Quiz: Letter and Number Patterns

**Question 1a of 12** ( 3 Letter and Number Sequences 162001 )

Maximum Attempts: 1

Question Type: Multiple Choice

Maximum Score: 2

Question: Which of the letters below is the next letter in the pattern?

q, t, w, z, \_\_\_\_\_

	Choice	Feedback
A.	The letter a	
B.	The letter b	
*C.	The letter c	
D.	The letter d	
E.	The letter e	

**Global Incorrect Feedback**

The correct answer is: The letter c.

**Question 1b of 12** ( 3 Letter and Number Sequences 303490 )

Maximum Attempts: 1

Question Type: Multiple Choice

Maximum Score: 2

Question: Which of the letters below is the next letter in the pattern?

p, s, v, y, \_\_\_\_\_

	Choice	Feedback
A.	The letter a	
*B.	The letter b	
C.	The letter c	
D.	The letter d	
E.	The letter e	

**Global Incorrect Feedback**

The correct answer is: The letter b.

### Question 1c of 12 ( 3 Letter and Number Sequences 303491 )

Maximum Attempts: 1

Question Type: Multiple Choice

Maximum Score: 2

Question: Which of the letters below is the next letter in the pattern?

r, u, x, a, \_\_\_\_\_

	Choice	Feedback
A.	The letter a	
B.	The letter b	
C.	The letter c	
*D.	The letter d	
E.	The letter e	

**Global Incorrect Feedback**

The correct answer is: The letter d.

### Question 2a of 12 ( 3 Letter and Number Sequences 163906 )

Maximum Attempts: 1

Question Type: Multiple Choice

Maximum Score: 2

Question: Which is most likely to be the next letter in this sequence?

M, T, W, T, F, \_\_\_\_\_

	Choice	Feedback
*A.	The letter S	
B.	The letter M	
C.	The letter W	
D.	The letter R	
E.	The letter F	

**Global Incorrect Feedback**

The correct answer is: The letter S.

### Question 2b of 12 ( 3 Letter and Number Sequences 303492 )

Maximum Attempts: 1

Question Type: Multiple Choice

Maximum Score: 2

**Question:** Which is most likely to be the next letter in this sequence?

M, T, W, T, F, S, \_\_\_\_\_

	Choice	Feedback
*A.	The letter S	
B.	The letter M	
C.	The letter W	
D.	The letter R	
E.	The letter F	

**Global Incorrect Feedback**

The correct answer is: The letter S.

---

### Question 2c of 12 ( 3 Letter and Number Sequences 303493 )

**Maximum Attempts:** 1

**Question Type:** Multiple Choice

**Maximum Score:** 2

**Question:** Which is most likely to be the next letter in this sequence?

W, T, F, S, S, M, \_\_\_\_\_

	Choice	Feedback
A.	The letter S	
B.	The letter M	
C.	The letter W	
*D.	The letter T	
E.	The letter F	

**Global Incorrect Feedback**

The correct answer is: The letter T.

---

### Question 3a of 12 ( 3 Letter and Number Sequences 162004 )

**Maximum Attempts:** 1

**Question Type:** Text Fill In Blank

**Maximum Score:** 2

**Is Case Sensitive:** false

**Correct Answer:** pp, p-p

**Question:** Find the pattern in the following letters, and enter the missing pair of letters. Jotting down the English alphabet and circling letters will help you with this problem.

bt ds, gr, kq, \_\_\_\_\_

Attempt	Incorrect Feedback
1st	

	Correct Feedback

	Global Incorrect Feedback
	The correct answer is: pp.

---

### Question 3b of 12 ( 3 Letter and Number Sequences 303494 )

Maximum Attempts: 1

Question Type: Text Fill In Blank

Maximum Score: 2

Is Case Sensitive: false

Correct Answer: qp, q-p

**Question:** Find the pattern in the following letters, and enter the missing pair of letters. Jotting down the English alphabet and circling letters will help you with this problem.

ct, es, hr, lq, \_\_\_\_\_

Attempt	Incorrect Feedback
1st	

	Correct Feedback

	Global Incorrect Feedback
	The correct answer is: qp.

	The correct answer is: 196.

### Question 10a of 12 ( 3 Letter and Number Sequences 162012 )

**Maximum Attempts:** 1

**Question Type:** Multiple Response

**Maximum Score:** 2

**Question:** Srinivasa Ramanujan, the great East Indian mathematician, was invited to Cambridge University in England in 1914 by the English mathematician G. H. Hardy. One day Ramanujan was ill in the hospital, and Hardy came to visit him. Hardy remarked that he had come in taxicab #1729, and said that he thought that this was an entirely uninteresting number. Ramanujan instantly replied, "Oh no! 1,729 is the smallest number that can be written as the sum of two cubes in two different ways."

