THE AGE OF CIVILIZATION

THE SKILLS IN STROGRAPHY

PERSONAL AND PICTURAL

A LITTLE ROMANCE

The care of cabbages, according to the
American farmer, is enormous. In their
growth they require plenty of water and
plenty of light. The soil must be rich and
decaying manure must be added. The
young plants must be protected from
unfavorable weather. The plants must
be transplanted and the right amount of
water must be given at the correct time.
