

Meeting report n° 5

Attendance

Name	Function
Tessa Aerts	Teamleader
Nathalie Andries	
Seppe Asma	
Vincent Peeters	
Joren Van Laethem	
Mathias Vanduffel	
Jeroen Belis	

Absent

Name	Reason
------	--------

Agenda

- Design
- Calculation gear ratio
- Matlab and simulink simulation

Elaboration

- Because there was still a lot of work for the upcoming deadline. Jeroen has provided extra help to calculate the gear ratio and Robin has contributed to the simulation with Matlab and Simulink.
- Eventually we met all deadlines: Gear ratio, process report and case simulink
- Jeroen keeps the wikipage up-to-date and Mathias writes weekly the meeting reports. This is what we agreed on the start of the project.
- We're going to use a car mirror for the confirmation of the solar panel on our solar car. This will ensure that we can adjust the solar panel just before the race in the right corner.

Assignment	Team members	Actual workload (h)/pp	Due date
Calculation of gears	Nathalie Andries Tessa Aerts Jeroen Belis	15	23/03
Matlab simulation	Mathias Vanduffel Victor Tamarit Del Horno	15	23/03

	Robin Wauters		
Design and process report	Joren Van Laethem Vincent Peeters Seppe Asma	15	23/03
Wikepage	Jeroen Belis	3	
Meeting reports	Mathias Vanduffel	3