The table below shows two patterns of numbers. The pattern in the top row represents the counting numbers. The pattern in the second row consists of the cubes of the counting numbers.

Which two pairs of numbers have cubes that add up to 1,729? Because there are two pairs of numbers to find, you should select a total of four numbers from the list below.

1	2	3	4	5	6	7	8	9	10	11	12
1	8	27	64	125	216	343	512	729	1000	1331	1728

**Correct Answers:**

	Choice
*A.	1
B.	2
C.	3
D.	4
E.	5

F.	6
G.	7
H.	8
*I.	9

### Question 11a of 12 ( 3 Letter and Number Sequences 162015 )

Maximum Attempts: 1

Question Type: Multiple Response

Maximum Score: 2

Question: Which of the following methods can be used to construct a pattern of 10 numbers for which it would be mathematically impossible to predict the 11th term?

*Check all that apply.*

Correct Answers:

	Choice
A.	Make a pattern, starting with 3, where each number is the next digit of pi (3.14159 . . .)

<b>*B.</b>	Make a pattern by drawing numbered ping-pong balls at random from a box
<b>C.</b>	Make a pattern by counting the number of letters in each word of Lincoln's Gettysburg Address, starting with the first word
<b>D.</b>	Make a pattern where each number is the square of the number before it, plus 7 times the cube of the number before that
<b>*E.</b>	Make a pattern by asking each 10 friends what their favorite number is

Attempt	Incorrect Feedback
1st	

Correct Feedback

Global Incorrect Feedback
The correct answers are: Make a pattern by drawing numbered ping-pong balls at random from a box, and Make a pattern by asking each 10 friends what their favorite number is.

### Question 11b of 12 ( 3 Letter and Number Sequences 303510 )

**Maximum Attempts:** 1

**Question Type:** Multiple Response

**Maximum Score:** 2

**Question:** Which of the following methods can be used to construct a pattern of 10 numbers for which it would be mathematically impossible to predict the 11th term?

*Check all that apply.*

**Correct Answers:**

Choice	
<b>*A.</b>	Make a pattern from winning lottery tickets
<b>B.</b>	Make a pattern, starting with 2, where each number is the next digit of $e$ (2.71828 . . .)

C.	Make a pattern by counting the number of letters in each word of Lincoln's Gettysburg Address, starting with the first word
*D.	Make a pattern by asking each of 10 friends what their favorite number is
E.	Make a pattern where each number is the square of the number before it, plus 7 times the cube of the number before that

### Quiz: Arithmetic Sequences

#### Question 1a of 12 ( 2 Arithmetic Sequences 162325 )

Maximum Attempts: 1

Question Type: Numeric Fill In Blank

Maximum Score: 2

Correct Answer: 4

Question: Find the common difference between the terms of the following arithmetic sequence.

-5, -1, 3, 7, 11, ...

Attempt	Incorrect Feedback
1st	

	Correct Feedback

	Global Incorrect Feedback
	The correct answer is: 4.

#### Question 1b of 12 ( 2 Arithmetic Sequences 303530 )

Maximum Attempts: 1

Question Type: Numeric Fill In Blank

Maximum Score: 2

Correct Answer: 5

Question: Find the common difference between the terms of the following arithmetic sequence.

-6, -1, 4, 9, 14, ...

Attempt	Incorrect Feedback
1st	

	Correct Feedback

	Global Incorrect Feedback
	The correct answer is: 5.

#### Question 1c of 12 ( 2 Arithmetic Sequences 303531 )

**Maximum Attempts:** 1

**Question Type:** Numeric Fill In Blank

**Maximum Score:** 2

**Correct Answer:** 4

**Question:** Find the common difference between the terms of the following arithmetic sequence.

-6, -2, 2, 6, 10, ...

Attempt	Incorrect Feedback
1st	

	Correct Feedback

	Global Incorrect Feedback
	The correct answer is: 4.

### Question 2a of 12 ( 2 Arithmetic Sequences 162326 )

**Maximum Attempts:** 1

**Question Type:** Multiple Choice

**Maximum Score:** 2

**Question:** Which choice is the common difference between the terms of this arithmetic sequence?

45, 40, 35, 30, 25, ...

