Mr. Dubois, shortly after, went to New Orleans. On this return he informed Mr. Ludlowthat an applica-PREDICTION. In 1835, HENRY CLAY, in the Senate of the United

States, attered the following memorable warning.— Tell us, ye locofoces, was this not prophecy? "There being no longer any sentinel at the head of our banking establishments to wars them by its infor-mation and operations of appraching danger, the local institutions, already multipled to an alarming extent, institutions, already multipled to an alarming estent, and almost daily multipled to an alarming estent, and almost daily multiplying in seasons of presperity, will make free and unrestrained emissions. All the channels of circulation will be gorged! Property will rese extrayantly high, and constantly looking upthe temptation will be irresistible! Inordinate speculation will ensue, delte will be freely contracted, and when the season of adversity comes, as come it must, the banks exting without concert and without guide, obeying the law of self-preservation, will all, at the same time, call in their issues, the vast number will exame time, call in their issues, the vast number will exame time, call in their issues, the vast number will exame time, call in their other preservation, and an explosion of the general banking systems, or the establishment of a new Bank of the United States, will be the ultimate effects."

The We find the following outgivings in the Washington correspondence of the New York Express.

They are curious, and we doubt not, substantially orrect.

Although Washington appears to be quiet, there is much arranging for the future going on here. Some things are in progress that would surprise even the democracy. The recent state of public opinion developed in relation to the popularity of Mr. Calihoun in the ranks of the brofocce has startled the Van Buren men. Thère is very little doubt that the controversy will be reduced down to the narrow compass in the locofoco ranks, of Martin Van Buren and John C. Calhoun. This is the impression of the friends of both three gentlemen. The great difficulty to actile will be, whether there shall be a national convention to nominate? The southern portion of the locofoco are se perfectly sure of carrying their candidate in convention that they seem willing to risk this mode of settling the constoversy at once. But the northern perition of the democracy, who are equalty confident of Mr. Calhoun's strength with the people, understand bester the secret machinery by which the wiff Albaun Regency have always succeeded in defeating the fair expression of public opinion, and they understand the mode of packing conventions too well, willingly, to wust to the measuration of such a body. Thy say that Mr. Calhoun's strength will not carry the following states, and that Mr. Van Burenia not critain to certain to carry suny:

The friends of Mr. Calhoun contend that the candidate who has the real strength would, by these
means be defeated of his nemination, and his rival
would thus deaffect the people and defeat his reelection, giving it to the white candidate.
