Translate extension UI/UX

User registration

The screenshot shows the user registration interface for the Translate extension. The page is titled "Translate a free project in your language today" and includes a "Log in / create account" link in the top right. The main content area features a large image of two young girls in colorful headscarves, with the text: "Translatewiki.net is a localisation platform for translation communities, language communities, and free and open source projects." Below this, a section titled "Projects using translatewiki.net" lists MediaWiki, FreeCol, and MantisBT. The registration form on the right is divided into two steps: "1. Choose languages that you know:" and "2. Fill your account information:". In the first step, "Русский" is selected as a native language. The second step includes fields for Username (Beta_tester), Password (masked), and Email (tester@gmail.com), all marked as required. A "Register as translator" button is at the bottom right.

Translate extension UI/UX

User registration

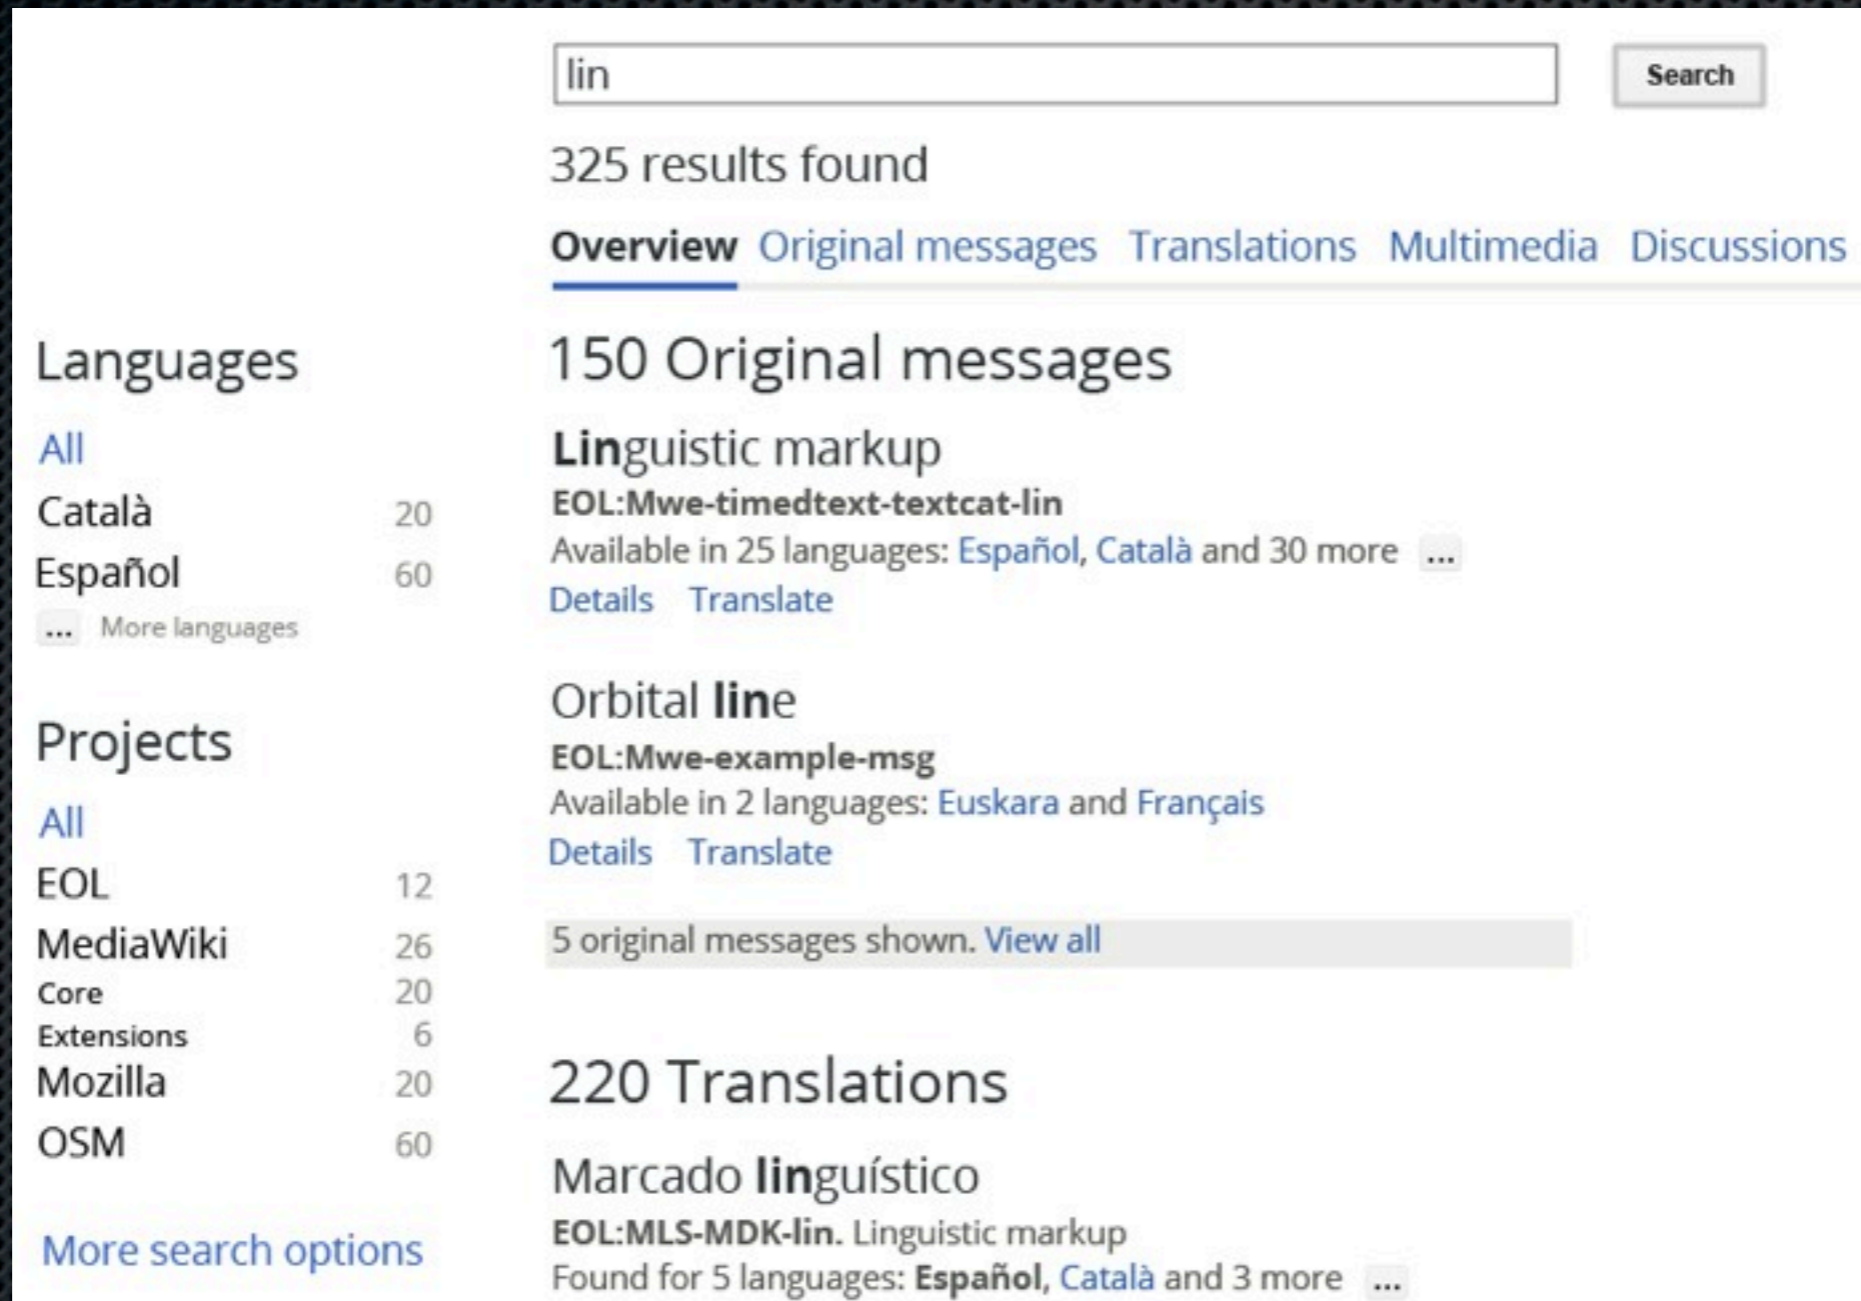

The screenshot shows the Translate extension's user registration page. At the top right, there is a "Log in / create account" link. Below this, a navigation bar includes "Page Discussion", "Read", "View source", "View history", and a search box. A news section displays two items: "2012-08-02: Support was added for WikiLovesMonuments Mobile (86)." and "2012-06-21: Beta support was added for Mozilla Firefox in Gujarati and Hebrew. (Other news...)".

The main content area features a large message: "Thank you *beta_tester*, you are almost a translator! You can make your first translation now to activate your account:". To the right of this message, the language "Français" is selected with a 94% progress indicator. Below the message, there are two "Empty string" entries, each with a "Chaîne vide" label and a "Use this suggestion" button. The first entry has an "Explanation" button with the text "Reason for failed account creation". At the bottom right, there is a prominent blue "Activate account" button with a checkmark icon.

