# Control and Enforcement

Graham Hadingham  
IBM ECM Product Marketing (EMEA)  
Compliance Technologies

Information Management software

## Control and Enforcement Topics

Why Organizations Lose Control of Enterprise Content

Regaining Control of Enterprise Content

- Compliance Critical Success Factors
  - Records Management
  - Multi-Channel Content (Email) Archiving
  - Classification
  - Electronic Discovery
  - Governance, Risk and Compliance
- A Single Platform for Enterprise Compliance

# Major Control & Enforcement Pressures ... Right Now

*Am I compliant today?  
How do I stay compliant?*

- Cost and Risk of Litigation
- New Rules of Civil Procedure

- User Controlled Email and Docs
- Storage Infrastructure Costs

*How can I prove it?*

- Cost of SOX Compliance is High
- Point Solutions are Too Costly
- No Visibility into Operations

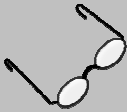

*How can I afford it?*

- Physical Storage Costs
- Inability to Produce All Records

*What's next?*

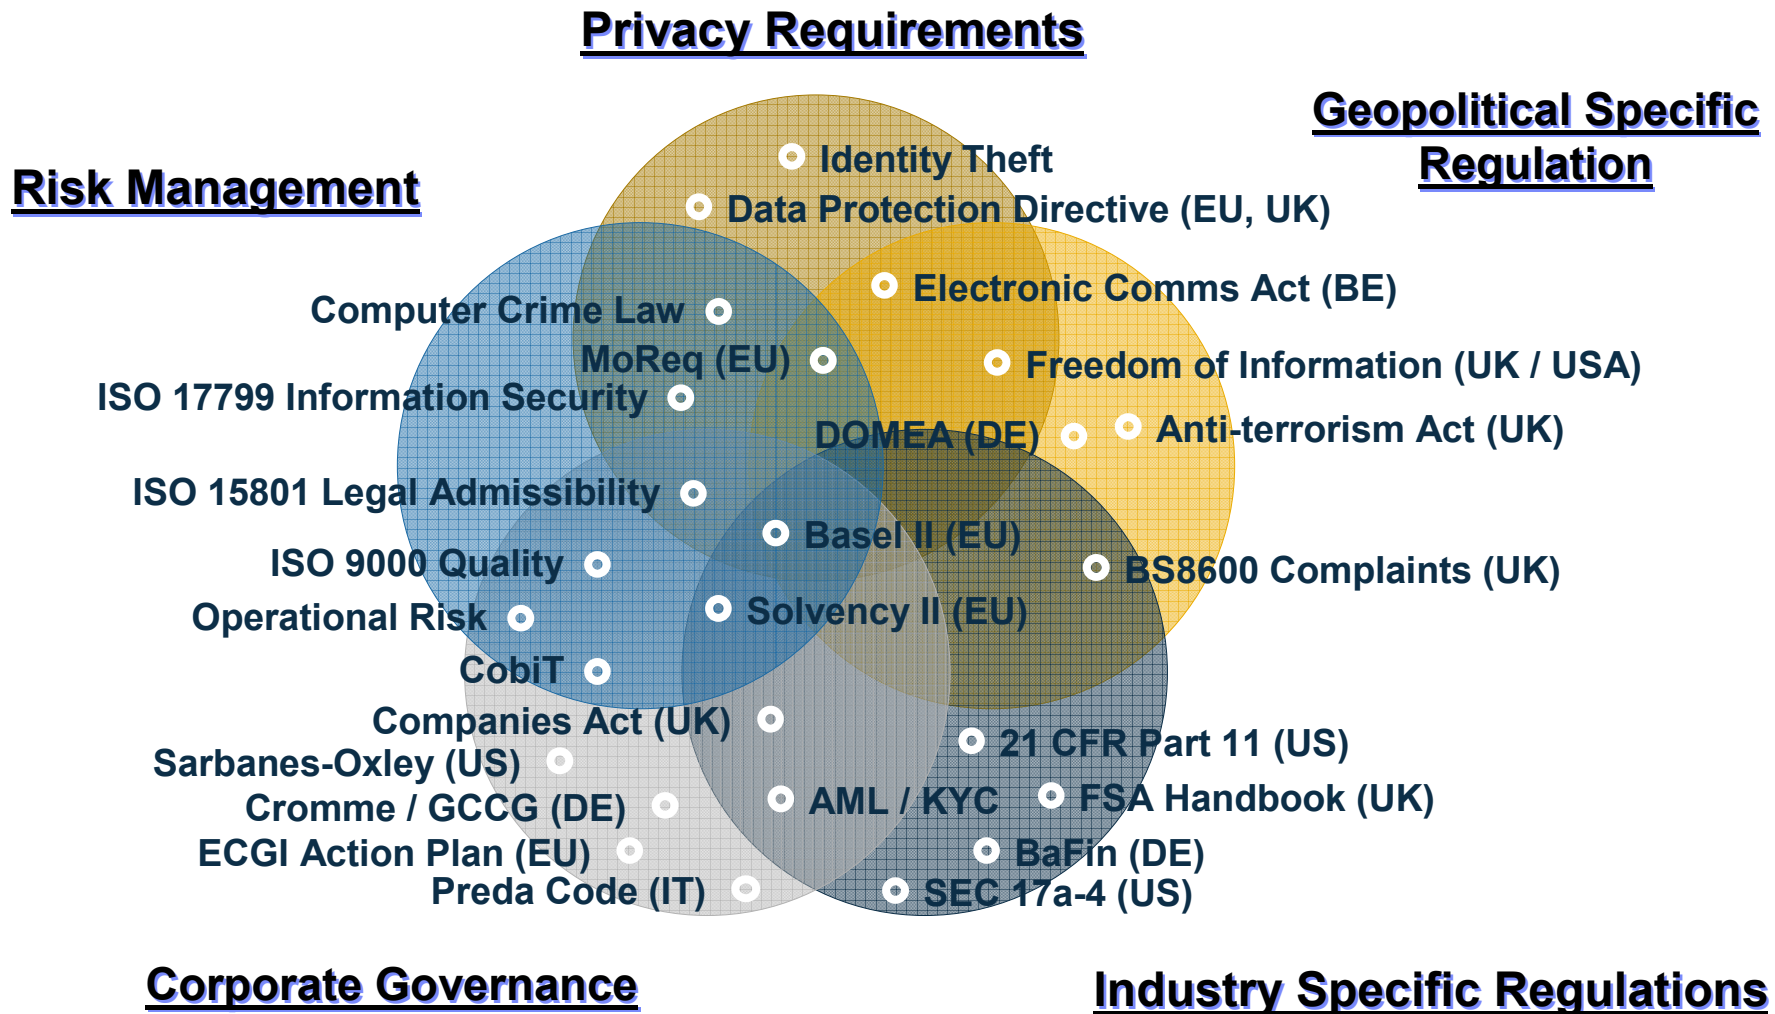

# Why ECM is Core to Addressing Control & Enforcement

Key ECM Compliance Elements			
Records Management 	Multi-Channel Content Archiving ... and More 	Electronic Discovery 	Governance, Risk and Compliance 
<ul style="list-style-type: none"> <li>Manage electronic records across the enterprise with ECM</li> <li>Manage electronic and advanced physical records together</li> <li>Integrate Records Management into non-ECM environments</li> <li>Eliminate the costs and risks of managing paper records</li> </ul>	<ul style="list-style-type: none"> <li>Archive content and email for mailbox and storage management</li> <li>Manage email as a record and ensure compliance</li> <li>Manage email as content ... extract buried knowledge and data</li> <li>Manage email as part of a business process</li> <li>Gain control of unmanaged content</li> </ul>	<ul style="list-style-type: none"> <li>Clean up the digital landfill and build a content inventory</li> <li>Enable content collection, preservation and legal holds</li> <li>Improve discovery review process, reduce costs</li> <li>Automate and audit legal discovery processes</li> </ul>	<ul style="list-style-type: none"> <li><b>Achieve</b> compliance with operational policies, processes and controls in place</li> <li><b>Sustain</b> compliance cost effectively with automated processes and active controls and risk management</li> <li><b>Prove</b> compliance by producing evidence and records of adherence to policy and processes</li> <li>Expose via SOA to IT infrastructure</li> </ul>

