CAPTAIN WAS CRAZY.

New and startling light on the La Bourgeoise disaster.

Captain D'Agan, a former telegraph operator, who is now on his way back from France, where he has been employed as a telegraph operator, has just arrived in Chicago. He claims to have discovered a new and startling light on the La Bourgeoise disaster. Captain D'Agan states that the explosion of the La Bourgeoise, which occurred in the harbor of New York, was caused by a spark from a telegraph line. He says that he has found a piece of the telegraph wire that was used at the time of the explosion, and that it contained a spark from the telegraph line. The spark was sufficient to cause the explosion, he claims. Captain D'Agan has been working on the matter for months, and he is convinced that his theory is correct.
