Company view

Just Industry Development co.,ltd, We are specialized in manufacturing industries boiler and power plant Boilers, All kinds of boiler parts and pressure vessels, authorized by the General Administration of Quality Supervision, Inspection and Quarantine of the People's Republic of China. Quality control system: Each worker must has the Certificate before joining in and starting work. Each producing process is marked Work Number of the Workman and Inspector, and input the information to computer procedure. So we can check the person responsible swiftly. Each welding line is inspected rigorously with radiographic test and X-rays is saved to official file. Each boiler is tested seriously with water pressure and inspected by the Shandong province Institute of Specific Equipment Inspection and Research, then get the Product Safe Characteristic Super. We are with abundant technical force, advanced equipment, complete examination method. Moreover, our company has passed the ISO9001:2000 ASME AS1228 International Quality System Authentication. Furthermore, our company can make boiler auxiliaries for large-scale power plants and has become the major boiler auxiliary supplier in china. In recent years, our products have been successfully exported to Indonesia, Thailand,Australia,Iran, Bangladesh, Uzbekistan,Hongkong, and other overseas markets through our factory and group company. We are sincerely looking forward to establish long-term business cooperation with you.

Coal fired steam boiler and hot water boiler:

D type water tube steam boiler:

- ✧ Steam output 1-80ton/hr
- ✧ Working pressure 7-65bar
- ✧ D type water tube design
- ✧ Moving chain grate or Fixed grate or Step grate Design
- ✧ Using industries working or plant for turbine.
- ✧ Safety design and high pressure protect.
- ✧ AS1228 and ISO9001:2000 international quality accreditation.
- ✧ Can design all kinds boiler based client requiring.
- ✧ We can supply all parts for the boiler.
- ✧ High degree of automation, has alarming measures of pressure and water-level release
- ✧ Aptitude Control, Long-distance watch and control running
- ✧ Can print operation parameter on paper real time

Biomass Fuel steam boiler and hot water boiler:

This is woodchip, sawdust, waste wood fuel, husks fired steam boiler :

- ❖ Water tube or fire tube steam boiler
- ❖ A type design, single drum, Moving grate.
- ❖ High effective, low fuel consumption
- ❖ Low pollutant in exhaust, accord international standard, many country in running.
- ❖ Pressure safely protect , more than design pressure 20%, Fuel: Woodchip, Sawdust, Waster wood, Oat husk, Coal.
- ❖ Strict every working procedure quality control and good afte-sale.
- ❖ Boiler automatically shut when find malfunction
- ❖ Steam output from 1-80ton/hr, pressure form 7-55bar
- ❖ We can supply all parts for the boiler.
- ❖ The boiler has the interlocking protection devices of low water level, hyperbaria, exhaustsmoke to overheat, ect, show function of steam flow, furnace chamber outlet temperature, and automatic adjust devices of continious feed water nd burnning, the boiler also adopts computer controll system which make the boiler run, fault diagnosis convenient and reliable

Circulation Fluidized Bed Steam Boiler:

- ✧ The boiler is circulation fluidized bed, include steam and hot water boiler, this is high pressure and steam, Larger industry and plant coal fired boiler. Burning efficiency reaches 95%99%. High burning rate, heat efficiency above 87%. Energy-saving, high efficiency.

1, High flexibility of fuel, which can satisfy the burning of many kinds of fuels.

2, Limestone can be added in bed material. During burning process reacts with SO₂ of flue formulates sulphate, desulphuration can satisfy environment protection.

Reasonable air distribution and low temperature of furnace, which can control formulation of NO_x and really reach environment protection. Big adjusting range load can be adjusted rang 110%30%.

3. High automatic control, makes boilers running safely and economically in long term.

4, Adopt upper-exhaust high temperature cyclone separated device. High collection of bed material. High heat transfer

coefficient, high ability of overload.