# Key Business Driver | Overlapping Compliance Drivers

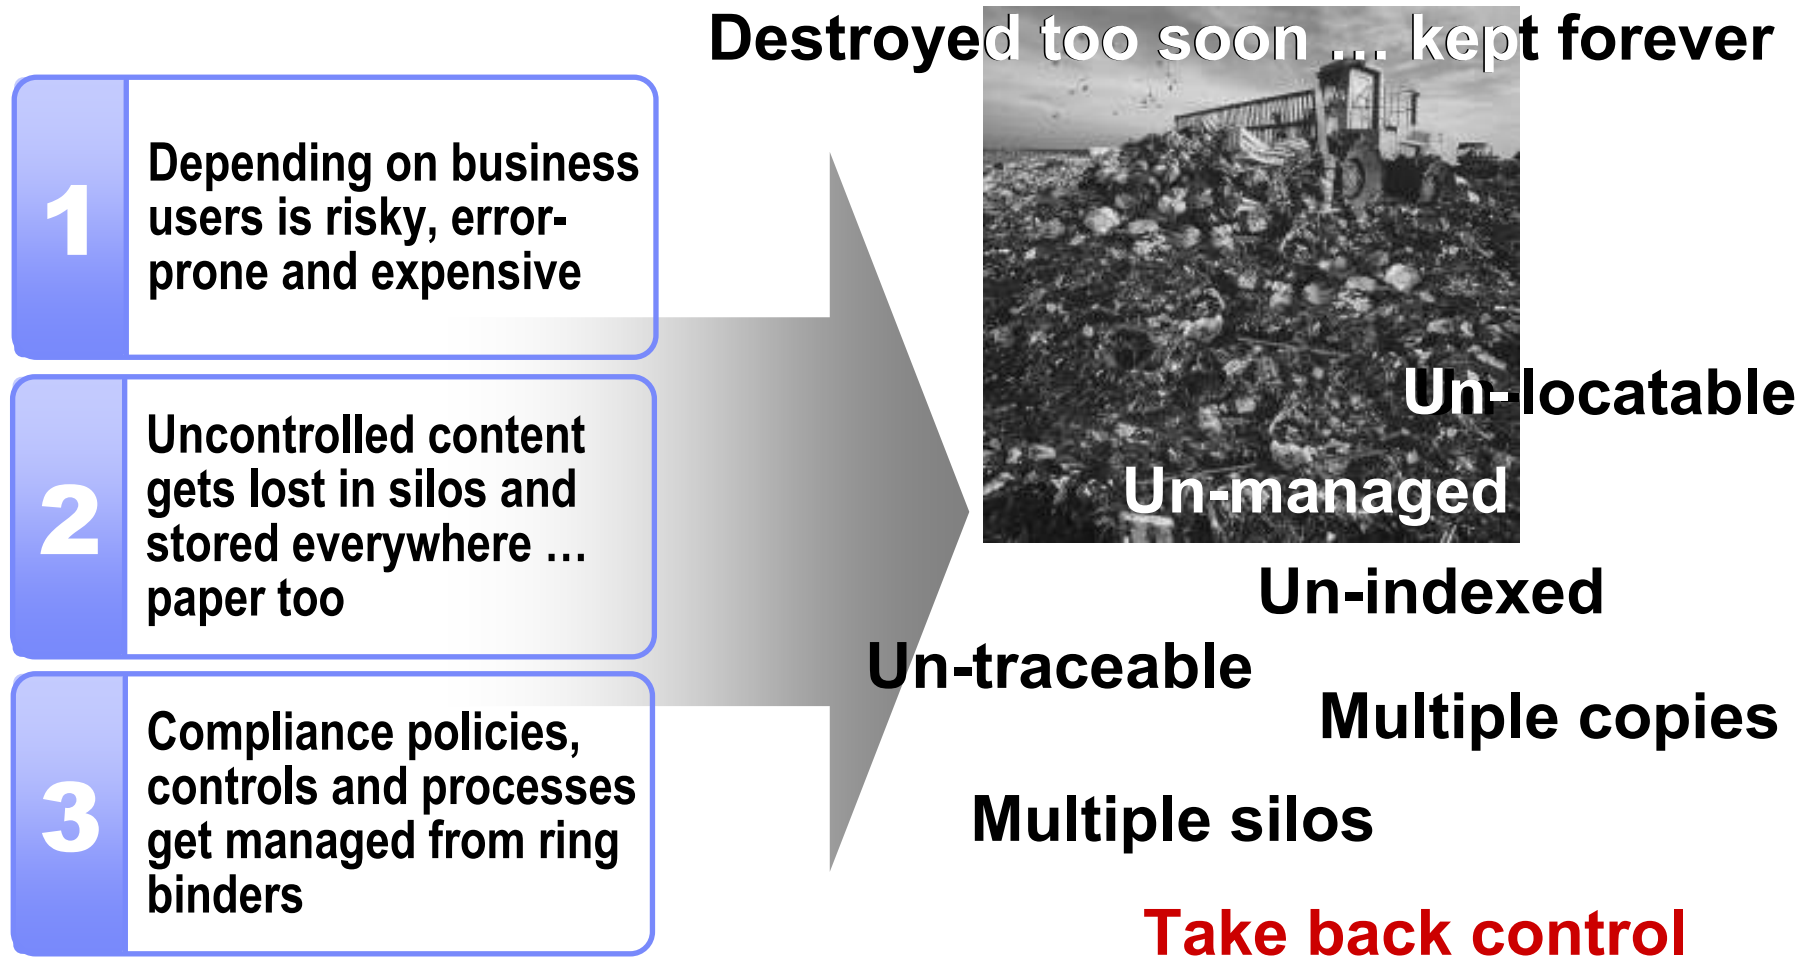

# Multiple Regulations Lead to Multiple Problems

- 1** Depending on business users is risky, error-prone and expensive
- 2** Uncontrolled content gets lost in silos and stored everywhere ... paper too
- 3** Compliance policies, controls and processes get managed from ring binders

## Multiple Problems Lead to **Waste**, Darkness and Cost

**Email, documents, images ... paper too**

## Multiple Problems Lead to Waste, **Darkness** and Cost

**Take off the blindfold ... gain content intelligence**

**1**

Depending on business users is risky, error-prone and expensive

**2**

Uncontrolled content gets lost in silos stored everywhere paper too

**3**

Compliance policies, controls and processes get managed from ring binders

**No true visibility into ...**

- operations
- risks
- legal exposure

**Connect your policies, controls and records to your processes**

## Multiple Problems Lead to Waste, Darkness and **Cost**

1

Depending on business users is risky, error-prone and expensive

2

Uncontrolled content gets lost in silos stored everywhere paper too

3

Compliance policies, controls and processes get managed from ring binders

**Point solutions are too costly**

**Manual control testing, risk assessments and record keeping should be a memory, **not a strategy****

# How Leading Organizations Respond

## 1. Achieve Compliance (*Present*)

Have the proper operational policies, processes and controls in over content and processes

## 2. Sustain Compliance (*Future*)

Ensure that every time you perform a process you will comply with your policy and stay within the law ... cost effectively

## 3. Prove Compliance (*Past*)

Be able to produce evidence (content) and proof that you have been compliant with policies and processes in effect the past

## Manage Both Content and Processes

### 1. Achieve Compliance (*Present*)

Have the proper operational policies, processes and controls in over content and processes

### 2. Sustain Compliance (*Future*)

Ensure that every time you perform a process you will comply with your policy and stay within the law ... cost effectively

### 3. Prove Compliance (*Past*)

Be able to produce evidence (content) and proof that you have been compliant with policies and processes in effect the past

