

Managing your Capital Projects with TRIRIGA

Tony Stack, SLCR, MDScFM
Business Solutions Manager
June 1 2012

Pulse2012

Meet the Experts. Optimise your infrastructure.

May 31 – June 1

Sheraton on the Park Hotel, Sydney

Project Management is like dating
-you smile a lot,
-you pretend to enjoy yourself,
-and wait for some jerk to call you back.

And so the life of
a Project
Manager goes
on.....

Stress Reduction Kit

Bang
Head
Here

Directions:

1. Place kit on FIRM surface
2. Follow directions in circle of kit
3. Repeat step 2 as necessary, or until unconscious
4. If unconscious, cease stress reduction activity

Houston, we've had a problem

“Whoever decided to apply the maxim “failure is not an option” to a project is either a client, a boss, a politician, or just plain stupid.

Projects have an innate ability to fail. Successful project management is about planning for failure and avoiding the pitfalls.

You don't think we'd send a man to the moon without planning to fail.”

“Failure is always an option.....”

**FAILURE IS
NOT AN
OPTION**

The Dark Side of Capital Projects.....

- Over the next twelve months, organizations that average closing **\$65 million** worth of projects will see **\$30 million** of those projects at risk of failing
- **47%** of projects are in trouble before they start.
- Almost **1/3rd** will be cancelled before completion
- **Less than 25%** of organizations have a standard process for recovering troubled processes
- **1/3rd** have none at all.

Which means that 7 out of 8 projects will fail at some point.....

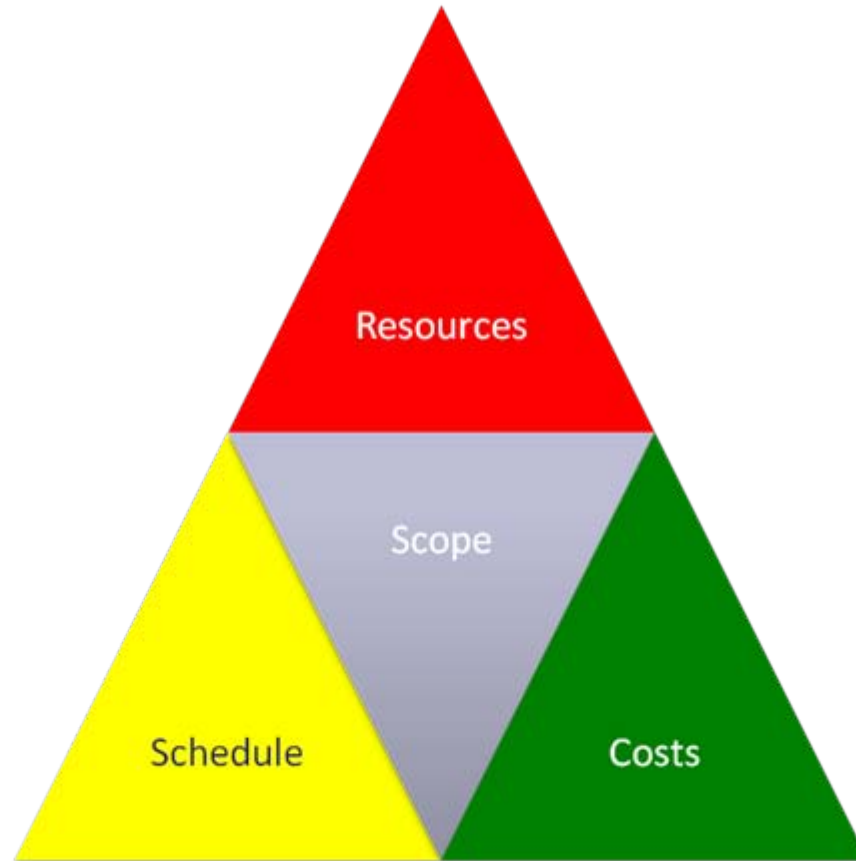

Ergo.....

- Only **1** out of every 8 projects is a success
-*statistically speaking that is*