Main spec:

CFB 35ton/hr-3.82Mpa-450 steam temperature

CFB 75ton/hr-5.3Mpa-485 steam temperature

CFB 130 ton/hr-5.3Mpa-550 steam temperature

CFB-130ton/9.8Mpa-M steam boiler

CFB-220ton/9.8Mpa-M steam boiler

CFB 29MW-58MW-116MW Hot Water boiler

Just Boiler

5, The boiler is transported to work local by every parts, then installation with these parts, we can supply all parts for this boiler.

CFB Boiler Dust Collector:

Bag and reduce SO₂ dust collector, can also supply water membrane dust collector

Diesel Oil and Gas fires steam boiler and hot water boiler:

WNS series Oil and gas fire tube steam boiler or hot water boiler

- ✧ Burner come from Germany or Italy, protect automatically
- ✧ **Rated Evaporation: 500kgs-40000kgs/H, Steam Pressure at boiler: 7-25bar**
- ✧ Compact structure, logical design, highly effective
- ✧ Safe burning condition, low gas blackness
- ✧ Save investment, easy installation and moving
- ✧ Power oil cousing. 24 hours working life. Low noise
- ✧ We can supply all kinds of boiler parts for the boiler
- ✧ Aptitude Control, Long-distance watch and control running
- ✧ Can print the operation parameter on paper real time
- ✧ ISO9001: 2000 and AS1228 international attestation
- ✧ Auto feedwater, auto protect, auto pressure control
- ✧ Fuel: Diesel oil, Heavy oil, Nature gas, City gas
- ✧ Screw flue have good effective and low flue temperature

D type Diesel oil or Gas fired boiler:

- ✧ Burner come from Germany or Italy
- ✧ Diesel oil or gas fired Water tube design
- ✧ **Rated Evaporation: 3000kgs-80000kgs/H, Steam Pressure at boiler: 10-60bar**
- ✧ Compact structure, logical design, highly effective
- ✧ Safe burning condition, low gas blackness , auto protect runing
- ✧ Save investment, easy installation and moving
- ✧ Power oil conserving. 24 hours working. Low noise
- ✧ We can supply all kinds of boiler parts for the boiler
- ✧ ISO9001: 2000 and AS1228 international attestation
- ✧ Auto feedwater, auto protect, auto pressure control
- ✧ Fuel: Diesel oil, Heavy oil, Nature gas, City gas
- ✧ Aptitude Control,Long-distance watch and control running
- ✧ Can print operation parameter on paper real time

Vertical Steam boiler and hot water Boiler Series

❖ Coal fired boiler

Steam boiler from 100kgs-2000kgs/hr

Pressure from 5-12bar

Hot water boiler: 100kw-1500kw

Pressure from 0-7bar

Also can build with your spec and design.

Convenient, Safety, Long time life

❖ Diesel oil or Gas boiler

Steam boiler from

100kgs-2000kgs

Pressure 5-17bar

Hot water boiler

From 100-1500kw

Auto running,

Auto protect

Long-distance control

Safety and convenient

❖ Family small hot water boiler

Fuel: Coal, woodchip, waste wood

No pressure very safety

Drink water and wash hot water

Convenient and cleaning condition

Suited family very good

Moving Container Boiler

The container boiler include:WNS series oil fired steam boiler,Electric box,Water solution system Distributor,Water feed pump,Oil tank,Meter and Valve,etc.

These parts will be reveted in container,this type boiler can move freedom,its work only need turn-on

the electrical power.It can be used in Derset,Oil filed,Mountain,Wilderness,Road building site,etc.

Convenient transport ,compact structure, proper redistribution

Thermal Oil Boiler

Heating Furnace With Coal As Fuel
Heating Furnace With Oil(Gas) As Fuel

Heating Furnace With Useless Timber
And Sand Powder As Fuel

Molten Salt Heating Furnace

Hot Air Furnace Super

New Type Corner-Pipe Boiler:

- ✧ Drum be installed outside
- ✧ Four corner pipe is water drop pipe and also support the drum, they haven't been heated, more safety
- ✧ All water-wall pipe package the furnace, reduce the heat loose, more high effective than normal coal fired boiler.
- ✧ International new type save energy high effective boiler
