Six Sigma in Action Deploy Image Cycletime

Customer Profile – 1500 seat Marketing and Sales HQ for BMW company

Business Problem & Impact

Deployment of new equipment taking too long. Customer deploy image cycle time is on average 45 min. and can take a max of 1 week due to no account ID, vacations or travel. BMW users are not setup for their start date creating a loss of productivity.

Measure & Analyze

Data Collection: Speed to unpack, setup, image, and deploy. The existing process sigma was 1.5

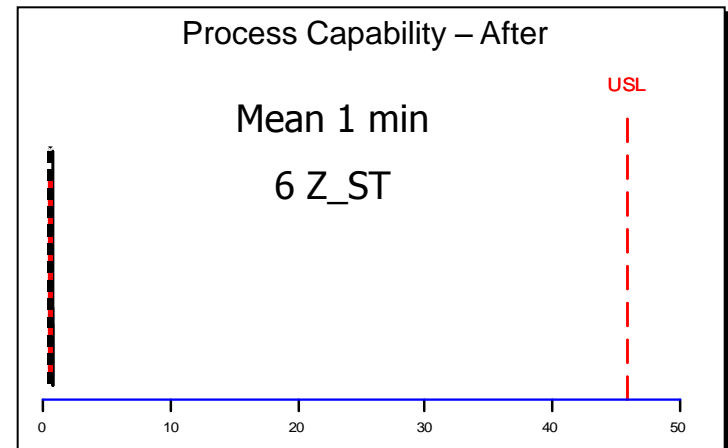

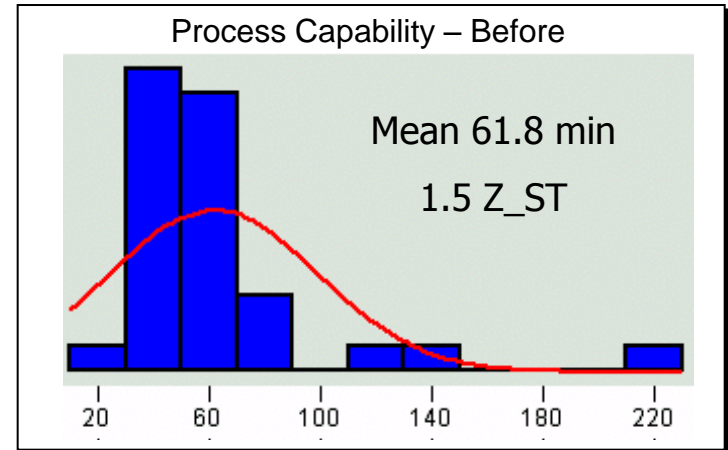

Root Causes: Slow image time and imaging one unit at a time.

Improve & Control

Setup new image server with 24 port switches and three workstation area with keyboard, mouse and monitor switches. Server setup as stand-alone (not on BMW Network) and running at 100 Mps. Trained 5 engineers in using Ghost via server imaging and improve process.

Results/Benefits

After the project, the customer saved US\$170K, or 30%, as a result of reduced end user downtime.

A Savings of US\$170K in 2003!
