

PHILOSOPHICAL TRANSACTIONS.

For the Months of *September, October, and November, 1678.*

The Contents.

Monsieur Cassini's Observation of the Lunar Eclips on the 29 Octob. 1678. Monsieur Gallet's Observation of the Solar Eclips on the 11 June, 1676. Extract of a Letter from Monsieur Butterfield about the making of Microscopes, &c. Extract of a Letter from Mr. Conyers about his Improvement of Sir Samuel Moreland's speaking Trumpet. An Account of two Books: I. A Discourse of the State of Health in Jamaica, &c. by Dr. Thomas Trapham. II. Catalogus Stellarum Australium: by Mr. Edmund Halley.

Clarissimo Viro
Domino Nehemiæ Greuio Regiæ Societatis à Secretis
Jo. Dominicus Cassinius S. P. D.

CUM nupera Lunæ Eclipsis à nobis hic in observatorio regio diligentissime fuerit observata, ejus exemplar ad te, Vir Clarissime, mittendum duxi regiæ Societatis Astronomis, imprimisque D. Flamstedio, communicandum. Insuper illa Meridianorum differentia Parisios inter & Londinum exactè definienda, si vobis par cæli serenitas ejusdem observandæ opportunitatem obtulerit, &c.

6 R

Ob.

Observatio Lunaræ Eclipsis die 29 Octobris 1678.

Monsieur Gallet's Observation of the Solar Eclips on the 11th of June, 1676.

Observatio Solaris Eclipsis Acta Avenione die 11. Junii 1676.

Ante Eclipsin.

DI E B'U. S. *precedentibus, locum aptissimum elegimus in quo aère puro frueremur, videlicet Conventum RR. PP. Carmelitarum discalceatorum, qui respectu Civitatis Aven. ad ortum vergit & mœnia stringens aère, fumo & vaporibus urbanis libero gaudet; in medio horti cameram obscuram tapetibus construximus, & in eâ instrumenta ad observationem necessaria ritè collocavimus.*

Tubospicillum aptavimus lente oculari concavâ & objectivâ convexâ instructum, duplicem habens motum firmo sustentaculo, verticalem scilicet & horisontalem, affixam tabellam immobilem firmatis cochleis secum circumducens oculari vitro semper parallelam chartâ candidissimâ indutam, in qua solarem speciem, distantiâ tubospicilli determinatam descripsimus, hujus diametrum circulis concentricis in duodecim digitos divisimus, & quemlibet digitorum in partes sexagesimas.

Loco quadrantis qui pluribus indiget cautionibus & nimium obnoxius est vacillationibus, in hac præcipuè regione in qua ferè semper spirat Aquilo qui perpendiculum agit, Gnomonem ad captandas umbras Solis in partes 400. optimè divisum disposuimus ita ut liberè moveretur situm verticalem ope perpendiculi conservans. Tandem horologium rotatile minuta prima & secunda indicans motu penduli cum cycloide præparavimus.

Tempore