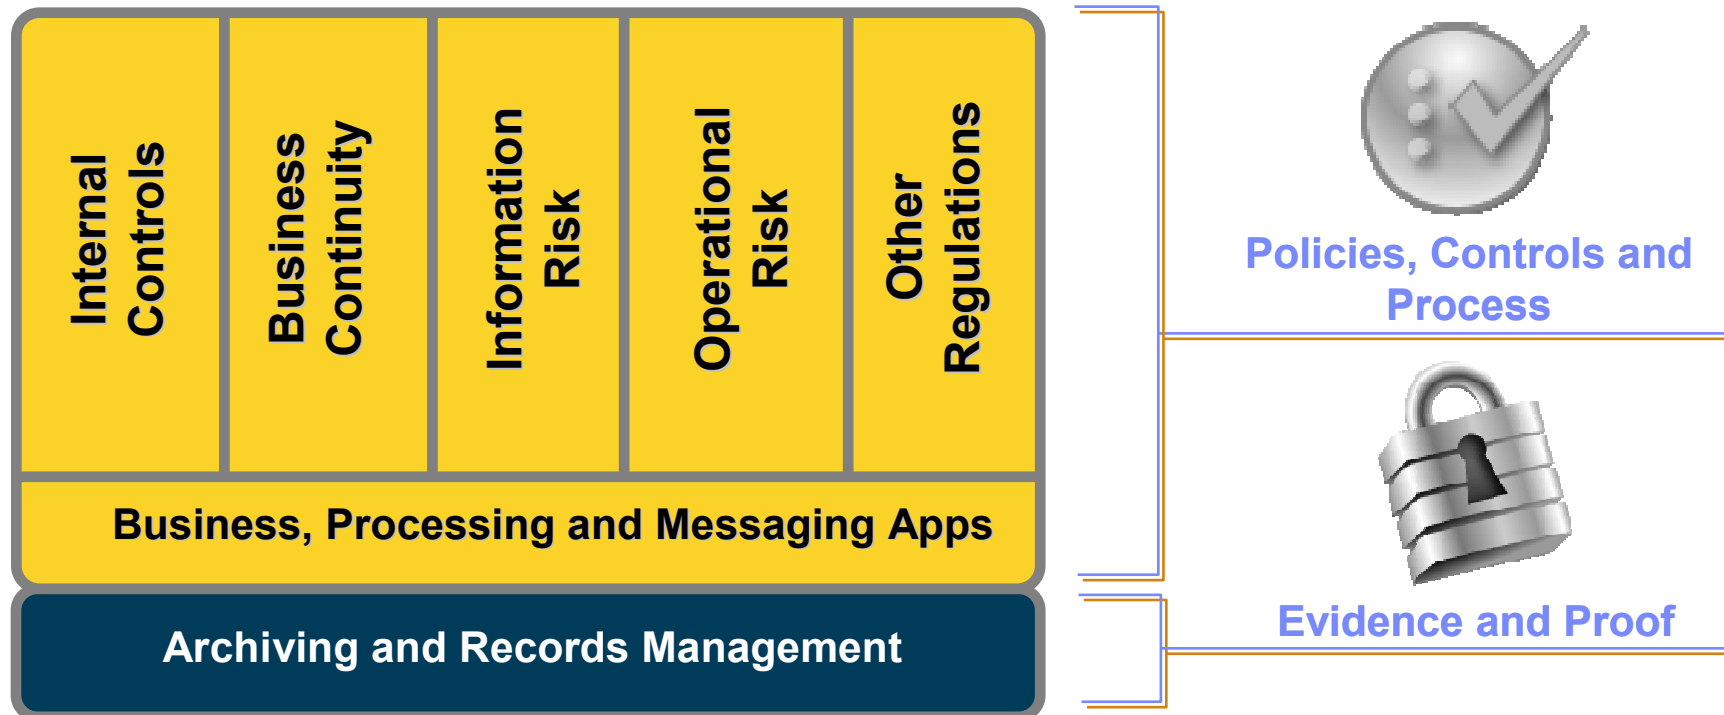

**Policies, Controls and Process**

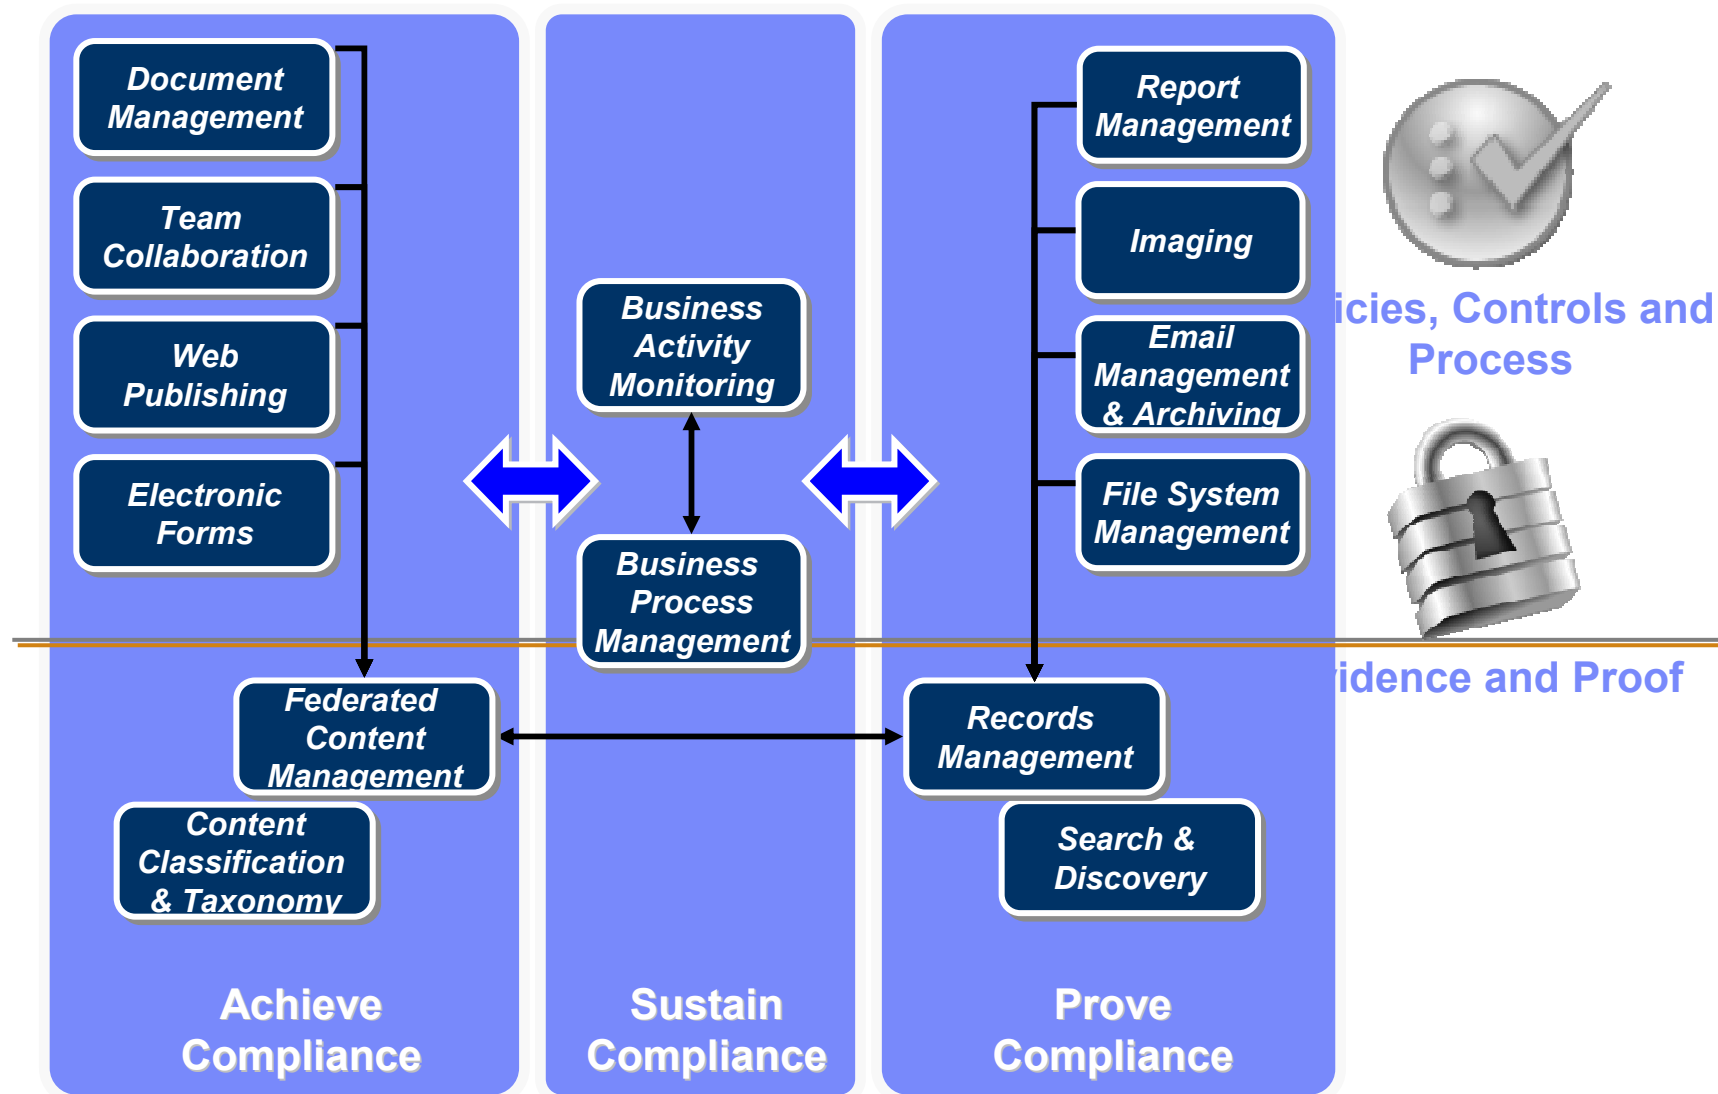

**Evidence and Proof**

## Essential to Enterprise Compliance ... Two Key Ingredients

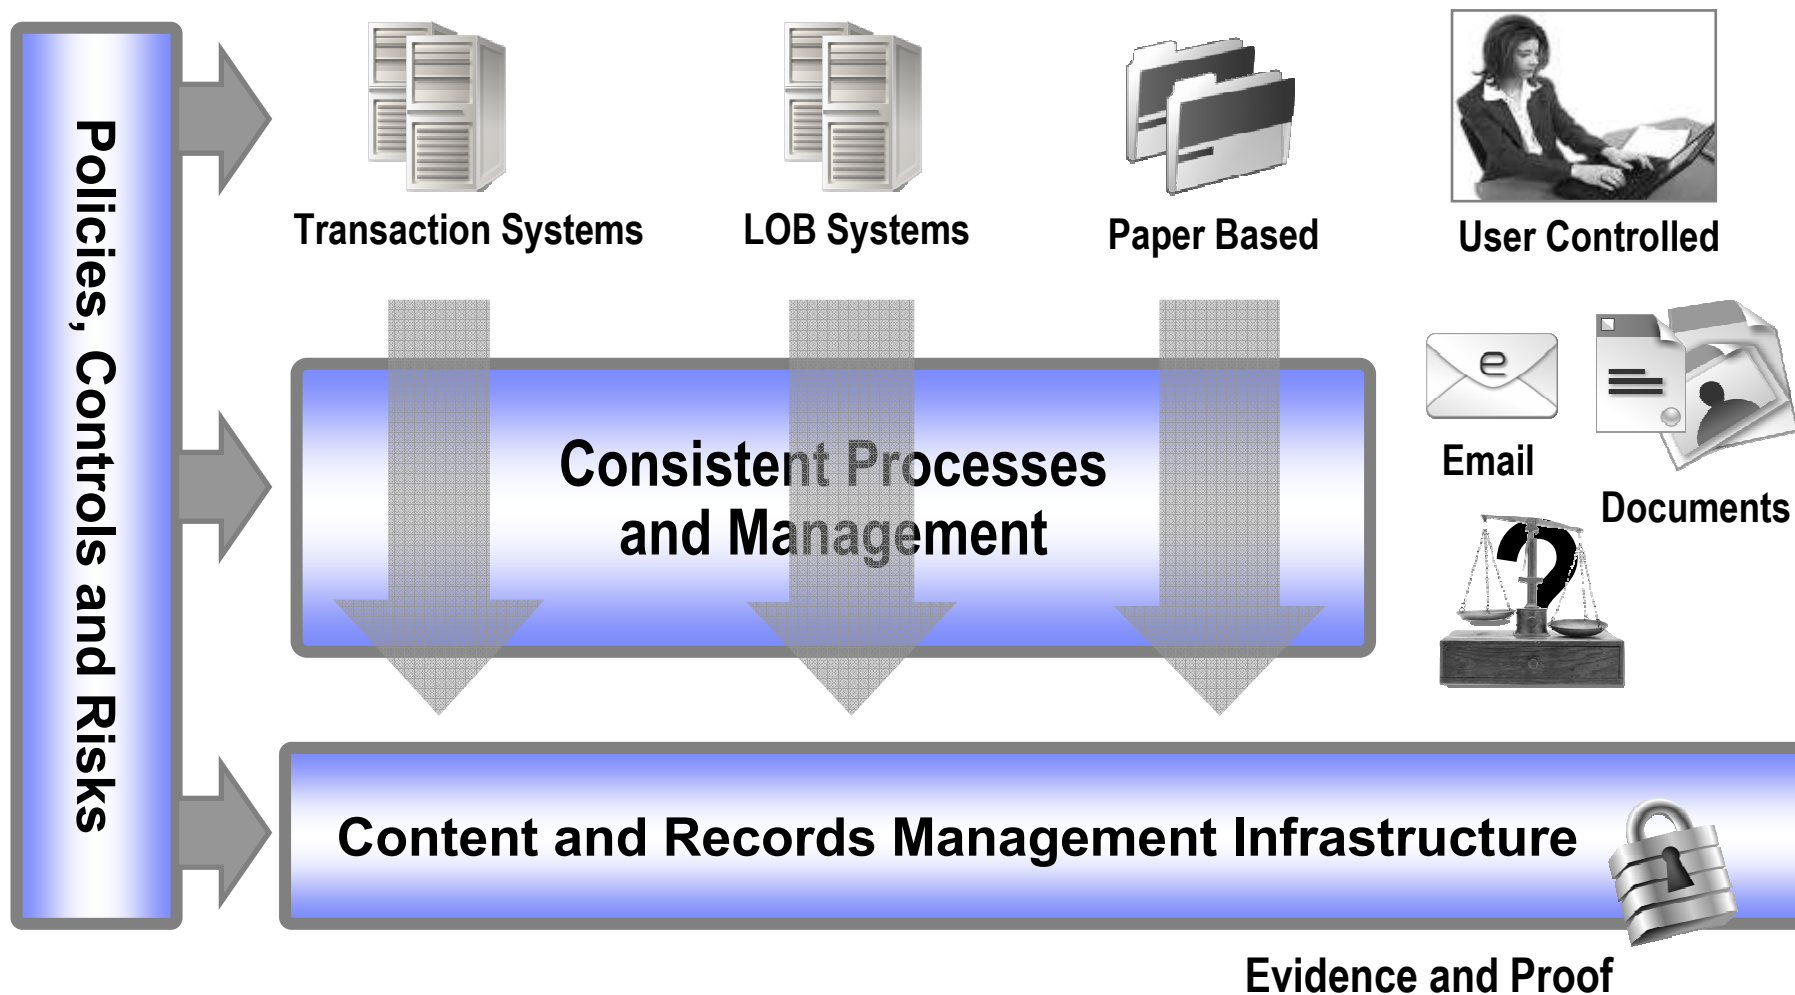

- **Business, Processing and Messaging Applications**—helps ensure that the right controls are in place to behave in a legally compliant manner
- **Archiving and Records Management**—helps ensure that you collect and preserve the right evidence to prove your behavior was compliant

