He afterwards writted out to the carriage, alleging that the hort was trifling; he was however, at the suggestion of his friends, attended to his hotel by Dr Chartes Bell Gisson, who upon examination found the inserts of the animal's seen slight secretches, as if caused by the gliding of the body from the chosing mouth of the lion. The injury is believed to be quite superficial, though perhapsa little inconvenience will be felf for a day or two. The cause of the incident in no doubt in the first that Mr Van Amburgh has not been with the animals during the winter, he having been sick in New York, he is not entirely recovered yet, or it is highly probable that the lion would have got the worst of the recounter. The animals had evidently not got used to him yet; and thus together with the cold, which seemed to make them rather indisposed for play, so no doubt the cause of an occurrence, that in all probability will never take place again — Bolt.
