

Soft Technology and ReNew Index—Issues 41 to 70

How this index works

Index entries are listed by issue number and page number, for example 23:10 refers to issue 23, page 10.

All index entries are hyperlinked, so if you click somewhere on the article or product you wish to view, your computer will automatically open the relevant page in your Adobe Acrobat Reader. Once you have finished with the relevant article, simply close that magazine issue or use Acrobat Reader's 'Back' button [<<] found in the toolbar to return to the index. Alternatively, you can use the bookmark list to navigate to any other issue or file on the CD ROM.

Other notes

The Products and Noel's Treasures from Trash column have been separated out as separate indexes at the end of the article index.

Bugs and errors

While the utmost care has been taken to ensure that all information on ReNewROM is accurate and properly linked, some errors may still occur. If you discover any faults in this index, please contact the ATA (Alternative Technology Association), PO Box 2001 Lygon St North, East Brunswick VIC 3057, Australia, ph:(03)9388 9311, fax:(03)9388 9322, email: ata@ata.org.au