# Building an Enterprise Compliance Platform

# Key Business Driver | Sources of ECM Compliance Risk

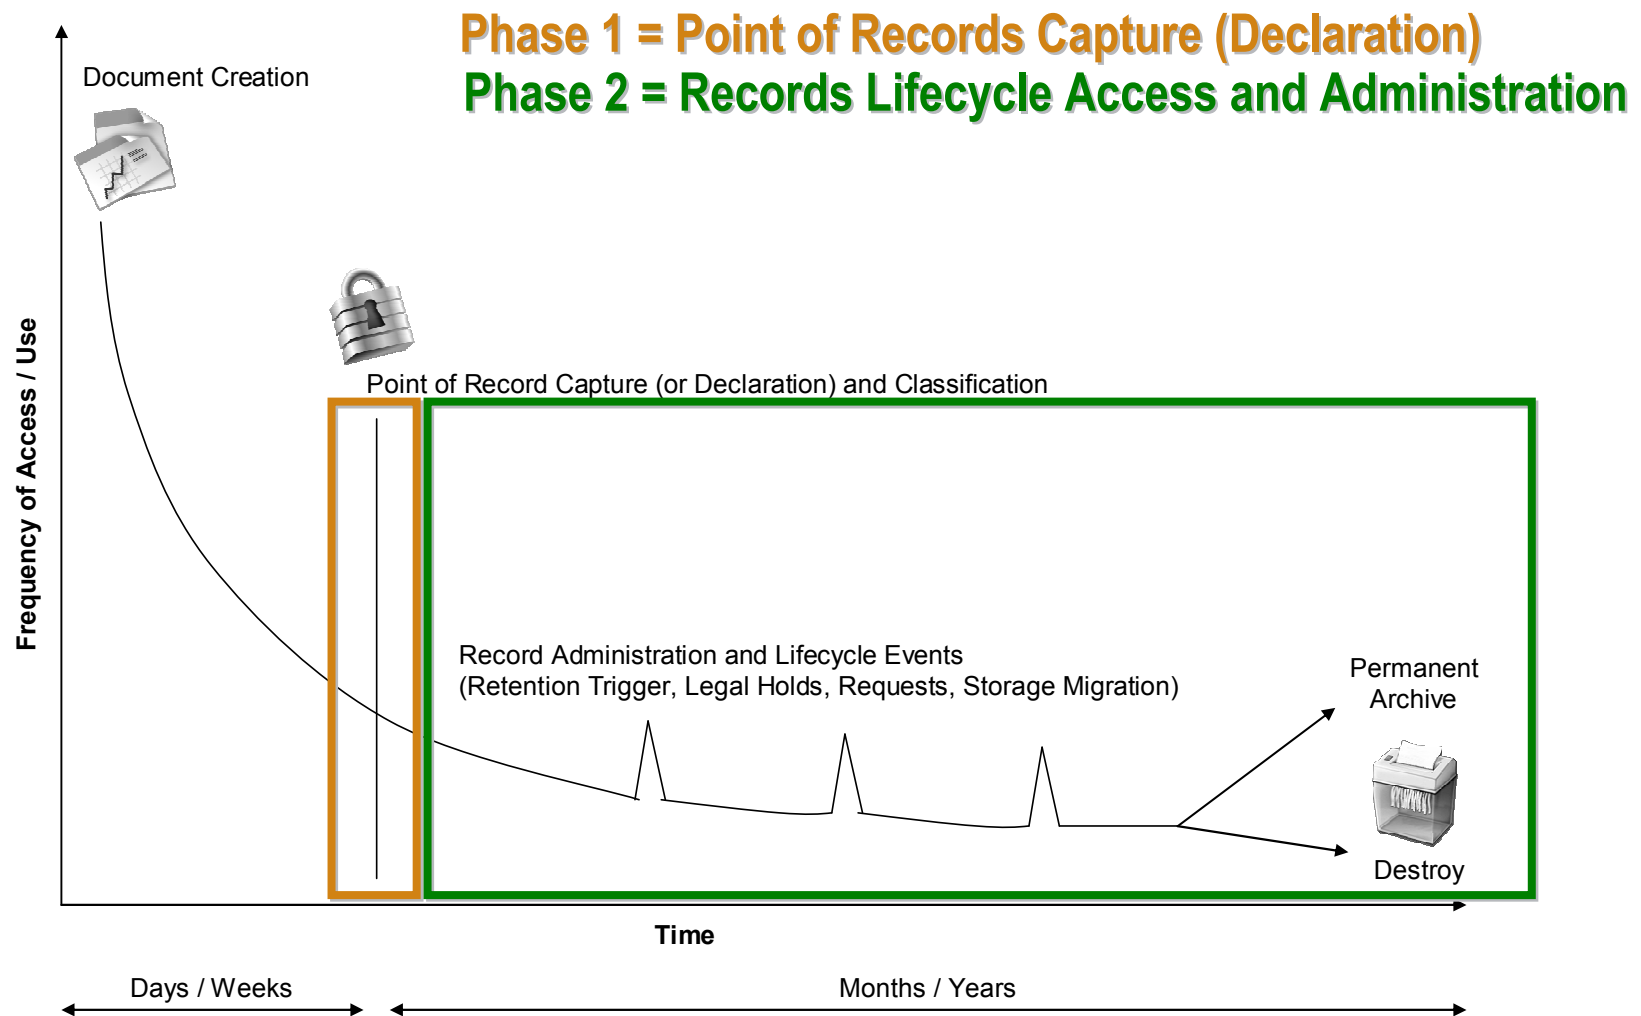

## Control & Enforcement Topics

- Why Organizations Lose Control of Enterprise Content
- Regaining Control of Enterprise Content

### Compliance Critical Success Factors

- Records Management
  - Multi-Channel Content (Email) Archiving
  - Classification
  - Electronic Discovery
  - Governance, Risk and Compliance
- A Single Platform for Enterprise Compliance

# Records Lifecycle Model (RLM) Overview

# Enterprise Records Management

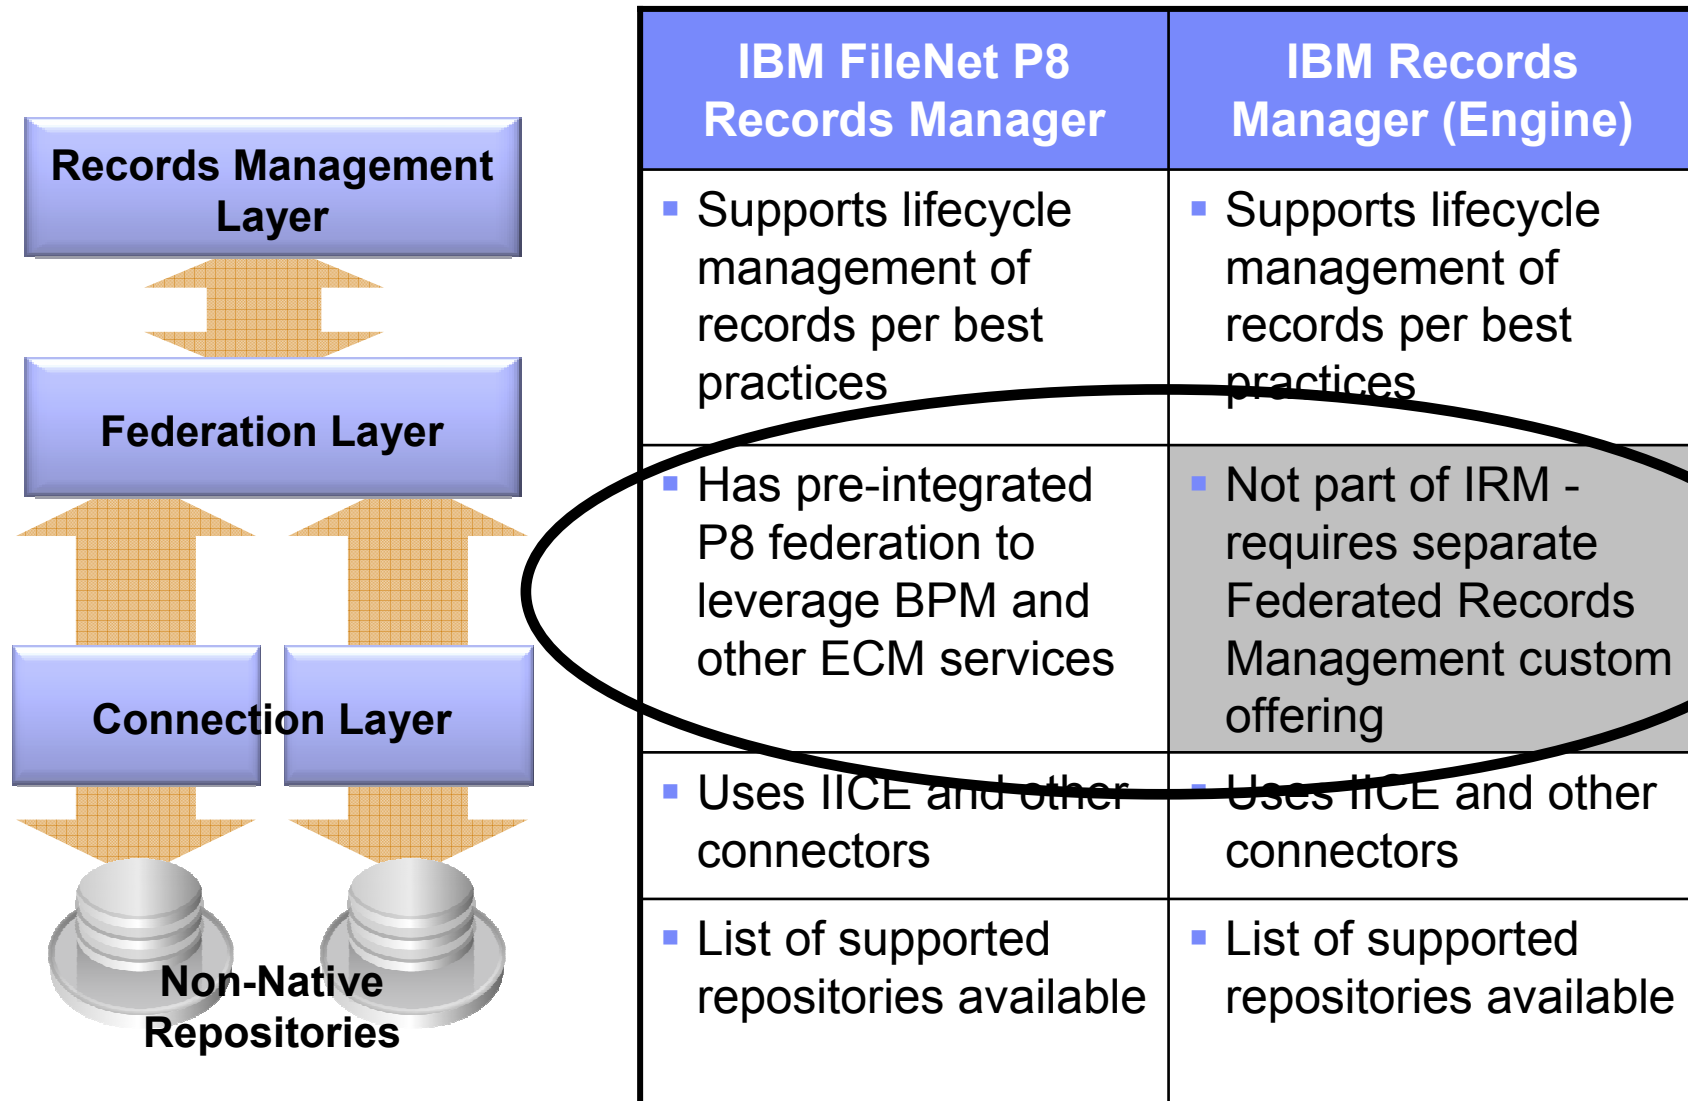

Key Business Drivers			
Manage Electronic Records Across the Enterprise with ECM <b>1</b>	Manage Electronic and Advanced Physical Records Together <b>2</b>	Integrate Records Management into non ECM Environments <b>3</b>	Eliminate the Costs and Risks of Managing Paper Records <b>4</b>
<p>To ensure electronic information is captured and managed in accordance with records policies.</p> <ul style="list-style-type: none"> <li>▪ Automate RLM Records Capture with <i>ZeroClick</i></li> <li>▪ Automate RLM Records Admin Processes</li> <li>▪ Manage Records in Place when Necessary</li> <li>▪ Comply with Key Regulations / Standards</li> <li>▪ Support Compliance and Electronic Discovery</li> </ul>	<p>To manage all scenarios involving physical records with same rigor and processes as electronic records.</p> <ul style="list-style-type: none"> <li>▪ Support Corporate Requirements such as Library Services, Locations, Files, Boxes and Bar Coding</li> <li>▪ Support Advanced Records Center Management</li> <li>▪ Space Management and Chargeback</li> </ul>	<p>To enable records management policies to be available to non-ECM systems and environments.</p> <ul style="list-style-type: none"> <li>▪ Deliver or Integrate RLM Events and Services to Other Systems and Environments</li> <li>▪ Custom Federate or Embed Records Management into Non ECM Environments</li> </ul>	<p>To eliminate the risks and costs of physical records storage.</p> <ul style="list-style-type: none"> <li>▪ Ensure Timely Records Destruction</li> <li>▪ Eliminate Paper Handling Risks and Costs</li> <li>▪ Enable Reliable and Timely Access to Records</li> <li>▪ Enable Better Visibility and Cost Reduction from Operations</li> <li>▪ Prevent Born Digital Records From Being Printed and Stored</li> </ul>

## Records Management History

- Both technologies were acquired by IBM
- Both products are rated very highly by analysts
  - 3 AIIM Best-of-Show Awards collectively
- Both products have similar features and functions
  - Both US DoD 5015.2 certified through 2008 (150+ common requirements)
  - Both leverage IBM IICE connectors
- Each product has a fundamentally different architecture
  - IBM Records Manager (IRM) is an engine, optimized for embedding
    - Has custom federation model
  - IBM FileNet P8 Records Manager is part of an ECM platform leveraging a common object model and integrated BPM
    - Has both custom and productized federation models

## Each Product Handles Federation Differently

## Records Management Strategy

- Converge offerings into a common set of ECM services with productized federation offering
- Convergence timing is still subject to planning

