HOW WATCHES ARE INJURED

Mary Templeton, of 1137 Royal Street, Almond Street, has written us a letter in which she describes her experience of losing her watch. She had a beautiful watch which she kept in her pocketbook. One day, while she was walking down the street, she noticed that the time was five minutes behind. She went into a store and asked to see a watchmaker. The watchmaker took the watch and began to work on it. After about an hour, he said that he had fixed it. Mary went back home and put the watch in her pocketbook. But when she got home, she discovered that her pocketbook was missing! She searched everywhere for it, but could not find it. She was very upset and decided to write us a letter about her experience.
