Those Timber Obstructions.

Under this heading the New York Journal of Comme (ee of the 15th, republishes the following from the Charleston Morans y.

Last year, during one of the periodical scarce, the State Maintry Board bought over \$50,000 worth of theber to but up the approaches to our harbor who never an attack was apprehended. The fright unbided, and the timber was either sold or nonered against another panic, we forget which. But the idea of putting down a chain of timber obstructions was much laughed at by some persips. It was said that from clad vessels—then outposed to be quite involved the sold of the sold posed to be quite involved the sold of the sold posed to be quite involved the sold of the sold of the city. The chotest at Charleston teaches us the true purpose and wake of these temporary lobstructions—whether of timber, ropes or dains, is humaterial. When piaced across the dainnel, within about radge of two or three forts, they error to datanifold show the heavy pounding from Forts Somier and Moultrie long enough to give the appears, could stand the heavy pounding from Forts Somier and Moultrie long enough to get clear of those obstractions, whe chisquality the forts somier and Moultrie long enough to get clear of those obstractions, whe chisquality can be readed to the countries of the forts of the south appropriate of the south proprietience—should not, be forgiver. The L-piciature and the Common Countries and great many public and private committees, have been puzzing themselves how to make the harbor prod against attack. The city has appropriated \$1,001,000 towards it, and the State talks about appropriating as much more. Montors and remaster all very well as additional, but the tothe moral of the Charleston fight be lost sight of: viz. that an effectual barroaste of the chance let the theory of the protection, as it is by far the cheapet, that can be devised. of Comme ce of the 15th, republishes the fol-