## Records Management Strategy

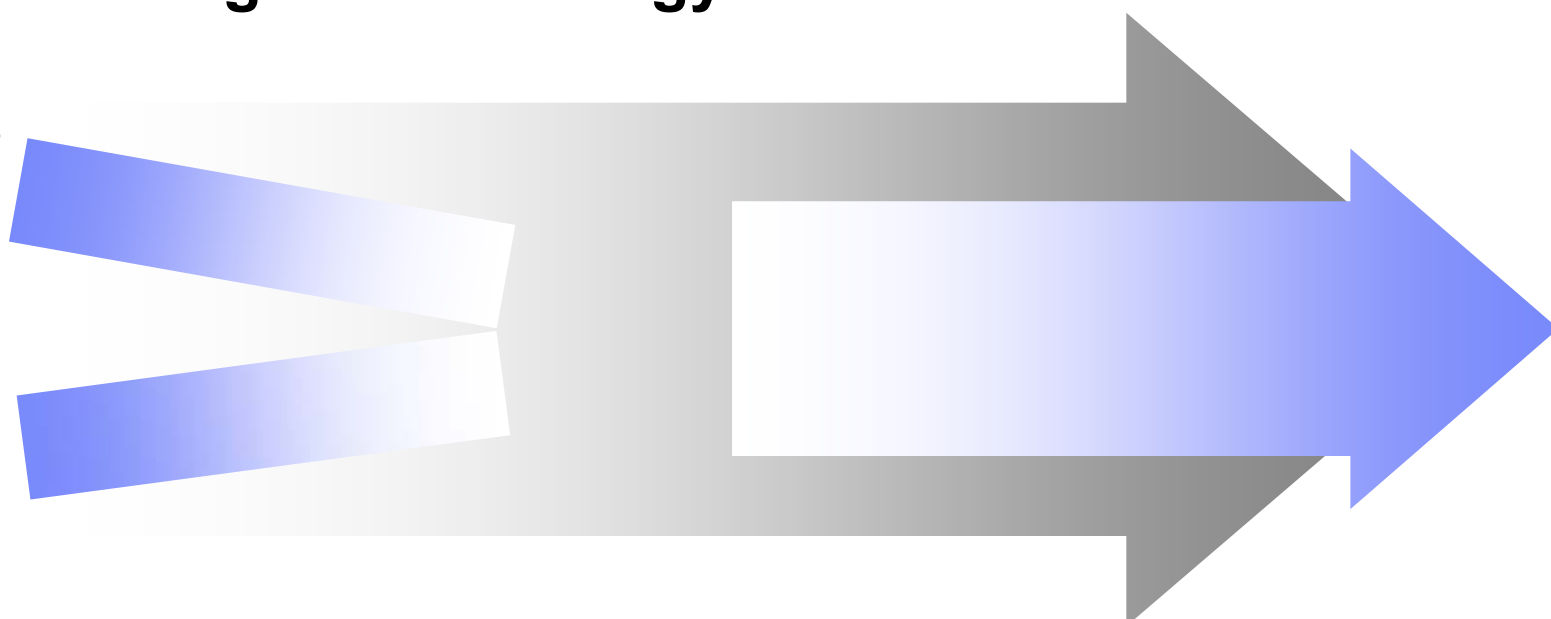

- Converge offerings into a common set of ECM services with productized federation offering
- Convergence timing is still subject to planning
- Leverage existing P8 CFS and BPM products as part of strategy

## Records Management Strategy

IBM Records  
Manager  
(Engine)

IBM FileNet  
P8 Records  
Manager

- 
- Converge offerings into a common set of ECM services with productized federation offering
  - Convergence timing is still subject to planning
  - Leverage existing P8 CFS and BPM products as part of strategy
  - Capitalize on process centricity of evolving standards - maintain certifications for US DoD 5015.2, achieve MoReq2 and DOMEA 2

## Process Driven RM Meets New Legal Hold Requirements

- Enforce RM policies to individual line-of-business processes and tasks
- Complete audit trail record of all content and process activities
- “Real-time” view and status of everything ... including physical records and legal hold status

The screenshot shows the 'Process Tracker' application. The top part displays a 'Workflow (Main Map)' with various steps like 'Launch Step', 'Retrieve Customer Profile (C)', 'Customer Policy Lookup (R)', 'Robot-Doc Generator', 'Wait for Return Docs', 'Setup Approval Docs', 'Verify Docs', 'Host Update', and 'Approve Order'. The bottom part shows a detailed table of process activities.

# Why Do We Still Keep All That Paper?

## Hypothesis

- *How do the new economics of Compliance combined with technology advances enable transformation of physical records storage?*
- *Does this same dynamic also enable new methods of business intelligence?*

## Finding Out Why

### Hypothesis

- *How do the new economics of Compliance combined with technology advances enable transformation of physical records storage?*
- *Does this same dynamic also enable new methods of business intelligence?*

### Validation

- IBM analysts and Large Commercial Bank customer
- Evaluated costs, risks and processes associated with handling of paper
- It now makes sense to stop the flow of paper into warehouses and start the flow into imaging based electronic records management systems

## The Results (see [www.ibm.com/software/ecm](http://www.ibm.com/software/ecm) for details)

### Hypothesis

- *How do the new economics of Compliance combined with technology advances enable transformation of physical records storage?*
- *Does this same dynamic also enable new methods of business intelligence?*

### Validation

- IBM analysts and Large Commercial Bank customer
- Evaluated costs, risks and processes associated with handling of paper
- It now makes sense to stop the flow of paper into warehouses and start the flow into imaging based electronic records management systems

### Compelling Results

- Major cost savings and ROI findings
- Significant opportunity to mitigate legal and compliance risk
- New visibility and enforced controls into key business processes
- New ways to analyze operational data
- **Unique solution enabled by integrated imaging, records and process**

# Records Management Products Roadmap

Product	2007 Plans	2008 Plans
<b>IBM P8 Records Manager</b>  ★ DoD Certified through Q3 2008	<b>Version 4.0</b> Q2 2007 <ul style="list-style-type: none"> <li>Compatibility with 4.0 platform</li> </ul>	<b>Igloo</b> Q4 2008 <ul style="list-style-type: none"> <li>Support for DoD 5015.2 version 3</li> <li>Other Capabilities TBA</li> </ul>
<b>IBM P8 Federated Records Management (CFS)</b>	<b>Content Federation Services Support</b> Q4 2007 <ul style="list-style-type: none"> <li>Support for CM8</li> <li>Support for Content Services</li> </ul>	<b>Content Federation Services Support</b> Q2 2008 <ul style="list-style-type: none"> <li>Support for CMOD</li> </ul>

<p><b>Theme</b></p> <ul style="list-style-type: none"> <li>▪ Records Manager to be compatible with P8 Platform 4.0</li> </ul>
<p><b>Key Capabilities</b></p> <ul style="list-style-type: none"> <li>▪ Synchronization release between Records Manager and P8 4.0</li> </ul>

# Archiving and Managing Email

Key Business Drivers			
Archive Email for Mailbox and Storage Space Management <span style="float: right;">1</span>	Manage Email as a Record and Ensure Compliance <span style="float: right;">2</span>	Manage Email as Content ... Extract Knowledge and Data Buried in Email <span style="float: right;">3</span>	Manage Email as Part of a Business Process <span style="float: right;">4</span>
<p>To reduce operational problems introduced by the growing size of email data stores.</p> <ul style="list-style-type: none"> <li>▪ <b>Manage mailboxes</b></li> <li>▪ <b>Increased Server Performance</b></li> <li>▪ <b>Faster Backup and Restore</b></li> <li>▪ <b>Easier Server Upgrades and Consolidation</b></li> <li>▪ <b>Utilize Right Storage Technology (HSM)</b></li> <li>▪ <b>Apply Simple Retention</b></li> </ul>	<p>To comply with regulations, produce email records when required, enable good corporate governance and facilitate electronic discovery</p> <ul style="list-style-type: none"> <li>▪ <b>Enable Records Management</b></li> <li>▪ <b>Perform Legal Discovery</b></li> <li>▪ <b>Supervise and Monitor for Non-Compliance</b></li> </ul>	<p>To manage, mine, extract, organize and analyze knowledge, content and data buried in email</p> <ul style="list-style-type: none"> <li>▪ <b>Manage Email as a Content Type</b></li> <li>▪ <b>Automate or Suggest Message Classification</b></li> <li>▪ <b>Use Content Analytics to Identify Trends, Risks, Analyze Data</b></li> <li>▪ <b>Additional Tagging and Meta Data Creation</b></li> <li>▪ <b>Response Suggestion or Routing of Email</b></li> </ul>	<p>To accelerate and automate business processes where email participates in the workflow or is part of the active case</p> <ul style="list-style-type: none"> <li>▪ <b>Automate Workflow steps</b></li> <li>▪ <b>Associate Email Content to Processes, Cases and LOB Systems</b></li> </ul>

## Email Archiving History

- Both products have very similar archive features and provide mailbox management
- Both products have subtle differences for email management
  - **Commonstore** - Email Search (eMS) offering on CMv8, Tivoli Storage Manager integration, strong Lotus Domino support
  - **P8 Email Manager** - Novell GroupWise support, Microsoft SQL support, Business Process Manager (BPM) integration, strong Microsoft Exchange support
- Both products, while similar, were marketed differently
  - IBM focused on mailbox management and archiving
  - FileNet focused on email management and records management and business process management

## Email Archive / Management Strategy Overview

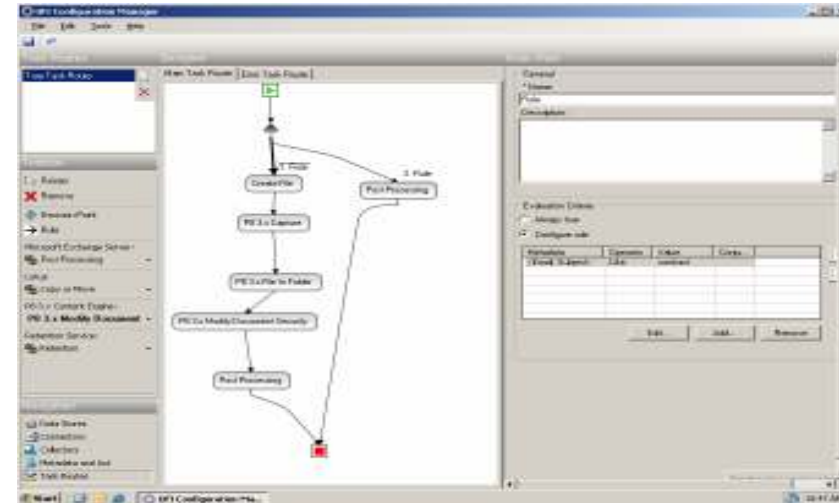

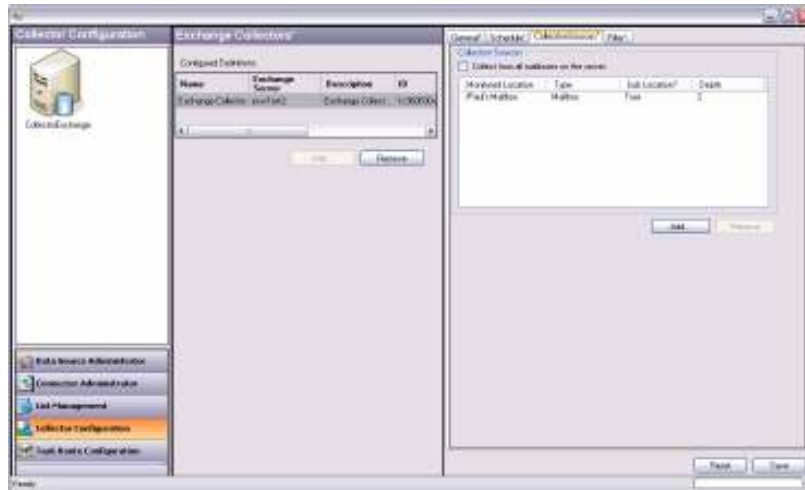

- **Choice of solutions** based on architecture, repository and usage needs
  - CommonStore (with CMv8 as repository)
  - P8 Email Manager (with P8 as repository)
- It doesn't matter whether investment is in CommonStore or P8 Email Manager
- **Unify code bases** into Next Generation modular architecture, to be delivered in Symphony Intelligent Archive release Q3 2008
  - Repository agnostic
  - Content source agnostic
  - Content type agnostic - more than just email
- Deliver Symphony Intelligent Archive advanced technology as upgrade
  - No data / stub migration or reindexing
  - No business user disruption
  - Improve usability and deployability
  - Provide better Lotus Domino experience while continuing support for Exchange and GroupWise

