City Intelligence.

THE CREVASE.—From the most authentic infor-mation, we have been enabled to obtain, the opinion may be ventured that the compace at Seuve's will crohabity be completely closed within the next twen y-four hours. The damage to the piles occasioned

constant rush of the waist. The work as far as it has progressed, seems unissually firm and give strong hopes of durability.

We visited yesterday a considerable—stion of the rand of the Second Municipality which has been invaded by the torrent. The scene is presented if dranty enough. At the new Canal, beginning a time National House and extending all along the shell road for fully half a mile, the water lies inon broad elseet, varying in depth from six inches to two feet. In samp parts it pours like a militaream from the swamp across the road sots the Canal. On the thing and the free canal the friction of the torren has worn away the embadament in some places.
