

**BusinessConnect and SolutionsConnect**

It's time to make bold moves.

# Cloud has a silver lining

Re-making Enterprise IT

Jon Brown, Cloud Architect  
IBM Australia & New Zealand

What in the world is going on?

The Internet of things **everything** mobile **everywhere** composed **any-way**

Think any function:

**Apps**  
everyone to everyone

**APIs**  
machine to machine

**Machine**  
As any thing

=

**Central Nervous  
System**

# Cloud Computing is About Principles and Design

## Cloud Computing Business & IT Benefits

### Legacy

No cloud computing qualities

Slow outcomes  
Change paralysis  
Expensive  
Risky  
Lock in  
Rigid  
“Big” & Monolithic  
Pay for “everything”  
One off  
High touch (manual)  
Managed Service  
Think HW + SW +  
Applications

### Cloud Enabled

Partial qualities

Note: traditional technologies  
can have cloud qualities

### Cloud Native

Inherent qualities

Fast outcomes  
Continuous delivery  
Value  
Mitigated  
Freedom of choice  
Scalable & elastic  
Plug in & out capability  
Pay for what you need  
Mass re-use  
Low touch (autonomic)  
Self service  
Think Apps, APIs & Services

*“Make no mistake,  
IBM is remaking enterprise  
IT for the era of cloud.”*

– Ginni Rometty

# Cloud as a Growth Engine for Business

## Think it.

Strategize how to to monetize new value, and reduce costs

**\$2B**

SoftLayer Acquisition

**\$1.2B**

Data Center Expansion

## Build it.

Build and run hybrid cloud computing solutions

**\$7B+**

Acquisition Investment

## Tap into it.

Utilize cloud services delivered from IBM Cloud Marketplace

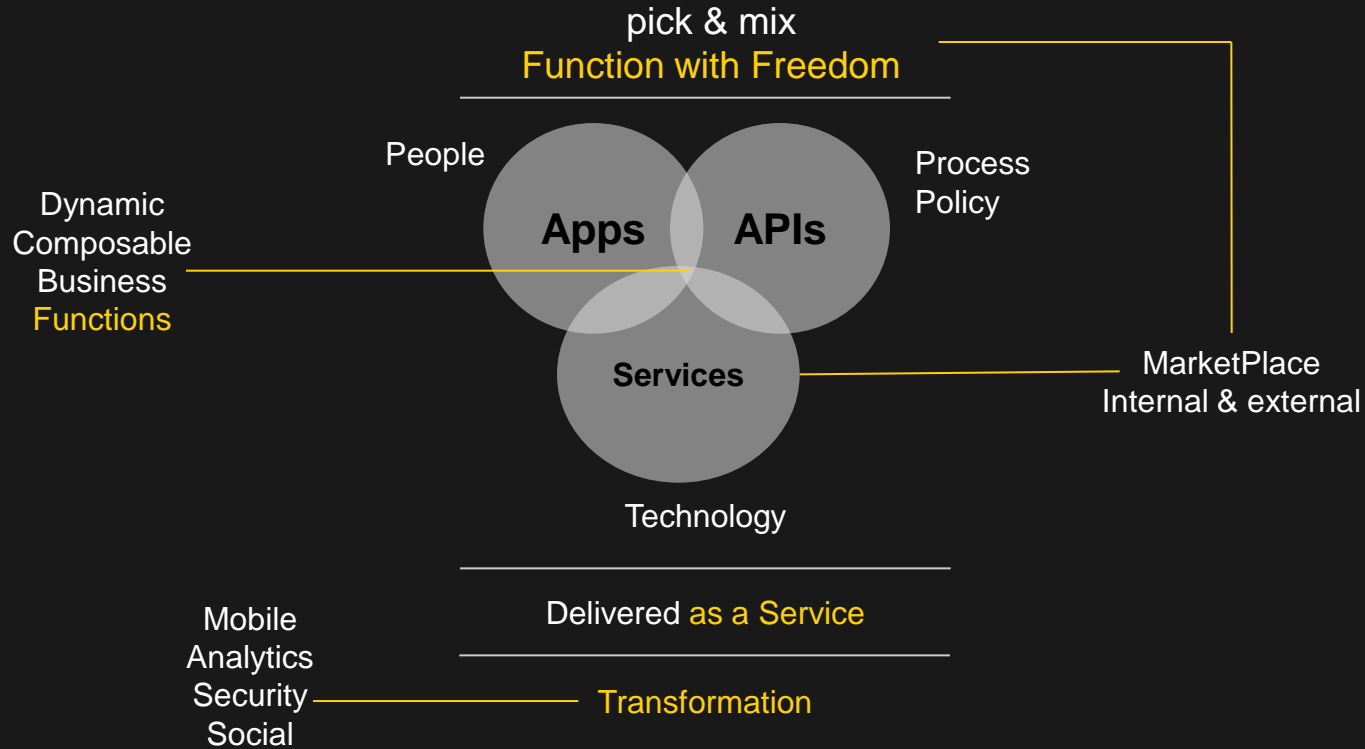

**100+**

SaaS Offerings

**40,000+**

Experts

# Cloud Computing is Function with Freedom

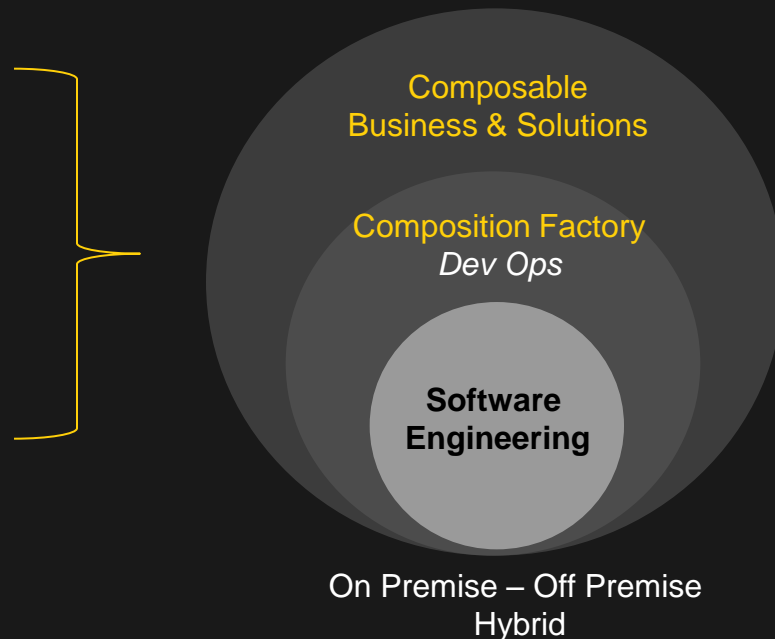

# Cloud Computing Requires a New Organisational Model
