

DB2 Information Management Software

IBM Fast Start Services for DB2 Everyplace

Highlights

- *Install and configure products from the DB2 Everyplace family*
- *Accelerate your design and deployment of enterprise information into the hands of your mobile users*
- *Leverage our experts to build and enhance the DB2 Everyplace skills of your team*

IBM® DB2® Everyplace features a small footprint relational database and high performance data synchronization solution that enables enterprise applications and data to be securely extended to mobile devices such as personal digital assistants (PDAs), smart phones and other embedded mobile devices. With DB2 Everyplace, the mobile work force in industries such as health care, telecommunications, retail, distribution, transportation and hospitality can now easily access the information they need to perform their work -- from any location, at any time, right from the palm of their hand.

This offering will help your organization get off to a quick start with your newly acquired DB2 Everyplace software by providing assistance with the design, planning, installation and configuration process.

What's Involved

Consultants from IBM Software Services for DB2 Everyplace assist you with the planning, design, installation and configuration of the DB2 Everyplace family of products. Working jointly with your staff, the consultants also provide technical assistance and knowledge transfer on the administration and operational procedures required to support the DB2 Everyplace family of products in your unique environment.

The primary activities that will be undertaken in this service offering are :

- *Review with you the service contract, prerequisite activities, and scheduling*
- *Review your unique requirements for a DB2 Everyplace solution*
- *Assist with the design and planning of solution implementation*
- *Assist with the installation and configuration of DB2 Everyplace products*
- *Assist with the administration design and configuration of users, groups, subscription and table filters*
- *Verify configuration by testing replication and synchronization between source and mobile devices*

The IBM Consulting team delivers Biweekly status reports and a final report detailing the installation process for your specific environment, configuration modifications made to the default settings, and specific operational information required to administer your unique DB2 Everyplace system.

Supported Products

DB2 Everyplace Database Edition,
DB2 Everyplace Express Edition,
DB2 Everyplace Enterprise Edition
