WebSphere® software

IBM Upgrade Services for WebSphere Information Integrator

Highlights

■ **Upgrade to the latest IBM® WebSphere® Information Integrator technology**

■ **Accelerate your integration of diverse, distributed and real-time data**

■ **Leverage IBM experts to enhance the information integration skills of your team**

IBM WebSphere Information Integrator integrates data and content on demand. It provides a foundation for your on demand business, enabling your company to have integrated, real-time access to diverse and distributed information. As a result, your organization can increase efficiencies, better serve customers and suppliers, make better decisions and respond more quickly to new opportunities or threats.

This service offering will help your organization upgrade to the latest WebSphere Information Integrator products, empowering you to find, access, integrate, synchronize and share a wide variety of information.

What's involved

Consultants from IBM Software Services will help you upgrade the following environments:

- *Previous releases of WebSphere Information Integrator to current versions*
- *IBM DB2® DataPropagator™ to WebSphere Information Integrator*
- *DB2 Relational Connect to WebSphere Information Integrator*
- *DB2 DataJoiner® to WebSphere Information Integrator*
- *DB2 RepliData for the IBM z/OS® operating system to WebSphere Information Integrator Replication for z/OS*
- *SQL replication to Q replication*
- *WebSphere Portal Search to WebSphere Information Integrator OmniFind™ Edition*
- *DB2 Content Manager Search to WebSphere Information Integrator OmniFind Edition*

IBM consultants will review your existing system to help ensure a quick, problem-free upgrade. Our team will install the appropriate products and configure them for a comparable level of functionality to the existing system.

ON DEMAND BUSINESS™

The consultants will also provide basic performance tuning for the new software. Throughout the duration of the engagement, IBM consultants are focused on transferring knowledge to your team to help them better support the product after the end of the consulting engagement. The IBM consulting team delivers a final upgrade report detailing the steps taken to upgrade your system and listing any recommended configuration or performance modifications for your specific environment.

Supported products

- *IBM WebSphere Information Integrator*
- *IBM WebSphere Information Integrator OmniFind Edition*
- *IBM WebSphere Information Integrator Content Edition*
- *IBM WebSphere Information Integrator Classic Federation for z/OS®*
- *IBM WebSphere Information Integrator Replication for z/OS*
- *IBM WebSphere Information Integrator Classic Event Publisher for z/OS*
