FIGHT THE LOCUSTS

American Method May Be of Value
in United States.

Minor Eric Little Paris due to Arrive Again Next Spring. Extensive
Eradication Work Planned for 1911.

Washington, D.C., Oct. 6. - The announcement that the
resumed use of the enemy weapon may be of value in the
eradication of the pest in the United States and other parts
of the world. The reports now being received from various
points abroad indicate that the American method may
prove more effective than any other that has been
attempted. Under the guidance of Major Paris, who has
spent the previous two seasons in the field in France,
Canada, and other countries, the work will be
undertaken with increased vigor and efficiency.

The official report states that the work has been
extensive and successful in France, where the number of
insects has been reduced to a fraction of what it was
before. In Canada, the infestation has been
considerably lessened, and in other countries, such as
Australia and New Zealand, the method has been
found to be effective.

The work is due to proper organization and the
use of the proper tools. The American technique
will be followed, and the American method of
eradication will be adopted.

FOOD HEAT VALUES

WHERE THE GOVERNMENTS EXPERIENCES ARE FAULTY

More Valuable Information Could Be Solicited from the
Farmers. The Department of Agriculture is now
undertaking a survey of the heat values in foods.

There is a vast amount of information on this
subject, but the Department is not in a position
to give the farmers the full value of this information.

There is a need for more accurate data, and the
Department is now taking steps to collect this
information. The Department is also
undertaking a survey of the heat values in foods
grown in different parts of the country.

TURTLE VERY HARD TO KILL

One Pound Also Embalming Tag, But Liberal Partial Tax Was Debated.

The weekly meeting of the Florida
Legislature was resumed. Dr. G. E. Studebaker, of St.
Peter's, brought in a bill providing for the<br>embalming of turtles. The bill was debated, but was
not passed. The bill was debated, but was
