) 2012-02-26T13:45:48 Vituzzu [\[talk\]](#) [\[contribs\]](#) [\[block\]](#) changed group permissions for [Special:GlobalUsers/steward](#). Added `abusefilter-hide-log`. Removed `(none)` (*non controversial: rights of the oversighter groups are already included among stewards' right, btw this addition is meant to let the stewards*

Martin Rulsch, 2. Vandalenjägertreffen,, Frankfurt am Main, 13. Mai 2012

# Global sysops

---

- chronisch zu wenige Stewards aufgrund hoher Wahlhürden, Mindestalters, fehlenden Mutes
  - bis 2010/11 Mehrzahl der Stewards zudem inaktiv – dafür viele Helfer in #cvn-swmt (Small Wiki Monitoring Team)
  - zunächst seit Juli 2008 Global rollbackers; seit März 2010 für Projekte mit  $< 10$  Admins oder  $< 3$  aktiven Admins bzw. Wunsch der Community auch Global sysops eingerichtet
  - offene Wahl auf metawiki, Stimmen der Stewards zählen
  - ~ 40 Rechte wie block, delete, protect, abusefilter etc.
  - Rechte in 740 Projekten, in 114 nicht
  - Crosswiki-Kenntnisse für Steward-Arbeit sinnvoll → viele der neuen Stewards ehemals Global sysops ([Link](#))
- deutschspr.: Hoo man, MF-Warburg, ehemals: axpde

# Oversighter

---

- nach wachsender Zahl an Administratoren + Wunsch nach dauerhaften Entfernen von Inhalten → 2006 neues Level
- zunächst Änderungen nur durch Entwickler wiederherstellbar
- 2009 RevisionDelete → nun auch für Oversighter möglich, ggf. auch nur Benutzernamen oder Zusammenfassungen zu entfernen
- Mai 2009 auf dewiki eingeführt: 5 Personen (37 enwiki, 6 frwiki u. simplewiki, sonst  $\leq 5$ ), zzt. Nachwahl; Wahlbedingungen: 70–80% mit mind. 25–30 Pros od. Multiple-Choice; mind. 2 je Wiki
- keine offiziellen Vorgaben seitens WMF, zzt. nur 4 schwammige Regeln ([Link](#)) → unterschiedlich in den Projekten interpretiert
- Besonderheit dewiki: Pseudo-Logbuch ([Link](#)), sonst nicht öffentlich
- Stewards + Staff haben global Zugriff auf das Oversightlogbuch als auch auf die Versteckfunktion (wegen Bugs 20476)

## Originaltext

This feature is approved for use in three cases:

1. **Removal of non-public personal information** such as phone numbers, home addresses, workplaces or identities of pseudonymous or anonymous individuals who have not made their identity public, or of public individuals who have not made that personal information public.
2. **Removal of potentially libellous information** either: a) on the advice of [Wikimedia Foundation](#) counsel or b) when the subject has specifically asked for the information to be removed from the history, the case is clear, and there is no editorial reason to keep the revision.
3. **Removal of copyright violations** on the advice of Wikimedia Foundation counsel.

## Inoffizielle Übersetzung von [Wikipedia:Oversight](#)

Diese Softwarefunktion darf in folgenden drei Fällen eingesetzt werden:

1. **Entfernung von nicht-öffentlichen persönlichen Informationen** wie Telefonnummern, Wohnanschriften, Arbeitsstellen oder Identitäten von Pseudonymen oder anonymen Personen, die ihre Identität nicht veröffentlicht haben, sowie von Personen des öffentlichen Interesses, die diese persönlichen Informationen nicht veröffentlicht haben.
2. **Entfernung von potenziell verleumderischen Informationen** entweder: a) auf Anweisung des Rechtsberaters<sup>[1]</sup> der [Wikimedia Foundation](#) oder b), wenn die betroffene Person beantragt hat, die entsprechenden Informationen aus der Versionsgeschichte zu löschen, der Fall offensichtlich ist und es keine redaktionellen Gründe gibt, die Version zu behalten.
3. **Entfernung von Urheberrechtsverletzungen** auf Anweisung des Rechtsberaters<sup>[1]</sup> der Wikimedia Foundation.