The left sidebar contains a navigation menu with sections: "Introduction" (with sub-links for Translation tool, Proofread, Portal for English, Translations in English, and Maintained languages), "Navigation" (with sub-links for News, Support, Documentation, and Site changes), "Toolbox", and "Google AdSense" (with an AdChoices link). At the bottom of the sidebar, there is a "Translation jobs" section with the text "Find freelance translation jobs for all language combinations."

Translate extension UI/UX

Search and fix

The screenshot shows the search results for the 'lin' language code. At the top, there is a search bar containing 'lin' and a 'Search' button. Below the search bar, it indicates '325 results found'. There are four tabs: 'Overview' (selected), 'Original messages', 'Translations', 'Multimedia', and 'Discussions'. The 'Overview' section is divided into two main categories: 'Languages' and 'Projects'. Under 'Languages', there is a list: 'All' (20), 'Català' (20), 'Español' (60), and a link for 'More languages'. Under 'Projects', there is a list: 'All' (12), 'EOL' (26), 'MediaWiki' (20), 'Core' (20), 'Extensions' (6), 'Mozilla' (20), and 'OSM' (60). A link for 'More search options' is also present. The main content area shows the first five results. The first result is 'Linguistic markup' with EOL 'Mwe-timedtext-textcat-lin', available in 25 languages including 'Español' and 'Català'. The second result is 'Orbital line' with EOL 'Mwe-example-msg', available in 2 languages: 'Euskara' and 'Français'. A summary bar indicates '5 original messages shown. View all'. The third result is '220 Translations' for 'Marcado lingüístico' with EOL 'MLS-MDK-lin', found for 5 languages including 'Español' and 'Català'.

Translate extension UI/UX

Translation widget

The screenshot displays the Translate extension interface. At the top, the page title is "MediaWiki:Antispoof-empty/ta" and the page number is "1 of 353". The main content area shows a message: "Contains blacklisted character \$1". Below this, there are translation suggestions from "Translatewiki" and "Microsoft". The "Translatewiki" suggestion is selected, showing the translated text: "Contiene el carácter no permitido". There are buttons for "Check on Google Translate" and "Check on FreeDeictionary". Below the translation, there is a "Message explanation" section with a link to "Improve this explanation" and a comment from "rob_ber" dated "10 July 2012". At the bottom, there is a "Mark as outdated" button, a "Quick menu" button, a "Translation Guide" button, a "Translatewiki help" button, and a "Save Translation" button with a checkmark and the text "and confirm account".

MediaWiki:Antispoof-blacklisted/ru

Contains blacklisted character \$1

содержит следующий символ из чёрного списка: \$1

Requires revision

Press "CTRL+S" to save or "CTRL+D" to go to next message.

Reason for failed account creation. Parameters:

- **\$1** — bad character designator (built with either `antispoof-bad-char` ("`<antispoof-bad-char>`") or `antispoof-bad-char-non-printable...` [Show more](#)

[/ Edit description](#)

Suggestions

- `содержит следующий символ из чёрного списка: $1`
Used in translation 70% of time (used 4 times)
- `содержит следующий недопустимый символ: $1`
Use in translation from Microsoft

Need more help? [Ask for more information](#)

The name "\$1" is too similar to {PLURAL:\$2|the existing account|the following \$2 accounts}: [/ Edit](#)

