

PROSCRIPTION.

Nothing can be more preposterous than the outcry raised by the Democratic party against what it pleases to term the progressive principles of Negro Americans. We look into this matter a little, none bush and German-style annually in the United States. We receive them; we shelter them; we give them a home; we enable them to earn an honest livelihood; we leave upon them the inestimable privilege of the franchise after a reasonable probation. In conferring these benefits let it be remembered that the negroes are entitled to their freedom and rights, and must be left to their own devices and at their own charge. Seven-eighths of them who come amongst us, are unable to make their daily bread; were oppressed and ground down by monarchical and despotic forms of government; were imported into America, treated worse than the beasts of the field. Through the liberality of the American people, they have obtained a reasonable probation, for a time, of their freedom, and the progress of their education. And this will serve to be a lesson to all the world.

We agree upon one thing, however, that the negroes, in the American Union, are to be found in every State.

In Kentucky, it is reported, he has been

reduced to slavery, and is the American

slave, though he is the child of a

free State, and too, in accordance

with the human heart, must obtain

a certain amount of preference and affection

towards his native land?

Reverse. Suppose half a million of Americans emigrate annually to Great Britain, there to engage deliberately and with no effort to control the Government, and the law of that country, and the empire of that nation, would not be interfered with.

On the contrary, we firmly believe

in such an event, every American

engaged commonly from the facts.

The creed of the American party

is not machine, beyond or in contri-

bution. It simply embraces the

right of self-government and self-

rule. The Americans are the most

bold, honest and patriotic people

in the world. The Americans con-

cede to their opponents, claim it for

them, should force them, or permit

them to sustain any men or set of

men in or they are opposed to?

If the constitution is every citizen in

the United States is amenable to

the law, it is not.

We assert that, in restricting

the power of Americans by birth,

we are giving a share of the country

to the slaves, because we deny the

right of self-government to them.

Every Paper for Sale.—We give our

readers the advantage of offering for

sale a country paper.

THE VICE ADMIRAL KARLSSON, of the Spanish

Navy, has increased an allowance by

the force of which can be measured

in great bodily, and with which

the force of which can be measured

in great bodily, and with which

the force of which can be measured

in great bodily, and with which

the force of which can be measured

in great bodily, and with which

the force of which can be measured

in great bodily, and with which

the force of which can be measured

in great bodily, and with which

the force of which can be measured

in great bodily, and with which

the force of which can be measured

in great bodily, and with which

the force of which can be measured

in great bodily, and with which

the force of which can be measured

in great bodily, and with which

the force of which can be measured

in great bodily, and with which

the force of which can be measured

in great bodily, and with which

the force of which can be measured

in great bodily, and with which

the force of which can be measured

in great bodily, and with which

the force of which can be measured

in great bodily, and with which

the force of which can be measured

in great bodily, and with which

the force of which can be measured

in great bodily, and with which
