IBM

DB2 Information Management Software

Fast Start Services for DB2® Universal Database Data Warehouse Editions

Highlights

■ *Accelerate your business intelligence solution implementation*

■ *Leverage our experts to enhance the business intelligence skills of your team*

■ *Combine IBM® technology with expert consulting to give you a fast return on value from your software investment*

DB2 Universal Database Data Warehouse enterprise and standard editions combine the strength of the industry's leading data warehouse, DB2 Universal Database™, with essential IBM business intelligence infrastructure.

IBM leadership in business intelligence technology gives you an immediate advantage. IBM consultants have the deep technical knowledge to ensure your data warehouse solution is optimized for your environment and will transfer that knowledge to your personnel.

The following service offerings complement your IBM business intelligence infrastructure. They will help your organization implement highly scalable, multiterabyte, enterprise data warehouses that advance your business goals.

IBM Fast Start Services for DB2 Universal Database Data Warehouse Enterprise Edition

This service is designed to accelerate the implementation of DB2 Universal Database Data Warehouse Enterprise Edition. The installation, configuration, and connectivity setup of this comprehensive business intelligence platform are completed by a highly skilled IBM consultant. All implementations are tested to ensure full interoperability. Our consultant also provides technical advice on the best use of this business intelligence framework for data access, extract-transform-load (ETL), metadata management, multidimensional analysis, and data mining. Sample data is used to demonstrate some of the functionality including the new online analytical processing (OLAP) capabilities of DB2 Cube Views.

These activities are completed together with your administration staff, support staff, and business analysts to transfer skills and get you up and running quickly.

This engagement ensures successful installation and configuration of the following components of DB2 Universal Database Data Warehouse Enterprise Edition :

- *DB2 Universal Database Enterprise Server Edition with DB2 Database Partitioning Feature*
- *DB2 Query Patroller*
- *DB2 Warehouse Manager Standard Edition*
- *DB2 Cube Views*
- *DB2 Office Connect Enterprise Web Edition*
- *DB2 Intelligent Miner™ Modeling, Visualization, and Scoring*
- *Native drivers (from DB2 Information Integrator™) for 3rd party databases for use with DB2 Warehouse Manager Standard Edition*

IBM Fast Start Services for DB2 Universal Database Data Warehouse Standard Edition
This service is designed to install the core framework of DB2 Universal Database Data Warehouse Standard Edition. Our highly skilled IBM consultant performs installation, configuration, connectivity setup, and testing of this business intelligence platform. All implementations are tested to ensure full interoperability. Our consultant also provides technical advice on the best use of this business intelligence framework for data warehousing, multidimensional analysis, and data mining. Sample data

is used to demonstrate some of the functionality of this package.

These activities are completed together with your administration staff, support staff, and business analysts in order to transfer skills and to get you up and running quickly.

This engagement ensures successful installation and configuration of the following components of DB2 Universal Database Data Warehouse Standard Edition:

- *DB2 Universal Database Workgroup Server Unlimited Edition*
- *DB2 Cube Views*
- *DB2 Office Connect Professional Web Edition*