translatewiki.net

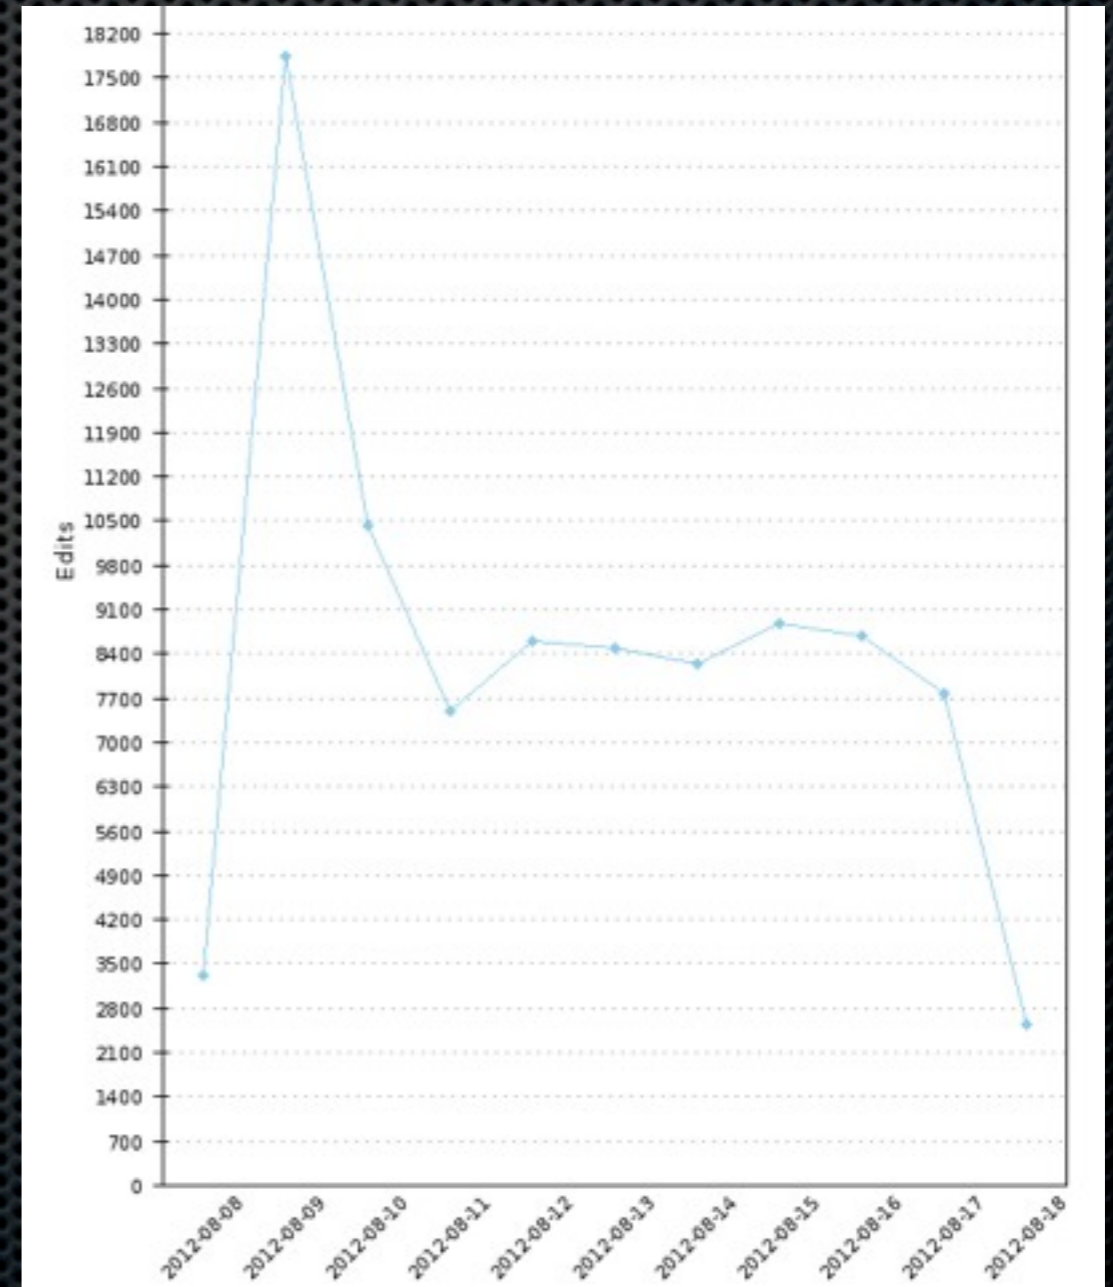

Translation Rally

- ✦ 1,000 Euro sponsored by Wikimedia Nederland
- ✦ Make 500 new translations and share in an equal part of the bounty
- ✦ “Winner” gets a 50 Euro bonus
- ✦ Runs for 9 days
- ✦ 5,100 translatewiki.net users invited

translatewiki.net

August 2012 Translation Rally Results

- ✦ 65,948 new translations
- ✦ 188 participants (1+)
- ✦ 115 languages (1+)
- ✦ Up to 9 times average traffic
- ✦ Example: Wiki Loves Monuments mobile has translations in 58 languages

Other deliverables and news

- Had a meeting with the Wikimedia Deutschland Wikidata team. They'll be using ULS for Wikidata language selection
- Keyboard map for Georgian
- Narayam deployed to all Marathi Wikimedia projects
- Tim Starling helped writing a parser for CLDR plural data
- Team member did a lot of core and extension maintenance on deprecated i18n methods (wfMsg*)
- Wikimedia ops is about to install a translation memory server
- Code review & other fun stuff

Goals Sprint 23

- Universal Language Selector
 - Milkshake i18n framework
 - Landing page with suggestions
 - Accept language on no preference
 - QA
- RTL bug fixes
- Get translation memory server enabled in Wikimedia infrastructure
- Translate UI/UX: Prototype testing and improving
- Implementation plan for Indic fonts on mobile
- Code review
- <https://mingle.corp.wikimedia.org/projects/internationalization/cards/1072>