	Choice	Feedback
A.	45	
B.	5	
*C.	-5	
D.	40	
E.	-(-5)	

**Global Incorrect Feedback**

The correct answer is: -5.

### Question 2b of 12 ( 2 Arithmetic Sequences 303532 )

**Maximum Attempts:** 1

**Question Type:** Multiple Choice

**Maximum Score:** 2

**Question:** Which choice is the common difference between the terms of this

arithmetic sequence?

45, 39, 33, 27, 21, ...

	Choice	Feedback
A.	45	
*B.	-6	
C.	6	
D.	39	
E.	$-(-6)$	

**Global Incorrect Feedback**

The correct answer is: -6.

---

### Question 2c of 12 ( 2 Arithmetic Sequences 303533 )

Maximum Attempts: 1

Question Type: Multiple Choice

Maximum Score: 2

Question: Which choice is the common difference between the terms of this arithmetic sequence?

55, 50, 45, 40, 35, ...

	Choice	Feedback
A.	55	
B.	5	
C.	10	
*D.	-5	
E.	-10	

**Global Incorrect Feedback**

The correct answer is: -5.

---

### Question 3a of 12 ( 2 Arithmetic Sequences 162327 )

Maximum Attempts: 1

Question Type: Text Fill In Blank

Maximum Score: 2

Is Case Sensitive: false

Correct Answer: 1/4

Question: Find the common difference between the terms of the following arithmetic sequence.

If necessary, use the slash bar (/) to enter a fraction. Reduce fractions to their lowest terms.

$$\frac{5}{12}, \frac{2}{3}, \frac{11}{12}, \frac{7}{6}, \frac{17}{12}$$

Attempt	Incorrect Feedback

### Question 5a of 12 ( 2 Arithmetic Sequences 162334 )

**Maximum Attempts:** 1

**Question Type:** True-False

**Maximum Score:** 2

**Question:** Tile setters use small tiles in the shape of hexagons to create all sorts of decorative patterns. In the pattern below, a central red tile is surrounded by bigger and bigger 6-sided rings of colored tiles. Only 3 colored rings are shown, but larger rings of white tiles surround the ones you see here.

Construct a sequence of numbers in the following way: First, write down the number of red tiles (1). Then count and write down the number of blue tiles (the next ring out). Then write the number of yellow tiles, the number of green tiles, and so on.

The sequence you build in this way is an arithmetic sequence.

	Choice	Feedback
A.	True	
*B.	False	

**Global Incorrect Feedback**

The correct answer is: False.

**Question 5b of 12** ( 2 Arithmetic Sequences 303538 )

**Maximum Attempts:** 1

**Question Type:** True-False

**Maximum Score:** 2

### Question 10a of 12 ( 2 Arithmetic Sequences 162402 )

Maximum Attempts: 1

Question Type: True-False

Maximum Score: 2

Question: Denver, the capital of Colorado, is not called the "Mile-High City" for nothing. One of the steps in the front stairway of the state capitol building is marked as being exactly one mile above sea level, as shown in this photograph.

One mile = 63,360 inches, and the risers of the steps of the capitol building are 6 inches high. Heather is visiting the capitol, and as she climbs up from the one-mile step, her altitude above sea level, in inches, is given by the following sequence:

63,360, 63,366, 63,372, 63,378, 63,384, ...

This is an arithmetic sequence of numbers.

	Choice	Feedback
*A.	True	
B.	False	

**Global Incorrect Feedback**

The correct answer is: True.

### Question 10b of 12 ( 2 Arithmetic Sequences 303548 )

**Maximum Attempts:** 1

**Question Type:** True-False

**Maximum Score:** 2

**Question:** Denver, the capital of Colorado, is not called the "Mile-High City" for nothing. One of the steps in the front stairway of the state capitol building is marked as being exactly one mile above sea level, as shown in this photograph.

One mile = 63,360 inches, and the risers of the steps of the capitol building are 6.5 inches high. Heather is visiting the capitol, and as she climbs up from the one-mile step, her altitude above sea level, in inches, is given by the following sequence:

63,360, 63,366.5, 63,373, 63,379.5, 63,386, ...

This is an arithmetic sequence of numbers.

	Choice	Feedback
*A.	True	
B.	False	

**Global Incorrect Feedback**

The correct answer is: True.

### Question 10c of 12 ( 2 Arithmetic Sequences 303549 )

**Maximum Attempts:** 1

**Question Type:** True-False

**Maximum Score:** 2

**Question:** Denver, the capital of Colorado, is not called the "Mile-High City" for nothing. One of the steps in the front stairway of the state capitol building is marked as being exactly one mile above sea level, as shown in this photograph.

