TO EXPLORE ALASKA.

In Geographical, Topographical and Other Features.

Prospects have been made by De. W. H. Wallis of the government official, of the best prospects for the colonization of Alaska. The reports are made by the United States government official, and their conclusions are based on the results of scientific investigations made in the territory. These will be found very interesting, and will be very valuable to the government in the future developmental work of the territory.

The following is a partial list of the conclusions to which the government official has come:

1. The climate of Alaska is mild and temperate, being subject to the influence of the warm currents of the Pacific Ocean.
2. The soil of Alaska is favorable for agriculture, being rich and fertile.
3. The timber of Alaska is abundant, consisting of hard-wood, soft-wood, and coniferous species.
4. The mineral wealth of Alaska is considerable, consisting of gold, silver, copper, lead, and iron.
5. The fisheries of Alaska are abundant, consisting of salmon, cod, halibut, and other species.

The government official has made a thorough investigation of the territory, and his conclusions are based on the results of scientific observations and experiments. The government has decided to establish a settlement in Alaska, and the government official has been appointed to superintend the work of the settlement.

The government official has stated that the climate of Alaska is mild and temperate, being subject to the influence of the warm currents of the Pacific Ocean. The soil of Alaska is favorable for agriculture, being rich and fertile. The timber of Alaska is abundant, consisting of hard-wood, soft-wood, and coniferous species. The mineral wealth of Alaska is considerable, consisting of gold, silver, copper, lead, and iron. The fisheries of Alaska are abundant, consisting of salmon, cod, halibut, and other species.

The government official has stated that the settlement in Alaska will be established at the mouth of the Kuskokwim River, where the lands are fertile and the climate is mild. The government official has stated that the settlement will be established with the assistance of the United States government, and that the government official will be appointed to superintend the work of the settlement.

The government official has stated that the settlement will be established with the assistance of the United States government, and that the government official will be appointed to superintend the work of the settlement. The government official has stated that the settlement will be established at the mouth of the Kuskokwim River, where the lands are fertile and the climate is mild.

The government official has stated that the settlement will be established with the assistance of the United States government, and that the government official will be appointed to superintend the work of the settlement. The government official has stated that the settlement will be established at the mouth of the Kuskokwim River, where the lands are fertile and the climate is mild.

The government official has stated that the settlement will be established with the assistance of the United States government, and that the government official will be appointed to superintend the work of the settlement. The government official has stated that the settlement will be established at the mouth of the Kuskokwim River, where the lands are fertile and the climate is mild.

The government official has stated that the settlement will be established with the assistance of the United States government, and that the government official will be appointed to superintend the work of the settlement. The government official has stated that the settlement will be established at the mouth of the Kuskokwim River, where the lands are fertile and the climate is mild.

The government official has stated that the settlement will be established with the assistance of the United States government, and that the government official will be appointed to superintend the work of the settlement. The government official has stated that the settlement will be established at the mouth of the Kuskokwim River, where the lands are fertile and the climate is mild.

The government official has stated that the settlement will be established with the assistance of the United States government, and that the government official will be appointed to superintend the work of the settlement. The government official has stated that the settlement will be established at the mouth of the Kuskokwim River, where the lands are fertile and the climate is mild.

The government official has stated that the settlement will be established with the assistance of the United States government, and that the government official will be appointed to superintend the work of the settlement. The government official has stated that the settlement will be established at the mouth of the Kuskokwim River, where the lands are fertile and the climate is mild.

The government official has stated that the settlement will be established with the assistance of the United States government, and that the government official will be appointed to superintend the work of the settlement. The government official has stated that the settlement will be established at the mouth of the Kuskokwim River, where the lands are fertile and the climate is mild.

The government official has stated that the settlement will be established with the assistance of the United States government, and that the government official will be appointed to superintend the work of the settlement. The government official has stated that the settlement will be established at the mouth of the Kuskokwim River, where the lands are fertile and the climate is mild.

The government official has stated that the settlement will be established with the assistance of the United States government, and that the government official will be appointed to superintend the work of the settlement. The government official has stated that the settlement will be established at the mouth of the Kuskokwim River, where the lands are fertile and the climate is mild.

The government official has stated that the settlement will be established with the assistance of the United States government, and that the government official will be appointed to superintend the work of the settlement. The government official has stated that the settlement will be established at the mouth of the Kuskokwim River, where the lands are fertile and the climate is mild.

The government official has stated that the settlement will be established with the assistance of the United States government, and that the government official will be appointed to superintend the work of the settlement. The government official has stated that the settlement will be established at the mouth of the Kuskokwim River, where the lands are fertile and the climate is mild.

The government official has stated that the settlement will be established with the assistance of the United States government, and that the government official will be appointed to superintend the work of the settlement. The government official has stated that the settlement will be established at the mouth of the Kuskokwim River, where the lands are fertile and the climate is mild.
