as released a report on "Organic Agriculture and Food es a transition to organic farming offers the best path to London's The Independent reports that farmers who organic agriculture are seeing yields increase as much as its from healthier top soil that allows plants to set deeper greater resilience in conditions of extreme drought. The 1 (OCA) reports the benefits to organic agriculture "were apital assets critical in promoting food security - natural,

social, human, physical, and financial. Multiple studies have shown that yields remain stable, and often rise after conversion to organic agriculture," an outcome that "challenges the popular myth that organic agriculture cannot increase agricultural prothetivitye'd Watener Offerentetes n'preserient pievelujonie making tidportante peritins contribution at frequency was produced by the contribution of the enhancedtyarcarding to the comparte by a adaption of morganic parting parting parties and best path development stretegies bility in Africa. London's The Independent reports that farmers who have already made the shift to organic agriculture are seeing yields increase as Downleads Grzenict Agriantius and Spost Specific in the Agrical of the Post of set deeper roots which, in turn, guarantees greater resilience in conditions of extreme drought. The Organid Corrections Assertiation & Otia Visiports the benefits to organic agriculture "were linked to enhancement of five capital assets critical in promoting food security - natural, social, fluffay, physical, and financial Multiple studies have 15 Mehewiz thet violdstremainistable ការបៅeeffet រដ្ឋាន្ធិក្រុម នៅមែនក្រុម resion to organic agriculture," an outcome that "challenges the popular myth that organic agriculture

is making important, positive contributions to farm incomes and rural economic activity. These benefits could be enhanced, according to the report, by adoption of more suipportate biomision and iseaewobn leasest rial or greation tool offering trainers, extension workers and farmers mainly in Africa a quick access to up-to-date Downloa and blogathy representative greation diseases to up-to-date safe effective and ecologically sound way.

The infarmation ny examples is specifically relevant for the african continent and its inhabitants, many examples and case studies are from Kenya or East African countries but rainy be useful for other tropical countries as well. The topics presented on infonet a like regning name by distracts the control of the c computers had only a weak signal on the Celtel network. However, since then, Vesel project member Souleymane Camara has managed to get the Internet connection working properly. BioVision brought a new version of their database, and explained its benefits. There seems to be much demand for organic crops and methods. When they realised the quantity and quality of the information, more people began coming to the Heering tipne or majors escope lear getables and fruits on goal of the Fast Airing to Grading. crap due parativas i and water menagement the ltural methods and inside it less t management and highest at an diasetintiens for purish as those weets it is a lightest and a second management and highest at an allowers. Phylindus disease away. Its database now complete, BioVision is pursuing is an awareness campaign. Radio may be useful in this regard, and in fact The Organic

Risk factors

- Female
- Over 40 years old
- Inadequate dietary intake of iodine
- · Residence in an endemic area
- Ingestion of large amounts of goiter-causing foods or drugs
- Family history of goiters
- Radiation exposure to the neck and chest area (only large doses such as those used in radiotherapy or those found in nuclear facilities and not those single exposures done when diagnosing a disease are considered significant)