One mile = 63,360 inches, and the risers of the steps of the capitol building are 7 inches high. Heather is visiting the capitol, and as she climbs up from the one-mile step, her altitude above sea level, in inches, is given by the following sequence:

63,360, 63,367, 63,374, 63,381, 63,388, ...

This is an arithmetic sequence of numbers.

	Choice	Feedback
*A.	True	
B.	False

The correct answer is: Graph D.

### Question 8c of 14 ( 3 Rules for Arithmetic Sequences 303583 )

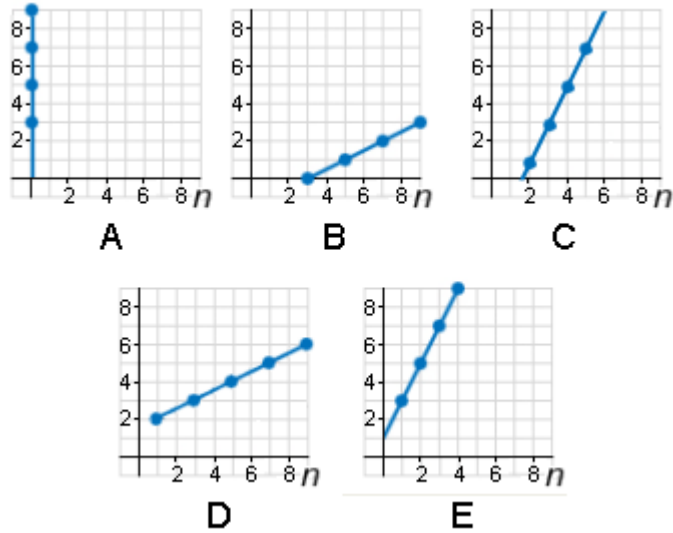

Maximum Attempts: 1

Question Type: Multiple Choice

Maximum Score: 2

Question:

Which of the following is the graph of an arithmetic sequence whose first term is 2 and whose common difference is 0.5?

	Choice	Feedback
A.	Graph A	
B.	Graph B	
C.	Graph C	
*D.	Graph D	
E.	Graph E	

**Global Incorrect Feedback**

The correct answer is: Graph D.

**Question 9a of 14** ( 3 Rules for Arithmetic Sequences 162306 )

**Maximum Attempts:** 1

**Question Type:** Numeric Fill In Blank

**Maximum Score:** 2

**Correct Answer:** 63684

**Question:** Denver, the capital of Colorado, famously has an altitude of one mile above sea level. The state capitol building has a long concrete stairway going up to it from the street, and one of the steps is marked as being exactly one mile above sea level. This is shown in the photograph below.

One mile = 63,360 inches, and the risers of the steps of the capitol building are 6 inches high. Barry is visiting the capitol, and as he climbs up from the one-mile step, his altitude above sea level, in inches, is given by the following sequence:

63,360, 63,366, 63,372, 63,378, 63,384, ...

What is Barry's altitude above sea level, in inches, when he is standing on the 55th step above the one-mile step (counting the one-mile step itself as step #1)?

**Question 11a of 14** ( 3 Rules for Arithmetic Sequences 162309 )

Maximum Attempts: 1

Question Type: Numeric Fill In Blank

Maximum Score: 2

Correct Answer: 11

**Question:** When it is 2 hours after 2 o'clock, then it is 4 o'clock ( $2 + 2 = 4$ ). When it is 10 hours after 10 o'clock, then it is 8 o'clock. In this kind of "clock arithmetic,"  $10 + 10 = 8$ .

When a clock time gets bigger than 12, you subtract 12 and take the answer as the actual clock time. For example, if you subtract 12 from 20, the answer is 8, so 20 o'clock is really 8 o'clock.

Brad has a certain medication that he needs to take every 5 hours without fail, starting at 1 o'clock on a certain day. The sequence of clock times that he takes his pills is 1, 6, 11, 4, 9, ...

What is the clock time when Brad takes his 15th pill? Enter a number from 1 to 12.

-0.1, 0.04, -0.016, 0.0064, -0.00256, ...

	Choice	Feedback
A.	$a_n = 0.4(-0.4)^{n-1}$	
*B.	$a_n = -0.1(-0.4)^{n-1}$	
C.	$a_n = 0.1(0.4)^n$	
D.	$a_n = 0.1(-0.4)^{n-1}$	
E.	$a_n = -0.1(0.4)^{n-1}$	

**Global Incorrect Feedback**

The correct answer is:  $a_n = -0.1(-0.4)^{n-1}$ .