# Email Archive / Management Products Roadmap

Product	2007 Plans	2008 Plans
<p><b>IBM CommonStore</b></p> <ul style="list-style-type: none"> <li>▪ Lotus Domino</li> <li>▪ Microsoft Exchange</li> <li>▪ CMv8 repository</li> </ul> <p>Note: CommonStore SAP now part of Platform portfolio</p>	<p><b>Acton Release (CommonStore 8.4)</b> Q4 2007</p> <ul style="list-style-type: none"> <li>▪ Bundled with limited use Symphony Engine</li> <li>▪ Software Currency</li> <li>▪ Customer commitments</li> <li>▪ Enhancements for                             <ul style="list-style-type: none"> <li>▪ End user search</li> <li>▪ De-duplication (SIS)</li> <li>▪ Install simplification</li> </ul> </li> </ul>	<p><b>Symphony Intelligent Archive Release</b> Q3 2008</p> <ul style="list-style-type: none"> <li>▪ Unified offering based on Symphony Engine</li> <li>▪ No migration necessary from either CommonStore or P8 Email Manager</li> <li>▪ Leverages Best of Breed Integration to Domino, Exchange and GroupWise</li> <li>▪ Stubs and indexes preserved</li> </ul>
<p><b>IBM FileNet P8 Email Manager</b> Already using Symphony Engine</p> <ul style="list-style-type: none"> <li>▪ Lotus Domino</li> <li>▪ Microsoft Exchange</li> <li>▪ Novell GroupWise</li> <li>▪ P8 repository</li> </ul>	<p><b>Version 4.0</b> Q3 2007</p> <ul style="list-style-type: none"> <li>▪ Based on Symphony Engine</li> <li>▪ Compatibility with P8 4.0</li> <li>▪ Software currency</li> <li>▪ Simplified configuration and administration</li> <li>▪ Support for FileNet System Monitor</li> <li>▪ New Task Connectors</li> <li>▪ New client integration (4.0.1)</li> </ul>	<ul style="list-style-type: none"> <li>▪ Repository Agnostic</li> <li>▪ Content Type Agnostic</li> <li>▪ Content Source Agnostic</li> <li>▪ Multiple Modular Connectors</li> </ul>

## Email Manager/Records Crawler New User Interface

- New architecture reflected in new configuration manager
  - Task connectors for greater flexibility
  - Customer accessible API
  - More complex message handling options
  - Improved configuration flexibility
  - Sophisticated rules options
- Based on *Symphony* engine

# Email Product Release Information

IBM FileNet Email Manager 4.0.1
<p><b>Release Date</b></p> <ul style="list-style-type: none"> <li>▪ Q4 2007</li> </ul>
<p><b>Theme</b></p> <ul style="list-style-type: none"> <li>▪ New client plug-in, P8 4.0 Records Manager support and qualification of additional FileNet repositories</li> </ul>
<p><b>Key Capabilities</b></p> <ul style="list-style-type: none"> <li>▪ FileNet Records Manager 4.0 support</li> <li>▪ New Email Manager client plug-in to support P8 4.0</li> <li>▪ FileNet Image Services support</li> <li>▪ FileNet Content Services support</li> <li>▪ DB2 support</li> </ul>

IBM CommonStore Lotus Domino & Exchange 8.4
<p><b>Release Date</b></p> <ul style="list-style-type: none"> <li>▪ Q4 2007</li> </ul>
<p><b>Theme</b></p> <ul style="list-style-type: none"> <li>▪ Install improvements, search and discovery enhancements, automated PST migration</li> </ul>
<p><b>Key Capabilities</b></p> <ul style="list-style-type: none"> <li>▪ Software currency</li> <li>▪ Search and discovery enhancements</li> <li>▪ IPv6 support</li> <li>▪ MS Exchange Server 2007 and Windows Vista support</li> <li>▪ Simplified installation</li> <li>▪ Automated PST migration via Email Manager</li> <li>▪ OWA proxy support</li> </ul>

## Records Crawler Product Release Information

IBM FileNet Records Crawler 4.0.1
<b>Release Date</b> <ul style="list-style-type: none"><li>▪ Q4 2007</li></ul>

## New Federal Rules of Civil Procedure Took Effect in December 2006 Raising the ECM Bar

- The US Supreme Court approves new rules of civil procedure bringing a much needed standard and replacing dozens of state and local rulings
- New Federal Rules of Civil Procedure on Legal Discovery (**12/1/2006**):
  - Early Attention: Rule 26 (a) (1): Show What You Have
  - Early Attention: Rule 26 (f): Requires a Discovery Consensus
  - Form of Production: Rule 34 (a) & (b): Can Ask for all Types of **ESI**
  - Sanctions: Rule 37: No Penalty for Purges as Part of Normal Operations
  - Form of Production : Rule 26 (b) (5) (B): Privileged Information Protected
  - Accessibility: Rule 26 (b) (2) (B): Protection from Cost Prohibitive Discovery
- There is no definition as to what constitute timely response in legal discovery. It is left to the discretion of judges and is bound to tighten as ECM solutions shorten response time.

# Business Value of Classification for ECM

Key Business Drivers			
ECM Taxonomy and Classification <b>1</b>	Compliance, Records, Legal Discovery <b>2</b>	In Process Classification <b>3</b>	Message Tagging, Classification and Monitoring <b>4</b>
Increase accessibility of content under management <ul style="list-style-type: none"> <li>▪ <b>Automated, High Scale Classification</b></li> <li>▪ <b>Classify at ingestion and/or re-classify over time</b></li> <li>▪ <b>Taxonomy Evolution Tools</b></li> <li>▪ <b>Enhanced Accessibility</b></li> <li>▪ <b>Taxonomy Proposer</b></li> </ul>	Increase legal discovery review effectiveness while reducing risk <ul style="list-style-type: none"> <li>▪ <b>Legal Discovery Prioritization and Workflow Assignment</b></li> <li>▪ <b>Records Classification and Exception Handling</b></li> <li>▪ <b>Storage and Retention Policy Assignment</b></li> </ul>	Increase worker productivity and automate content related decisions <ul style="list-style-type: none"> <li>▪ <b>Ad Hoc Category Suggestion</b></li> <li>▪ <b>Content-Based Workflow Selection</b></li> <li>▪ <b>Content Based Decision Making</b></li> </ul>	Reduce inquiry costs, automate message routing and increase customer satisfaction <ul style="list-style-type: none"> <li>▪ <b>Email, Chat Routing</b></li> <li>▪ <b>Agent Response Suggestion</b></li> <li>▪ <b>Email Supervision and Monitoring</b></li> <li>▪ <b>Automatic Customer Response</b></li> </ul>

## Where do I start?

Organizing the explosion of unstructured content becomes critical:

- We've got 600 GB of content from basic content services all over the enterprise.  
How can we get this content efficiently mapped into our ECM taxonomy?
- We've been managing our content without classifying it for a few years now.  
How can our users navigate amongst this existing content in a way that's intuitive for *our* business?
- The lawyers have to review 400,000 electronic documents for their case.  
How can we make sure they don't waste their time?

## Why invest in automated classification?

**Accelerate the time to value in your investment in ECM**

**Ensure more accurate content catalogs**

**Free up your subject matter experts**

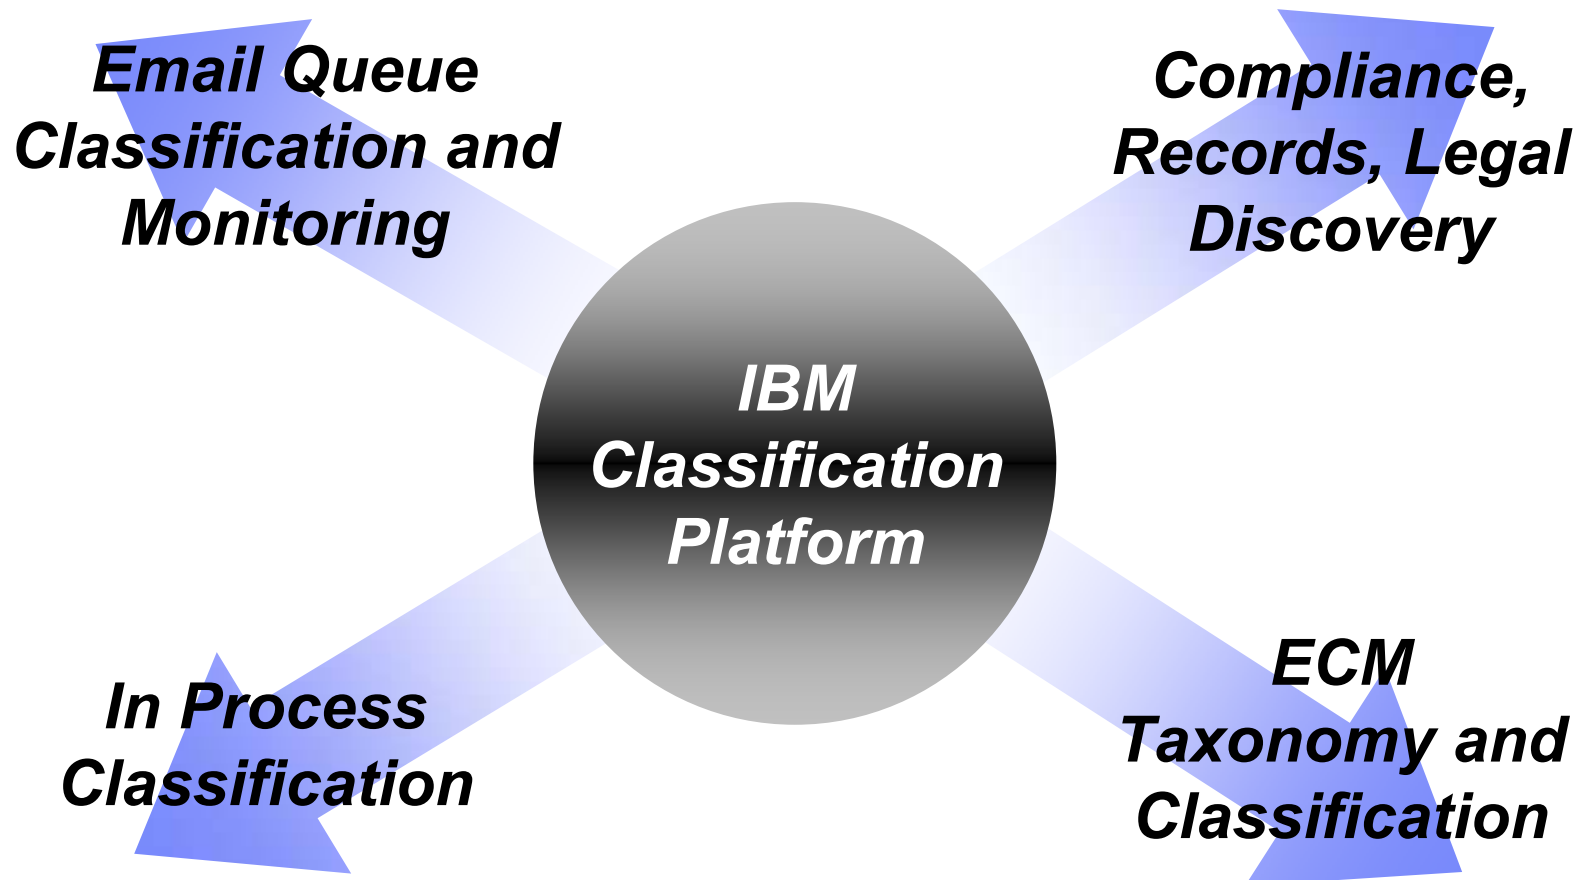

**Make your content easier to find and leverage**

**CLOUDMARK** *Cloudmark's use of IBM Classification Module made a return on their investment in three months*

## Common Platform for Solving Classification Problems

# IBM Classification Module Components

- Classification Server

- Enterprise server platform delivering Classification Technology

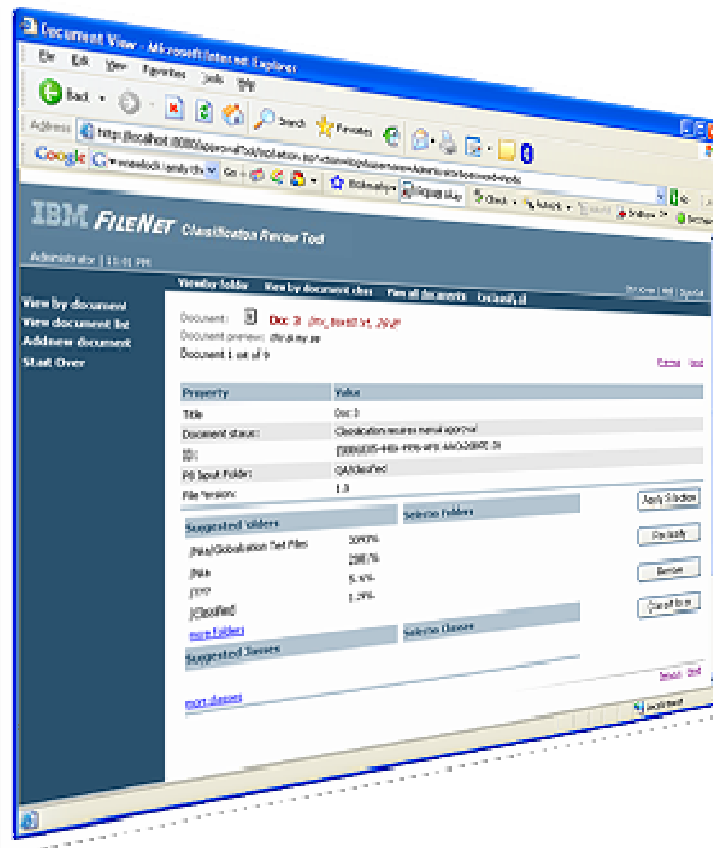

- Classification Workbench

- Desktop tool for creating, maintaining, and tuning knowledge bases used with IBM Classification Module

