- Creation community associations of health, water, education etc.
- Help rehabilitation of six primary schools in Baidoa.
- Contribute community recovery measures implemented by world community representatives of UN and international NGOs.
- Advocate establishments of National and local Somali intellectuals forum capacitating to help their counterpart.

### **B. Chairman of Wabiyow Community Development Association.**

Wabiyow community based organization partnered with CARE International on project of rural food security. A project aimed to remain community at their respective traditional settlement through provisions of social service developments including water catchment rehabilitation, inter villages fiddle road maintenances and village food market buildings. It later partnered with WFP on project of FSP and free and target food distributions which to date works effectively in Ufurow district under bay region administration. Failure to have an indigenous organization to complement humanitarian support and protection organized by world communities was detrimental to aid program.

Massive people dislodgement in consequences of natural (drought and famine) and man made (lacking or poor rural service delivery programs) causes and effects, Wabiyow under the direction of chairman and subordinate staff together with CARE International effortlessly planned and implemented program of rural food security concerns.

The impacts of these projects were clearly observed as results of increased accessibilities of village roads during cholera outbreak in 2002 at Ufurow district which otherwise thousands of affected people by the disease would be hard and impossible to interfere.

Under this program grants, 200 Kms dust roads and, 12 water catchments so far renovated, plus further 4 village grains markets established.

### **C. Manager of Al-Qamar Technology Center**

A center aimed to develop most needed computer technology to keep pace with fast

developing world. Under management and supervision of manager implemented several project of capacity building with UNDP Somalia.

A program helped hundreds of Somali Students and professionals through computer literacy developments. Trained staff from UN and international NGOs as well as some local organization had improved in their day to day work executions, particularly to those involve in secretarial work of their respective agencies.

Similar improvements were recorded from trained local authority employees.

#### **D. Director of MGS (Mumin Global Service).**

An indigenous organization tasked to produce pure and portable water to community in Baidoa and surrounding villages. Self sustained project under management of manager as well remarkable reduced water borne deceases that once marked Baidoa town people for use of unprotected water sources and water points of stream, shallow hand- dug wells and reservoirs.

As 2002 published Human Resources Book by UN indicated, this privately financed water development project helped Baidoa and surrounding communities positively. On accounts of implementation, ailments from water borne diseases had reduced substantially which means increased human resources for other life earning services.

#### **IV. Project undertaken:**
