This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. ON THE ALPHABET.

The Roman character is found perfectly adequate to express all the sounds in the Malagasy language; and the English Alphabet has been adopted and applied to that purpose, by omitting C, Q. U. W. and X, and by altering the power of j into dz; C is expressed either by S. or K, Q by kio, U by io; W and X have no corresponding sounds in the language. All the consonants, except j, take the sound affixed to them in the English Alphabet: G is always hard, Y has exactly the same sound as I, but occurs only in the termination of words; it might always be expressed by the letter I, with wich it has been found requisite to conjoin it in the Alphabetical arrangement of the Dictionary.

The vowels a, e, i, o, and y are pronounced as in the French language, except that O takes the sound of the French, ou, or the English oo.

RULES FOR FINDING THE ROOTS.

Many words are obviously compound in their form, and can easily be traced to their respective component parts; and the changes they undergo in the composition of one word are satisfactorily accounted for; as, fiadiam-barotra, stipulation, from Ady, fighting, and varotra, selling.

Others are strictly roots, with a few prefixes and postfixes, to ascertain their verbal or nominal signification, as, ankalazaïty, being praised by him or them, fankalazana, praise, exaltation, from Laza. Others are used in their own proper form as roots, and cannot be traced to any simpler form whatever, as, Valy, answer, teny, words, Very, lost.

In some instances the primitive root appears to have become obsolete or altogether lost, while its derivatives remain in extensive use, as, Aka, Danaka, &c.

The Root generally consists of two or three syllables; in some cases of one only, and in some instances of four or more.

The Root may generally be known by its being destitute of all those prefixes and postfixes which will be seen in the paradigm, and by its admitting the formative particles *vou* or *tafa* immediately before it. For though many roots exist which do not admit either *vou* or *tafa*, yet those which do admit either of the above particles are almost always roots, voaharatsy and voafanjry are the only exceptions I find to this rule.

Where *vou* is prefixed to a root, that root is of the nature of a passive participle of an active verb; as, Voaratra va hianao? Are you hurt? Where *tafa* is prefixed to a root, that root is of the nature of a passive participle of either an active or neuter verb. as, Tafiditra an-trano va ny vahiny? Is the stranger gone into the house?

Digitized by Google

Tafa voak'o izy, He was taken out by me.

Tafa has the same signification as *Voa*, when prefixed to a root of an active verb; as, Voatsato'ko amy ny tany ny lefona, or Tafatsato'ko amy ny tany ny lefona: The spear is fixed in the earth by me.

Roots whose first radical is a vowel, do not reject their first radical letter in the formation of active verbs by the prefix *man*, as Ako, manako, to reecho evoka, manevoka, to steam, Iditra, maniditra, to take in, Ompa, manompa, to revile.

Roots whose first radical is. F, H, K, P, S, T, or V, reject their first radical after *mam* or *man*. Those whose first radical is F, P, V, form their transitive verbs by the prefix *mam*, and not by *man* or *mana*, as, Faho, mamaho, to mix, Petaka, mametaka, to stick, Vely, mamely, to smite. V is sometimes changed into b, as voatra, mamboatra, or manamboatra, to arrange.

Those whose first radical is H, K, S, T, Ts, form their transitive verbs by *man*, as Hitsy, manitsy, to straighten, Kambana, manambana, to unite, Sandratra, manandratra, to promote, tompo, manompo, to serve: and H is sometimes changed into G, as, Halatra, mangalatra, to steal.

Roots whose first radical is B, D, G, J, M, N, retain their first radical letter, as Banga, mambanga, Dikia, mandikia, to transgress, Gorona, mangorona, to knock, Jofo, manjofo, to strike, Marina, manamarina, to justify, Nara, manara, cold, except Mamabo, from the root Babo.

Those whose first radical is L, change L into D, as, La, manda, to refuse.

Those whose first radical is R insert d before the R, as, Ray, mandray, to receive.

Those whose first radical is Tr, change the T into D, as, Triatra, mandriatra, to tear, and sometimes reject the Tr, as Trotraka, manotraka, to fire.

Those whose first radical is Z, change Z into J, as, Zingia, manjingia, to draw water, Zotra, manjotra to cause to advance.

The first radical letter is not rejected before *mana*, as before *man*, as, Tsofa, manofa, manatsofa, to saw, Seho, maneho, manaseho, to show, Tanteraka, manantéraka, manatanteraka, to fulfil.

All verbs in *mam* followed by a Vowel have rejected their first radical letter, and their respective roots may be found by reference to the Alphabetical Index of roots at the end of the Dictionary.

The root of all verbs in *man* followed by a vowel, if not found under that vowel in the Dictionary, will be found in the same Index of roots.

Reduplicate words increase or diminish the signification of their roots, and often imply reiteration in the action; They must be sought under their simple or radical forms to which they are always allied in meaning, as, Adaladala, from Adala.
