Islands In the Caribbean - A Vagabond's Dream

By H. R. Ladd, instructor in biology, University of Chicago.

Long before I knew the Bermudas, I knew Long Beach Island, New Jersey, for it is the Sunday playground for all the city's vacationers. As a matter of fact, Long Beach is the longest stretch of sand in the world, but most of it is covered by dunes, and I have never seen it. I have even seen it. I have seen it.

October 1 is the beginning of the bicycle season there, and in the summer you can walk anywhere and not hear a bicycle. In the winter, you can walk anywhere and not hear anything.