---

**Question 6a of 12** ( 3 Geometric Sequence Formulas 162821 )

Maximum Attempts: 1

Question Type: Text Fill In Blank

Maximum Score: 2

Is Case Sensitive: false

Correct Answer: 1/512

**Question:** Rich and Amy love each other very much. They are sharing a cookie. Rich takes half, and gives the other half to Amy. But Amy loves Rich so much that she does not eat her whole piece. Instead, she breaks it in half and gives the rest back to Rich. Then he breaks this piece in half and gives the rest back to Amy. They keep up this cute game until the crumb they are passing back and forth is too small to work with.

Here is the sequence of cookie sizes:

$$1, \frac{1}{2}, \frac{1}{4}, \frac{1}{8}, \frac{1}{16}, \frac{1}{32}, \dots$$

What fraction of a whole cookie is represented by the 10th term of this sequence?

Maximum Attempts: 1

Question Type: Text Fill In Blank

Maximum Score: 2

Is Case Sensitive: false

**Sensitive:**

**Correct Answer:** 1/256

**Question:** Rich and Amy love each other very much. They are sharing a cookie. Rich takes half of the cookie, and gives the other half to Amy. But Amy loves Rich so much that she does not eat her whole piece. Instead, she takes half of it and gives the rest back to Rich. Then he breaks the cookie in half again and gives the rest back to Amy. They keep up this cute game until the crumb they are passing back and forth is too small to work with.

Here is the sequence of cookie sizes:

$$1, \frac{1}{2}, \frac{1}{4}, \frac{1}{8}, \frac{1}{16}, \frac{1}{32}, \dots$$

What fraction of a whole cookie is represented by the 9th term of this sequence?

Use the slash bar (/) to enter a fraction. Reduce fractions to their lowest terms.

### Question 7a of 12 ( 3 Geometric Sequence Formulas 162830 )

**Maximum Attempts:** 1

**Question Type:** Numeric Fill In Blank

**Maximum Score:** 2

**Correct Answer:** 128

**Question:** You have two biological parents. Each of these parents has two biological parents of their own (your grandparents). Each grandparent has two parents of their own, and so on. This set of relationships can be illustrated by a family tree, as shown in the illustration. (M stands for mother, F stands for father, and G stands for "great" or "grand." That is, GGF is a great-grandfather.)

The diagram shows that you have 16 great-great-grandparents in the 5th generation back. How many great-great-great-great-grandparents do you have? (That's all your grandparents in the 8th generation back, starting with you as the 1st.)

Maximum Attempts: 1

Question Type: Multiple Choice

Maximum Score: 2

**Question:** A fractal is a geometric figure that has similar characteristics at all levels of magnification. One example of a fractal is Koch's (sounds like "Cokes") snowflake. To build this fractal, start with an equilateral triangle whose sides each have length 1.

Then on the middle  $\frac{1}{3}$  of each side, create a triangular "bump" to make a new figure having 12 sides. On the middle  $\frac{1}{3}$  of each of these 12 sides, create a

smaller bump, and so on. The upper part of the illustration shows the first four stages in the construction of a Koch's snowflake. The "real" snowflake is the result of carrying on this process forever!

The lower part of the illustration shows how, when a bump is added to any side, the length you have is multiplied by  $\frac{4}{3}$ . If a bump is added to every side of a snowflake figure, then the entire perimeter is multiplied by  $\frac{4}{3}$ .

Which of the following sequences represents the *total perimeter length* for each of the stages 1, 2, 3, 4, and so on (illustrated above) in building Koch's snowflake, starting with the equilateral triangle?

	Choice	Feedback
A.	3, 12, 48, 192, ...

*B.	$P_n = P_1 + (n - 1)iP_1$	
C.	$a_n = a_1 + nd$	
D.	$P_n = P_1(1 + i)^{n-1}$	
E.	$a_n = a_1 r^{n-1}$	

**Global Incorrect Feedback**

The correct answer is:  $P_n = P_1 + (n-1)d$ .

**Question 4a of 12** ( 3 Applications of Arithmetic Sequences 161762 )

Maximum Attempts: 1

Question Type: Multiple Choice

Maximum Score: 2

Question: What is the next term in the following constant-velocity sequence?

10 cm, 17 cm, 24 cm, ...

