AT GROTHPLACES OF DICKENS

YOUTH, TIME OF ANOMALIES

Of England's Youth of the Century

In England, the period of adolescence is marked by a particular set of experiences, which shape the identity and values of the young people who pass through this phase of their lives. One of the main characteristics of this period is the sense of过渡ness, which is a feeling of being neither child nor adult. This period is often marked by a search for identity, as young people grapple with questions of who they are and what they want to be. This search for identity is often accompanied by a sense of rebellion against authority, as young people challenge the norms and values of their parents and society in general.

Dickens was a great admirer of the period of adolescence, as he saw it as a time of transition and change. In his novels, he often portrays young people who are struggling to find their place in the world, and who are often caught between the expectations of their parents and their own desires and ambitions. Dickens believed that this period of transition was a key time in the development of an individual, and that it was important for young people to be given the space and support to explore their identity and make their own choices.
