ABOUT US

Our mission is to accelerate business in creative industries by:

- Inspiring new ways to use technologies.
- Providing a respected channel to policy makers.
- Stimulating innovation across different sectors.
- Leading and supporting business to promote with strategic policy and advertizing.
- Create a network of networks helping businesses work creatively together.

7xNet believes that to truly facilitate change and innovation across the creative industries. To achieve this we need to work in three dimensions: creating, compelling and relevant new content helping creative business understand as well as exploit new opportunities that technology presents. Along the way, we want to collaborate as widely as possible, engaging the whole creative community and giving the industries them selves a proper voice in driving the programme.

iTV is a new South Indian Television channel - a latest 7xNet Project.
