Carriage Brake.-A patent has recently been granted to Mr. D. D. M. De Puy, of New York, for an improvement in the construction of carriages, which has the advantage of being simple and secure in its operation, and being equally applicable to carriages of all kinds. The invention is claimed to be useful in connection with other improvements, and is said to be capable of being applied to the present carriage of any kind. The patentee has not yet given any information as to the extent of his claims, or whether his invention is intended for any particular purpose.

New Business.-A new business has been established in New York, under the name of "The Globe Company," which is engaged in the manufacture of glass and silver ware. The company is said to be well established, and is capable of supplying a large demand for these articles.

Editorial Correspondence. No. 8.

Dear Sir,-I am glad to hear that you have taken steps to establish a scientific and literary institution in your town, which is to be called the "Scientific American Society." I believe that such an institution is of the utmost importance, and that it will be of great benefit to the community. I have long been a subscriber to your excellent journal, and I am sure that your institution will do much to promote the progress of science and literature.

Yours truly,

Composition or Fusion.—The constant sign of the new process is the absence of any visible line or '/ /" when taking off the paper, the second conception of the future is the permanence of the impression. Neither of these individuals should be considered at the top, and the pen or brush must be held in such a position as to press in any direction with equal facility. Oblique writing is not to be permitted. It is best to make one or two lines of information of any variety, using the compass in the midst of the paper, since the ordinary round plan is too small for the space. Theorem 160.
