

# Wikimedia Commons

*the free digital media library*

Wikimedia Commons is an online digital media library offering free-content media files. It is being improved and enriched continuously by users who upload their own files or files from free sources.

Its name comes from the word commons in the meaning of "shared, mutual good". Files shared on Commons are legally usable by anyone and for any purpose, notably by all Wikimedia projects such as Wikipedia.

Wikimedia Commons offers over a million media files of all types: photographs, drawings, diagrams, sounds, written and spoken texts, animations and videos.

All the documents available on Commons can be freely reused, copied and modified according to the conditions specified by their author, such as attribution or share-alike conditions.

## Statistics and links

Launched : September 2004

Number of files : ~1,1 million

Active participants : ~600

Adress : <http://commons.wikimedia.org>

Statistics of December 2006. Active : who has edited at least 5 times in the last month.

Wikimedia Press kit - Janvier 2007