## IBM Classification Module for IBM FileNet P8 (Q4)

### IBM Classification Module for IBM FileNet P8

Input – Now works with P8

Organize

- Auto-Classify Content
- Proposes Taxonomy – Suggests Categories
- Extracts and Enhances Metadata
- Self-Learning

Enforce & Activate

- Trigger BPM, RM or other ECM Services
- Expose via SOA

# Critical Elements of Electronic Discovery

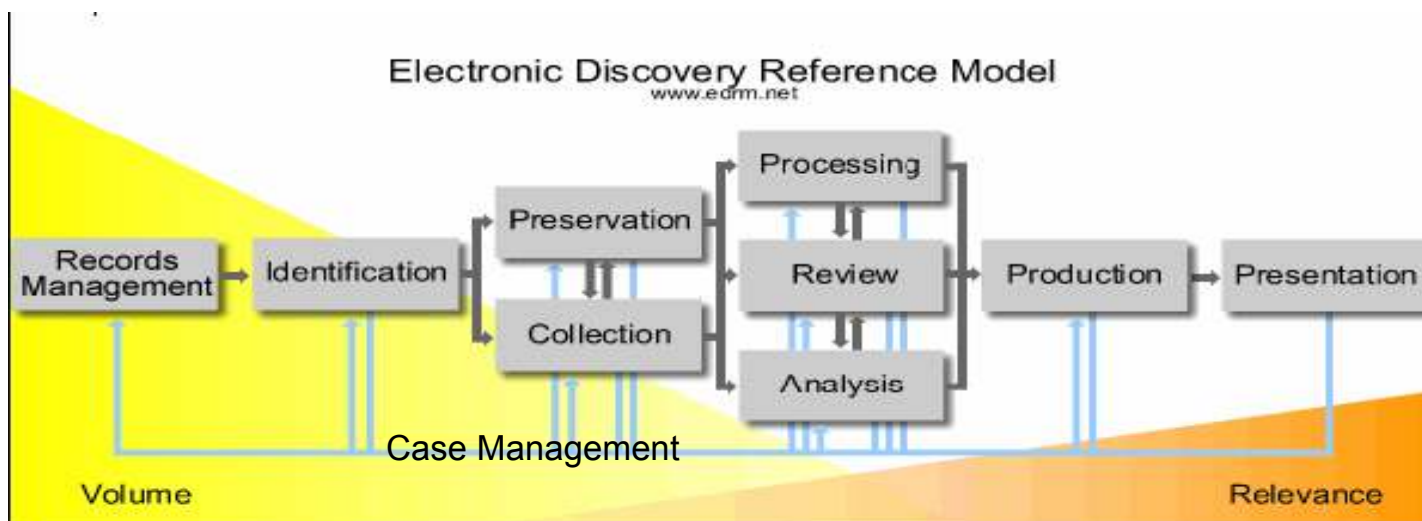

## Key Business Drivers

<b>Clean Up The Digital Landfill ... Build Content Inventory</b> <b>1</b>	<b>Initiate Holds and Automate Content Collection</b> <b>2</b>	<b>Improve Discovery Review Process</b> <b>3</b>	<b>Automate and Audit Legal Discovery Process</b> <b>4</b>
<p>To reduce the problems associated with scattered information silos, multiple copies and poor indexing.</p> <ul style="list-style-type: none"> <li>▪ <b>Get Unstructured Content Under Control</b></li> <li>▪ <b>Make the Unlocatable Locatable by Adding Meta Data and Creating Taxonomies</b></li> <li>▪ <b>Eliminate Multiple Copies</b></li> <li>▪ <b>Use Content Analytics to Identify and Eliminate the Waste</b></li> <li>▪ <b>Put the Right Policies and Controls in Place</b></li> <li>▪ <b>Increase Readiness for Litigation and Compliance</b></li> </ul>	<p>To comply with new requirements of legal hold management including records and non-records collection.</p> <ul style="list-style-type: none"> <li>▪ <b>Enforce Holds and Records Management</b></li> <li>▪ <b>Automate the Collection of All Potentially Discoverable Content</b></li> <li>▪ <b>Reduce Processing Time, Cull, Eliminate Duplicates ... Version Control</b></li> <li>▪ <b>Create Additional Metadata for Better Discovery</b></li> <li>▪ <b>Preserve Original Formats</b></li> <li>▪ <b>Store in Secure Auditable Repository</b></li> </ul>	<p>To mine, extract, organize and analyze discoverable content faster to make better decisions.</p> <ul style="list-style-type: none"> <li>▪ <b>Organize All Potentially Discoverable Content</b></li> <li>▪ <b>Use Content Analytics to Identify Trends, Risks and Threats, Gain Insight</b></li> <li>▪ <b>Automate Tagging, Create Additional Meta Data Leveraging Insight</b></li> <li>▪ <b>Locate, Review, Redact Relevant Content Faster</b></li> <li>▪ <b>Produce Relevant, Non-Privileged Information for Litigation</b></li> </ul>	<p>To reduce the costs and risks associated with a compliant, repeatable process.</p> <ul style="list-style-type: none"> <li>▪ <b>Manage all Required Notifications of Legal Holds</b></li> <li>▪ <b>Automate Production, Case Management, Review, Routing and Redaction</b></li> <li>▪ <b>Trigger Process Based on "Duty to Preserve" Events</b></li> <li>▪ <b>Provide Audit Trail and Reports</b></li> <li>▪ <b>Manage Litigation Response as a Business Process – Documented, Measurable, Repeatable</b></li> </ul>

## Electronic Discovery Process

**Electronic Discovery is more than just searching ... it is a process that defines what documents are needed, how they are handled, collected, reviewed and eventually packaged to be presented to external or opposing counsel.**

**This process can be improved and made cost effective ... IBM has all the ECM tools to help you along the way.**

# How IBM ECM Helps with Electronic Discovery

**1**

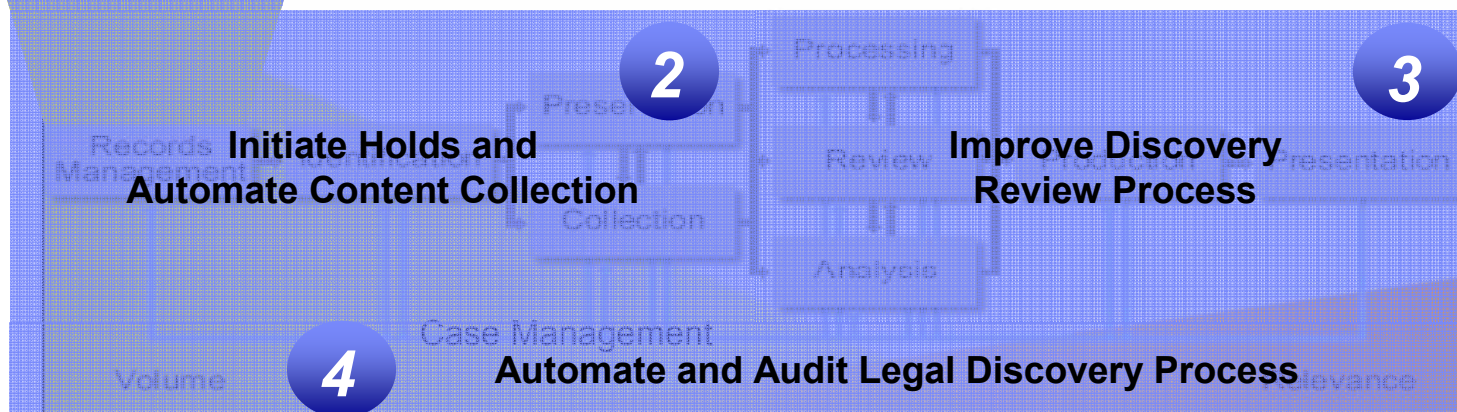

Clean Up The **Digital Landfill**

Build Content Inventory

Email archive silos, poorly indexed content, multiple copies of everything, unmanaged file systems and SharePoint have all combined to create **Digital Landfills**

Only IBM has all the tools needed to properly manage the 4 phases of electronic discovery

Electronic Discovery Reference Model

## OmniFind Product Release Information

Analytics Edition 8.4.1	Enterprise Edition 8.5
<p><b>Release Date</b></p> <ul style="list-style-type: none"> <li>▪ August 2007</li> </ul>	<p><b>Release Date</b></p> <ul style="list-style-type: none"> <li>▪ Q1 2008</li> </ul>
<p><b>Theme</b></p> <ul style="list-style-type: none"> <li>▪ Integration with OmniFind Enterprise Edition and DB2 Data Warehouse</li> </ul>	<p><b>Theme</b></p> <ul style="list-style-type: none"> <li>▪ Improvements for key customers</li> </ul>
<p><b>Key Capabilities</b></p> <ul style="list-style-type: none"> <li>▪ Tight integration with OmniFind Enterprise Edition for improved search</li> <li>▪ Ability to integrate with DB2 Data Warehouse</li> </ul>	<p><b>Key Capabilities</b></p> <ul style="list-style-type: none"> <li>▪ Improved Lotus support (Domino 8, Quickr, and Clustering for Portal)</li> <li>▪ Enhanced n-gram support for improving precision/recall for Japanese language texts</li> <li>▪ Crawling multiple structured tables</li> <li>▪ Near duplicate detection</li> </ul>

