

DB2 Information Management Software

IBM Fast Start Services for DB2 Universal Database

Highlights

- ***Leverage the best practices and experience IBM has gained from helping other customers implement DB2 Universal Database***
- ***Capitalize on autonomic and application development advancements, decreasing your total cost of ownership***
- ***Leverage our experts to acquire the skills to implement and maintain DB2 Universal Database in your environment***

The latest release of IBM® DB2® Universal Database provides the ultimate in performance, scalability, reliability, availability, and security all in a cost-effective platform that is open and flexible and supports key industry standards. Additionally, improved integration with key development platforms makes application developers even more productive than ever.

This offering will help your organization get off to a quick start with your newly acquired DB2 Universal Database software by providing assistance with the installation and configuration process.

What's Involved

Whenever you choose to engage us, you can be sure that you are working with the industry's leading-edge experts. Consultants from IBM Software Services for DB2 Information Management assist you with the installation and configuration of the DB2 Universal Database. Working jointly with your staff, the consultants provide technical assistance and knowledge transfer on the administration and operational procedures required to support the DB2 Universal Database in your unique environment, ensuring that your team is prepared to support your new software.

The IBM consulting team will also:

- *Review with you the services contract, prerequisite activities, and scheduling*
- *Create and review an implementation task list with your team.*

The IBM consulting team delivers a final report detailing the installation process for your specific environment, configuration modifications made to the default database settings, and specific operational information required to administer your unique database system.