	Choice	Feedback
A.	20 cm	
B.	28 cm	
*C.	31 cm	
D.	32 cm	
E.	35 cm	

**Global Incorrect Feedback**

The correct answer is: 31 cm.

**Question 4b of 12** ( 3 Applications of Arithmetic Sequences 303700 )

Maximum Attempts: 1

Question Type: Multiple Choice

Maximum Score: 2

Question: What is the next term in the following constant-velocity sequence?

10 cm, 18 cm, 26 cm, ...

	Choice	Feedback
A.	20 cm	
B.	28 cm	
C.	31 cm	
D.	32 cm	
*E.	34 cm	

**Global Incorrect Feedback**

The correct answer is: 34 cm.

### Question 4c of 12 ( 3 Applications of Arithmetic Sequences 303701 )

Maximum Attempts: 1

Question Type: Multiple Choice

Maximum Score: 2

Question: What is the next term in the following constant-velocity sequence?

10 cm, 16 cm, 22 cm, ...

	Choice	Feedback
A.	20 cm	
*B.	28 cm	
C.	31 cm	
D.	32 cm	
E.	35 cm	

**Global Incorrect Feedback**

The correct answer is: 28 cm.

### Question 5a of 12 ( 2 Applications of Arithmetic Sequences 161763 )

Maximum Attempts: 1

Question Type: Multiple Response

Maximum Score: 2

Question: Which of the following are possible explicit formulas for the  $n$ th term of the constant-velocity sequence below?

*Check all that apply.*

10, 17, 24, 31, ...

Correct Answers:

	Choice
A.	$x_n = x_{n-1} + 7$
*B.	$x_n = 10 + 7(n - 1)$
*C.	$x_n = x_1 + (n - 1)v\Delta t$
D.	$x_n = 7(n - 1)$
*E.	$x_n = 3 + 7n$

Attempt	Incorrect Feedback
1st	

	<b>Correct Feedback</b>
	<b>Global Incorrect Feedback</b>
	The correct answers are: $x_n = 10 + 7(n - 1)$ , $x_n = x_1 + (n - 1)v\Delta t$ , and $x_n = 3 + 7n$ .

### Question 5b of 12 ( 2 Applications of Arithmetic Sequences 303702 )

Maximum Attempts: 1

Question Type: Multiple Response

Maximum Score: 2

Question: Which of the following are possible explicit formulas for the  $n$ th term of the constant-velocity sequence below?

*Check all that apply.*

10, 18, 26, 34, ...

Correct Answers:

	Choice
*A.	$x_n = 10 + 8(n - 1)$
B.	$x_n = x_{n-1} + 8$
C.	$x_n = 8(n - 1)$
*D.	$x_n = x_1 + (n - 1)v\Delta t$
*E.	$x_n = 2 + 8n$

Attempt	Incorrect Feedback
1st	

	<b>Correct Feedback</b>

	<b>Global Incorrect Feedback</b>
	The correct answers are: $x_n = 10 + 8(n - 1)$ , $x_n = x_1 + (n - 1)v\Delta t$ , and $x_n = 2 + 8n$ .

### Question 5c of 12 ( 2 Applications of Arithmetic Sequences 303703 )

Maximum Attempts: 1

Question Type: Multiple Response

Maximum Score: 2

Question: Which of the following are possible explicit formulas for the  $n$ th term of the constant-velocity sequence below?

Check all that apply.

10, 16, 22, 28, ...

Correct Answers:

	Choice
*A.	$x_n = 10 + 6(n - 1)$
B.	$x_n = x_{n-1} + 6$
*C.	$x_n = x_1 + (n - 1)v\Delta t$
D.	$x_n = 6(n - 1)$
*E.	$x_n = 4 + 6n$

Attempt	Incorrect Feedback
1st	

	Correct Feedback

	Global Incorrect Feedback
	The correct answers are: $x_n = 10 + 6(n - 1)$ , $x_n = x_1 + (n - 1)v\Delta t$ , and $x_n = 4 + 6n$ .

**Question:** In a famous story, a wise man in India requests a reward promised by

his king. The wise man shows the king a chessboard having 64 squares. "Put 1 grain of rice on the first square, 2 grains on the second square, 4 on the third square, 8 on the fourth square, and so on. That will be my reward."

The king readily agrees, and is ruined because the total number of rice grains turns out to be about 37 trillion trillion trillion grains of rice  $\text{₹}$  much more than the value of the entire kingdom. How many grains of rice go in the 13th square?