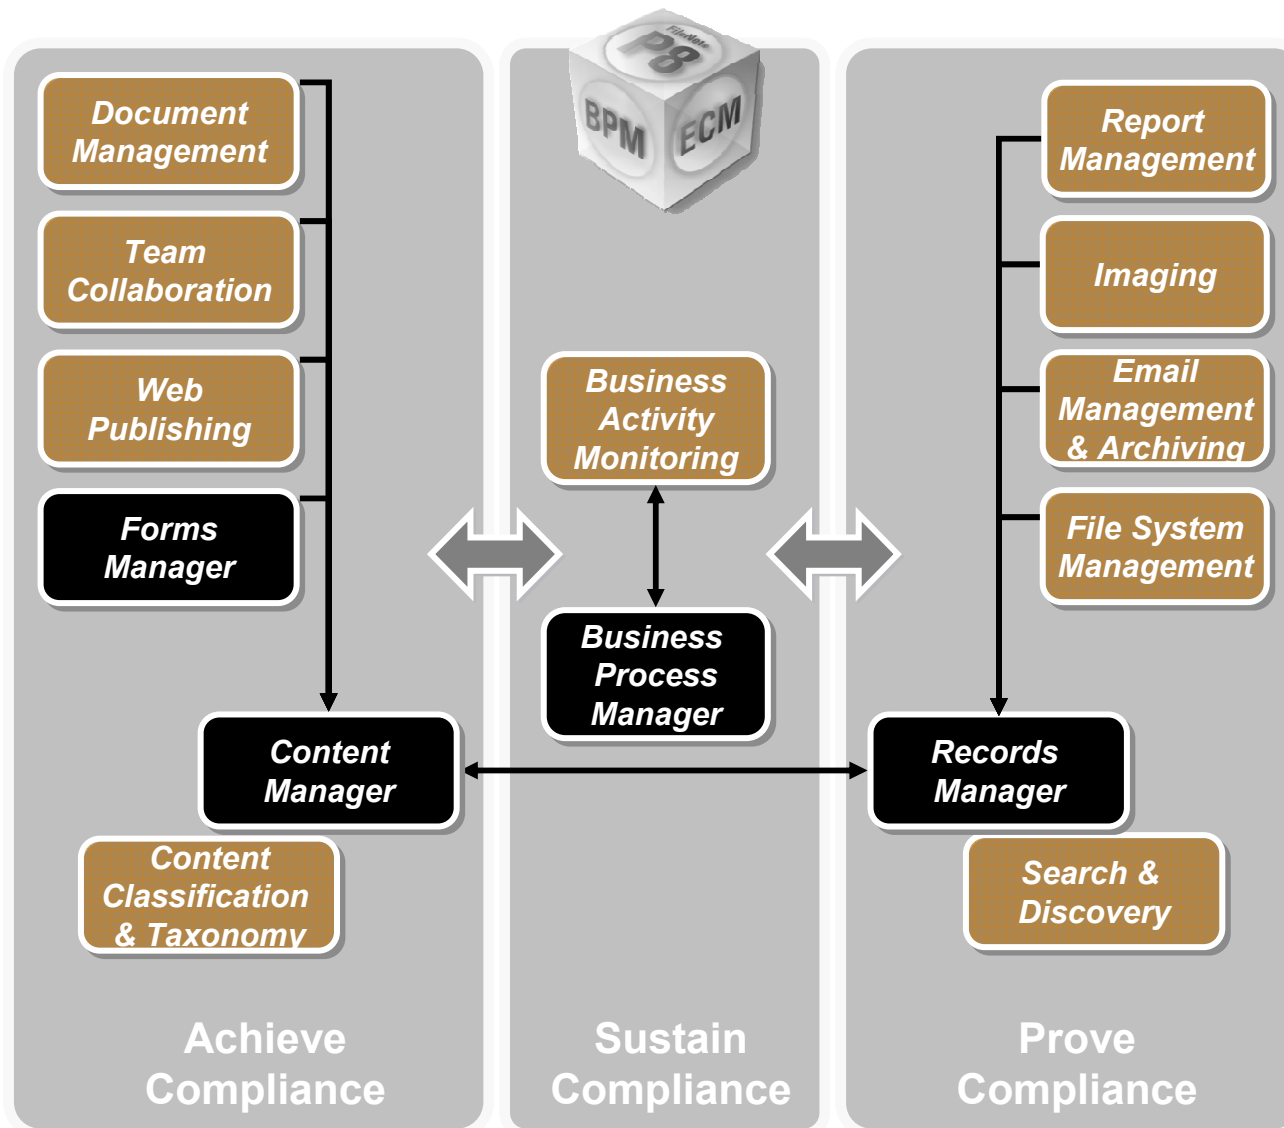

# Why Use ECM for GRC?

Key Business Drivers			
For Organizations Needing to <b>Achieve</b> Compliance <b>1</b>	For Organizations Needing to <b>Sustain</b> Compliance <b>2</b>	For Organizations Needing to <b>Prove</b> Compliant Behavior <b>3</b>	For Organizations Needing to <b>Comply with Multiple Requirements</b> <b>4</b>
<p>To have the proper operational policies, processes and controls in place to be compliant</p> <ul style="list-style-type: none"> <li>▪ Access Information Across Repositories</li> <li>▪ Collaborate and Define Policies, Roles and Responsibilities</li> <li>▪ Capture, Store and Publish All Supporting Documentation</li> <li>▪ Implement Reliable Records Management</li> <li>▪ Adapt Dynamically to Regulatory Changes</li> </ul>	<p>To ensure that every process complies with policy and stays within the law in a cost effective manner</p> <ul style="list-style-type: none"> <li>▪ Automate Processes to Reduce Control Testing and Risk Assessment Costs</li> <li>▪ Monitor Controls in Real Time to Reduce Fraud and Non-Compliance</li> <li>▪ Enforce Adherence to Compliant Practices and Respond Rapidly to External Influences</li> </ul>	<p>To be able to produce evidence and authentic records of policy and process compliance</p> <ul style="list-style-type: none"> <li>▪ Provide Legally Admissible Records Including All Forms of Content and Email</li> <li>▪ Enable Timely Regulatory Reporting, Consistency and A Auditability</li> <li>▪ Provide Decision Audit Trails and Chain of Custody</li> <li>▪ Automate Legal Discovery Processes</li> </ul>	<p>To consistently execute internal controls, business continuity measures, and mitigation of information and operational risk</p> <ul style="list-style-type: none"> <li>▪ Regulations (over 10,000 worldwide)</li> </ul> <p>Sarbanes-Oxley · CoBIT · OSHA 1910 · US DoD 5015.2 · FOIA · Basel II · SEC 17a4 · AML/KYC · Gramm-Leach-Bliley · PATRIOT Act · Data Protection · Privacy · 21 CFR Part 11 · Solvency II · ISO 17799 · MiFID · SEPA · MoReq2 · Identity Theft · Tread Act · Anti-Terrorism</p>

# Compliance Framework ECM Bundle

- Compliance Framework is a great starting point
  - Records Manager
  - Content Manager
  - Forms Manager
  - BPM
- Single platform for multiple GRC initiatives
- Fast automation of Compliance Centric BPM applications
- Turn ring binders into Active Compliance

## Control & Enforcement Topics

- Why Organizations Lose Control of Enterprise Content
- Regaining Control of Enterprise Content
- Compliance Critical Success Factors
  - Records Management
  - Multi-Channel Content (Email) Archiving
  - Classification
  - Electronic Discovery
  - Governance, Risk and Compliance

A Single Platform for Enterprise Compliance

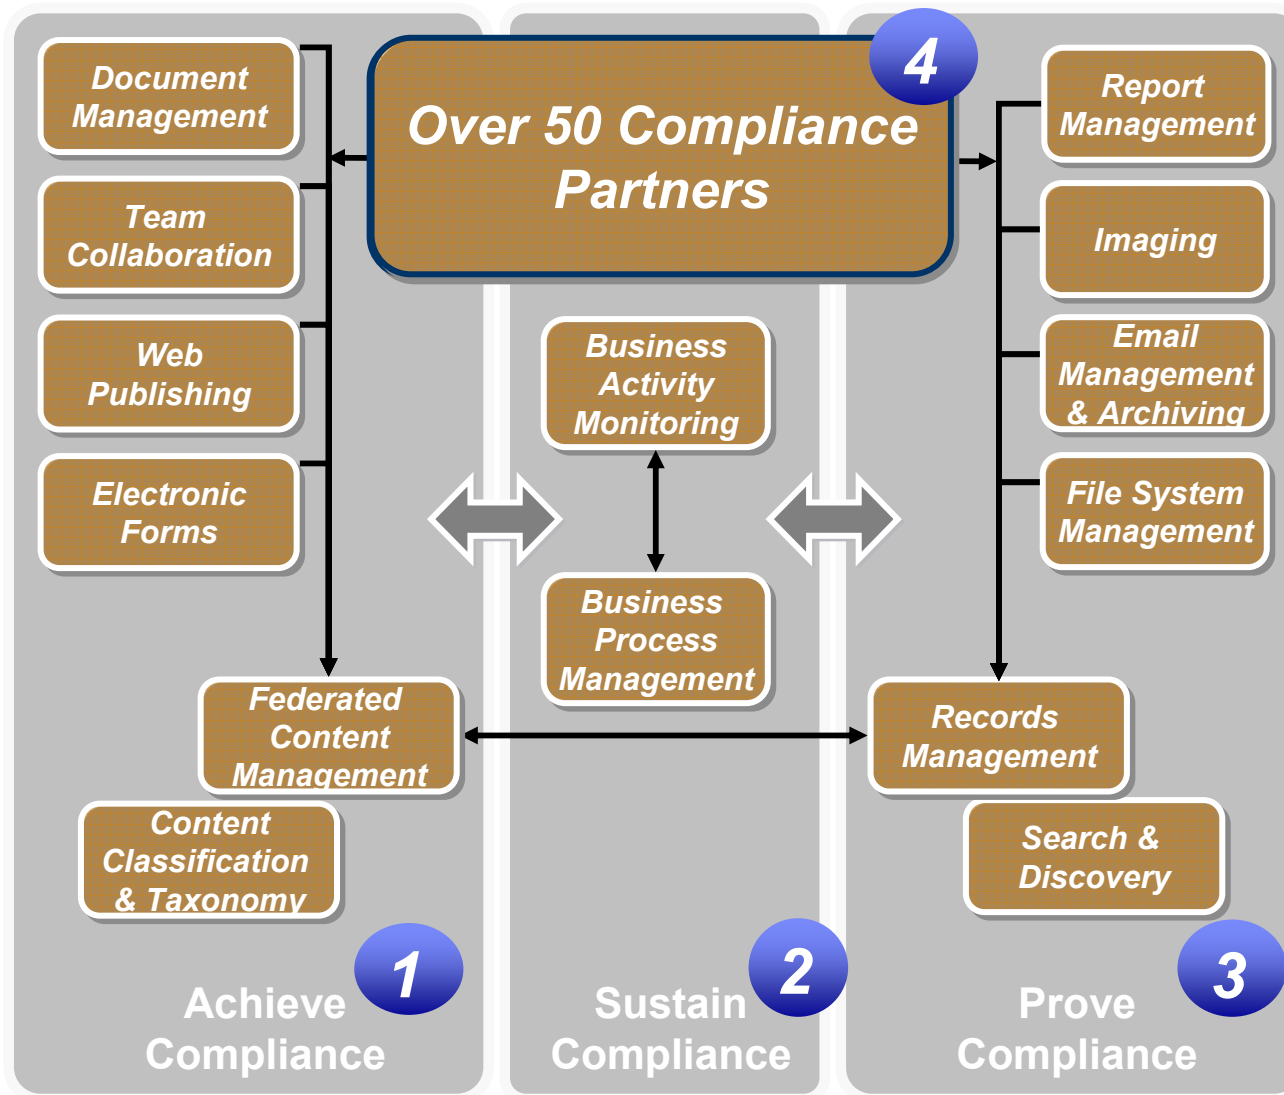

## Single Platform = Lowest Cost of Ownership

- One platform for many overlapping regulations and compliance, risk and corporate governance initiatives – now and future
- Implementation and licensing costs spread across enterprise
- No point solutions

**“Enterprises that choose one-off solutions for each regulatory challenge that they face **will spend 10 times** more on compliance projects than their counterparts that take a proactive approach.”**

**– Gartner**

# Building an Enterprise Compliance Platform

- 1** To have the proper operational policies, processes and controls in place to be compliant
- 2** To ensure that every process complies with policy and stays within the law in a cost effective manner
- 3** To be able to produce evidence and authentic records of policy and process compliance
- 4** To consistently execute internal controls, business continuity measures, and mitigation of information and operational risk in support of **multiple GRC requirements**
