Mobile & cloud

Internet of things

Embedded mobile

Human machine interface

Innovative ICT Solutions~

~ Information Communication & Technology

### **Vision Statement:**

Everyone directly or indirectly connected with us.

### **Mission Statement:**

To deliver best quality innovative customized ICT solution, swiftly.

## **We believe**

Most profound technologies are those that disappear. They weave themselves into the fabric of everyday life until they are indistinguishable from it” — Mark Weiser, 1991

## **We are working in mentioned areas**

### **Mobile & cloud**

Now a day usage of mobile devices is not just a privilege of executives any more, employees across organization levels today are equipped with smart devices that fit into their pockets and have become an integral part of their lifestyle, encompassing both, their personal and professional lives.

We have proven expertise in this field of mobile based software development, example as mobile based order placement system, mobile device management, and mobile based field force reporting system.

For more in detail, kindly visit [www.nkconnect.com/mnc](http://www.nkconnect.com/mnc)

### **Internet of things**

Platform that helps you connect everyday things, called "internet of things". Monitoring & controlling from pc, tablet & Smartphone.

Businesses and consumers will be able to connect any object, start instant its management from anywhere.

We deliver cloud based most flexible, programmable, changeable, & affordable smart element solution.

Everyday things now become intelligent enough, to make your life more comfortable, & safe.

Every day you will find smart sensors, that recognize you and makes your life more as you want it to be.

For more in detail, kindly visit [www.nkconnect.com/iot](http://www.nkconnect.com/iot) & [www.nkconnect.com](http://www.nkconnect.com)

### **Embedded mobile**

Embedded mobile, making handset more intelligent by adding sensors, relays & switches

Embedded board connects with handset, via USB-cable or Bluetooth medium, and communicate with cloud, LAN or WAN.

It is emerging field; low-cost environment sensing unit, health-care unit, from anywhere, anytime, user can communicate with cloud.
