WILL STUDY ALEUTS

SCIENTISTS TO MAKE INVESTIGATION OF ALEUTS

Eugene Arakham and Kovoimky, Dr. Geckle and Party, Go to St. Paul Island

The Discovery of the Aleutian Islands by Dr. McLane

The Aleuts, who have been described as the earliest residents of the Aleutian Islands, were discovered by Dr. McLane, who has been investigating them for several years. The Aleuts are a people of great interest to the scientists, who have been studying their culture and way of life for many years. The Aleuts are known for their unique language and their rich cultural heritage.

POISON WILL CARRY CAMERAS

Scalp and Kidney in the Aleutian Islands

The Aleuts, who are known for their unique cuisine, have been found to be in danger of being poisoned by the use of cameras in their villages. The cameras are used to capture images of the Aleutian landscape, but they also carry a poison that can affect the health of the Aleuts. The scientists are studying the effects of the poison on the Aleuts and are working to develop a method to remove it from their villages.

A POWERFUL GUN FOR ENGLAND

Dr. Lakin's Largest Battery Aircraft

Dr. Lakin, who has been studying the use of aircraft in warfare, has developed a powerful gun for England. The gun is capable of firing a powerful shot that can be used to destroy enemy aircraft. The scientists are studying the effects of the gun on the battlefields and are working to improve its accuracy and effectiveness.
