User:Jemskids2/sandbox

Enterprise Banker is a payment system software solution used by a wide variety of global financial institutions produced by ACI Worldwide, Inc. Numerous different modules exist to provide comprehensive solutions to an array of banking functions. The most recent release of this online banking solution is 7.6.[1]

Enterprise Banker-Mobile

Enterprise Banker-Mobile is a mobile phone solution that uses existing interfaces and infrastructure to provide banking functionality using wireless handheld devices.[2]

Enterprise Banker-ACH

Enterprise Banker-ACH is a scalable system tool that provides Web-based ACH processing. The system provides users the ability to automatically create batches, create their own formats for data imports including NACHA, delimited, and fixed format files, and to export delimited and fixed format files for use in external applications.[3]

Enterprise Banker-Loans

Enterprise Banker-Loans is a loan solution that provides real-time loan balance and activity information and online payment and withdrawal capabilities to financial institutions' customers. The tool also offers an interface to back office loan processing systems.[4]

Enterprise Banker-Retail Customers

Enterprise Banker-Retail Customers offers a comprehensive online banking platform that is customizable and scalable for retail banking needs. Among the offerings are features dedicated to risk mitigation, a messaging tool that provides alerts, and real-time funds authorization and activities downloads.[5]

Enterprise Banker-Cash Concentration

Enterprise Banker-Cash Concentration is a corporate banking solution that provides Web-based ability to monitor cash disbursements and deposits for numerous locations at one central office.[6]
