DB2 Information Management Software

IBM Fast Start Services for DB2 Universal Database Data Warehouse Edition

Highlights

- ■ *Utilize expert IBM consultants to help install and configure DB2 Universal Database Data Warehouse Edition products*

- ■ *Accelerate your business intelligence solution implementation*

- ■ *Leverage our experts to enhance the business intelligence skills of your team*

IBM® DB2® Universal Database (UDB) Data Warehouse Edition combines the strength of industry leading database technology with components that provide a business intelligence platform with everything needed to deploy highly scalable, multi-terabyte business intelligence solutions, enabling your organization to make better decisions, increase efficiencies, better serve customers and suppliers, and respond more quickly to new opportunities or threats.

This offering will help your organization get off to a quick start with your newly acquired DB2 UDB Data Warehouse Edition software by providing knowledge transfer and assistance with the software installation and configuration process.

What's Involved

Consultants from IBM Software Services for DB2 Information Management assist you with the installation and configuration of the DB2 UDB Data Warehouse Edition products. Working jointly with your staff, the consultants provide technical assistance and knowledge transfer on the administration and operational procedures required to support the products in your unique environment. The IBM consulting team provides technical advice on the best use of the business intelligence platform for data access, ETL, metadata management, multidimensional analysis, and data mining. Sample data is used to demonstrate functionality including the online analytical processing (OLAP) capabilities of DB2 Cube Views.

These activities are completed together with your administration staff, support staff, and business analysts to transfer skills and get you up and running quickly.

This offering supports all editions of the DB2 UDB Data Warehouse Edition, including: Enterprise Edition, Standard Edition, and Base Edition. The following products are installed and configured during the course of the engagement:

DB2 UDB Data Warehouse Enterprise Edition

- *DB2 UDB Enterprise Server Edition*
- *DB2 UDB Database Partitioning Feature*
- *DB2 Cube Views*
- *DB2 Intelligent Miner Modelling, Scoring and, Visualization*
- *DB2 Office Connect Enterprise Web Edition*
- *DB2 Query Patroller*
- *DB2 Warehouse Manager Standard Edition*
- *DB2 Information Integrator Standard Edition*

DB2 UDB Data Warehouse Standard Edition

- *DB2 UDB Workgroup Server Unlimited Edition*
- *DB2 Cube Views*
- *DB2 Intelligent Miner Modelling, Scoring and, Visualization*
- *DB2 Office Connect Professional Web Edition*

DB2 UDB Data Warehouse Base Edition

- *DB2 UDB Enterprise Server Edition*
- *DB2 Cube Views*

The IBM Consulting team delivers biweekly status reports and a final report detailing the installation process for your specific environment, configuration modifications made to the default settings, and specific operational information required to administer your unique business intelligence system.
