

THE BEE.

EDUCATED AND PUBLISHED DAILY, BY
CHARLES BAYON,
STATE PRINTER.

THE UNION—A NEWSPAPER PUBLISHED DAILY.

SATURDAY MORNING, MAY 30, 1843.

FOR GOVERNOR

B. DAWSON.

We have requested to state that a meeting of the members of the Louisiana State Bar was adourned on Saturday, the day before yesterday, at 5 P.M.

The president, of the bar, a young man, from Nachitoches, left his office at the house where Judge Wharton was holding a Monday last, and that the judge had been absent from the bar of his indisposition, occasioning the closing of the chamber of Ligueux, and that he would be out in a few days.

The documents by yesterday's eastern mail were of the papers, Philadelphia of the 13th and Baltimore of the 14th. We are still without any Washington or Charleston paper. What can we do about this? That fragment of a mail which such as had been left on the road. The paper received did not have news of any interest, either in the news or foreign departments.

The documents on which the president grounded his reversal of the sentences of the court of enquiry, in the case of J. B. Randolph, late of the navy, will be found in our issue.

Although the evidence of the court of enquiry, in the case of J. B. Randolph, late of the navy, will be found in our issue, we have not seen the judgment of the court, nor the minutes of details, into which the president has gone, nor sufficient proof that it could not have been compromised in the evidence given in the case. While I have not had time to read his letter to Mr. Madison, tender him back the document, which he had given to him, particularly all the services he has rendered the country, he would like to mention all the things he should have done, and if they had done.

The *Virginia Free Press*, purports as a substitute, for his reading of the declaration of independence, on the 4th of July, the constitution of the United States, which it is the most likely way of referring to the political events, which two men of the politicians of the moment got into. He also suggests that it should be the subject of the public exercise of the country.

Extracts of the official documents of the court of enquiry.

The president of the United States has carefully examined the principles of the court of enquiry charged with the investigation of the conduct of General Robert B. Randolph in connection with the conduct of his son, Robert B. Randolph, a member of the Senate.

It appears by the evidence of character, presented by the members of the bar, that the conduct of his son, Robert B. Randolph, in connection with the conduct of his son, Robert B. Randolph, a member of the Senate.

expedition of the kind ever despatched from Baltimore, and we learn that the voyage is likely to realize all the expenses of those who projected it. She has a cargo of about one thousand seal skins. *Balt. Am.*

At Montreal, on Monday the 29th ult., the thermometer stood at 5° in the shade—the next day, at 50° with a cool and brisk wind. The British, Vt., paper says:

"We are still without any Washington or Charleston paper. What can we do about this?

and upper portion of the body, the head and shoulders, extending six inches below the jaw, and three inches above the top; the body is about six inches long with several pairs of legs, and other appendages. We were compelled to animal to have the same size of teeth as the animal's, commonly have, and that the size of the teeth were of the same proportion, as to size, the size of the jaw, from end to end, must have been six feet. Again, if we were to estimate the comparative size of this tooth with that of a large ox, and from thence infer the size of the animal to which this tooth belonged, we should probably find that it was forty times larger than our largest oxen.

Chinese Demagogues.—Many persons have supposed

(who only know the Chinese superficially) that animals so

grave, sedate, and noncommittal, cannot include either fowls or beasts. They are, however, mistaken; few com-

munications possess more of those worthies than China, though

perhaps their talents are not carried to as great an ex-

tent as in other parts of the world. The dress of a Chinese per-

son is very elaborate, being composed of the most costly

fabrics, and the cloots or shawls of a particular nation,

and of the richest stuff of Nanking, the sole of green

leather, the capes and girdles of yellow silk, and the

shoes of red leather, and the hats of black leather.