# Tagesgeschäft, oder: Die heftigen Dinger

---

- seit SWMT + SUL bekommen Stewards viel in den #cvn-Channels selbst mit oder via SWMT-Kollegen; seltener Meldungen im Wiki – dort eher Vergabe lokaler + globaler Rechte, fast keine Meldungen im OTRS (anders bei dewiki-Oversightern)
- früher viele automatisierte Programme + Spambots, bspw. Willy on Wheels: Seitenmoves, index.php-Spam, Grawp/GNAA: Schockbilder; auch Bambi-/ Disneyfancruft; NawlinWiki-Beleidiger
- Nacharbeiten damals kompliziert, da keine globalen Rechte vorhanden + Vandalismusbekämpfung nur durch drei, vier Personen betrieben → teils Adminrechte einfach in kleinen Wikis behalten + Skripte zum Löschen/Sperren geschrieben
- einfache Fälle: uneingeloggt editiert und IP-Adresse versehentlich veröffentlicht; Missbrauch der CheckUser-Policy in zhwiki ([Link](#))

# Tagesgeschäft, oder: Die heftigen Dinger

---

- Dauertroll „Edgar von Webern“ aus dewiki: Beleidigungen international zunächst gegen deutsche Admins (später gegen Stewards, WMDE-Vorstand etc.) → auf metawiki gemeldet
- verschiedene Schemata: Beleidigungen nur im Namen und/oder nur in der Bearbeitung; öffentliche Blacklisten wirkungslos → Log neuer Konten im privaten Channel #cvn-unifications → Filter
- Hoffnung: nicht-öffentliche globale Missbrauchsfilter
- Verfahren: global lock, hideuser (in allen Wikis, früher manuell bzw. mit meinem Skript, heute automatisch [mit Bugs]); oft CU nötig für Stoppen; Problem: automatisch-erstellte Benutzerdiskus
- am schlimmsten ist die Veröffentlichung von persönl. Informationen, bspw. aus Seiten wie Encyclopedia Dramatica ([Link](#)), Hive ([Link](#))

# DerHexer

**DerHexer** or **Keith Abbot** is a gay scruffy **Nazi Nerd** who is a wikipedo admin and a freak, a characterization with which **many**, **many**, **many** people agree. He spends all of his fucking sad life fighting vandalism and when you vandalize his user page he likes to put you on your last warning. He has a striking resemblance to **Angry German Kid**.

One day a sad **YouTube user** and **Wikipedo** (how sad can you get) decided to post a comment about DerHexer on a youtube video saying "Have you ever heard of an administrator on Wikipedia known as DerHexer? He is very fast. If you want to know how fast DerHexer is, he have made more than 11,000 edits in one month in April 2007 and is making more than 8,000 edits on September 2007, mostly reverting vandalism. It took me 6 months for me to make 8,000 edits!" which shows how pathetic Wikipedians basically are and of course the comment on the video got a **trolling** response. Only to reach his **talkpage** only afterwards were good lulz had by all.

When it's not protected, have a go at vandalizing this worthless wikipedo's **userpage**.

**PROTIP**: DerHexer's router is still vulnerable to the **DCC SEND startkeylogger 0 0 0** trick. You can help him lose his virginity by kicking him from #wikipedia-de on **freenode** over and over again.

## RC Patrolling

DerHexer is the world's worst **Recent changes patroller**. Not content to just revert vandalism, he with his T3 connection in his mother's basement speeds through every single diff made by every single non-administrator user on the most hidden away talk pages far out of project space. If there's even a chance he can get away with bullying someone by reverting them, he will take it. What's worse is once he does so, an edit that normally would have been vandalism for someone else to be revert now gets a bandwagon of **basement dwellers** reverting any edit to that page for months.