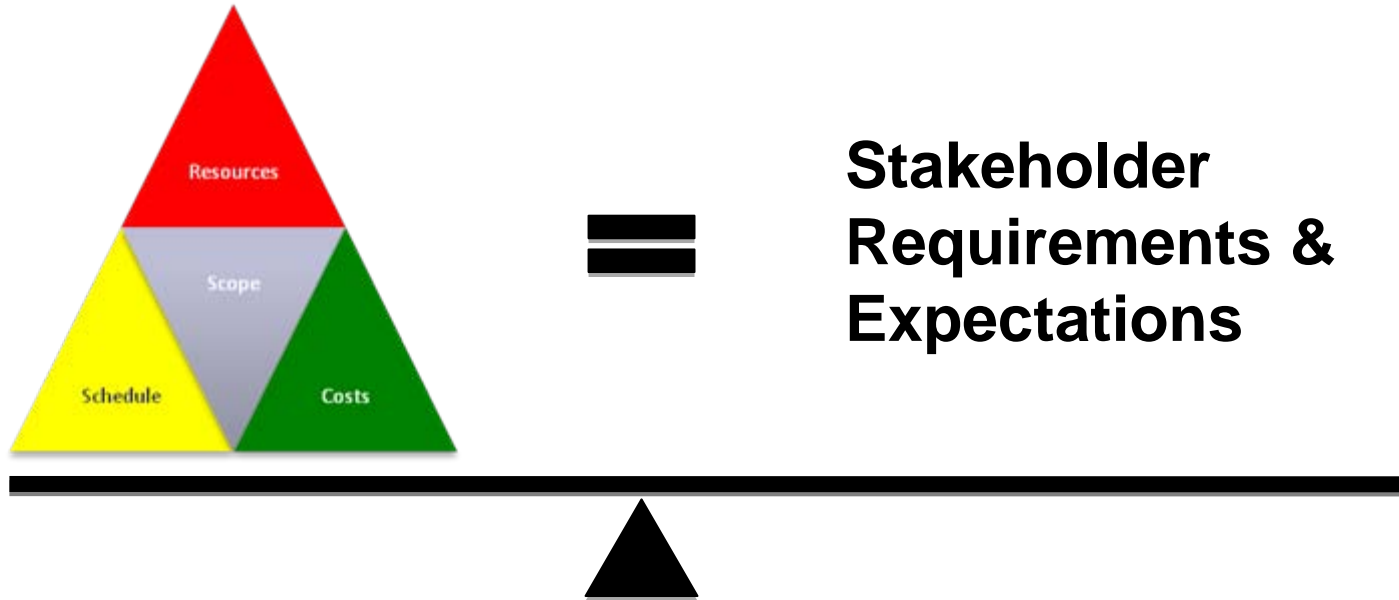

Projectmanagercus Ecstacticus

Why Projects Work.....

Why Projects Work.....

What's the problem.....

Schedule

- 1 Meeting milestones or completing deliverables
- 2 High risk in delivering project's likelihood of delivering anticipated benefits
- 3 Project forecasted to be unacceptably behind schedule at completion
- 4 Project unacceptably behind planned schedule
- 5 Critical and/ or significantly growing technical issues with the project

Time

1. Aggressive/ unrealistic project schedules
2. Erroneous time estimates
3. Unrealistic stakeholder time constraints
4. "You want it when?"
5.

Scope

- 1 Project requirements not clearly understood
- 2 Unacceptable level of PCRs/ project cost over-runs
- 3 Unmanageable project issues/ resourcing issues
- 4 Unmitigated project risks
- 5

And so.....

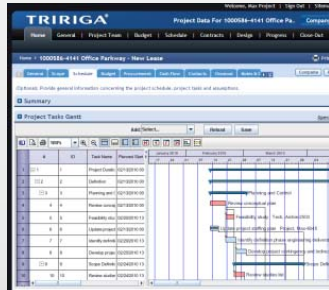

TRIRIGA Workplace Enterprise-Class Applications

TRIRIGA Real Estate

- Portfolio Planning
- Site Selection
- Transaction Management
- Lease Administration
- Lease Accounting
- AR Tenant Tracking
- Payment Processing
- Client Requests

Program Management streamlines operational, financial, and environmental improvements

Business Challenge

- Align business goals and capital funding requests
- Match timing of funding with project schedules

Key TRIRIGA Features

- Funding analysis helps prioritize requests
- Embedded project metrics provide visibility into funding surpluses and bottlenecks

California Administration Office of Courts improves states wide program and funds tracking

California AOC improved program funding with automated fund requests and advanced opportunity analysis. Each fund request goes through a complete analysis on its impact on program goals and environmental initiatives.

Program Management streamlines operational, financial, and environmental improvements

Manage Allocations and/or Reallocate

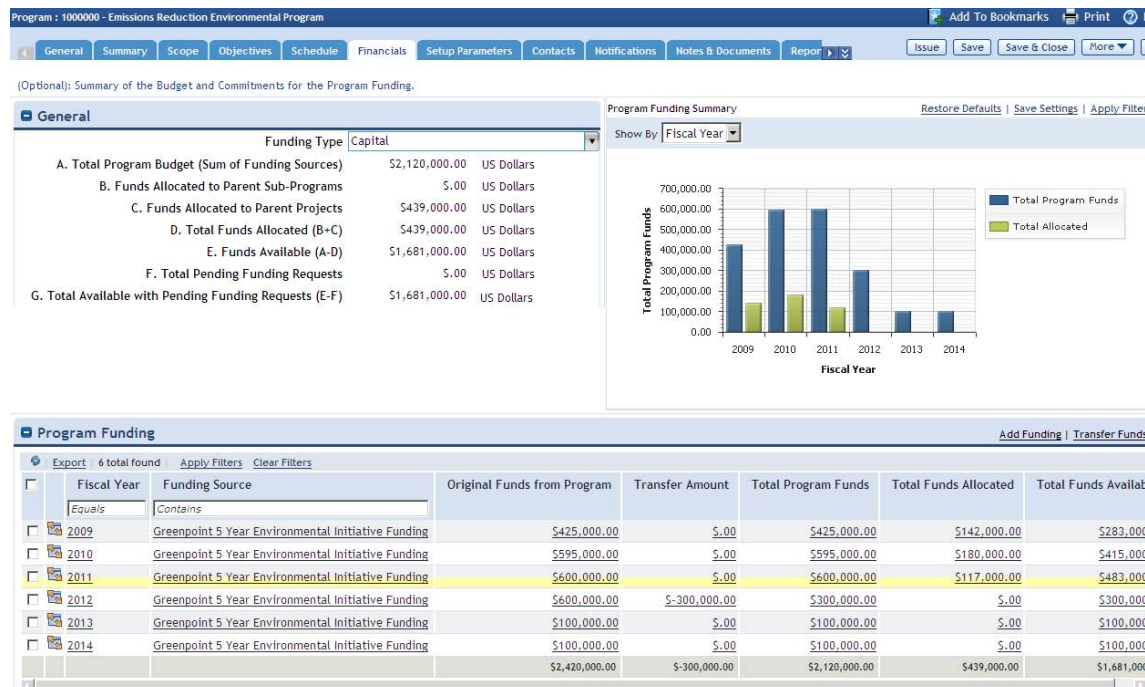

Establish Funding Sources

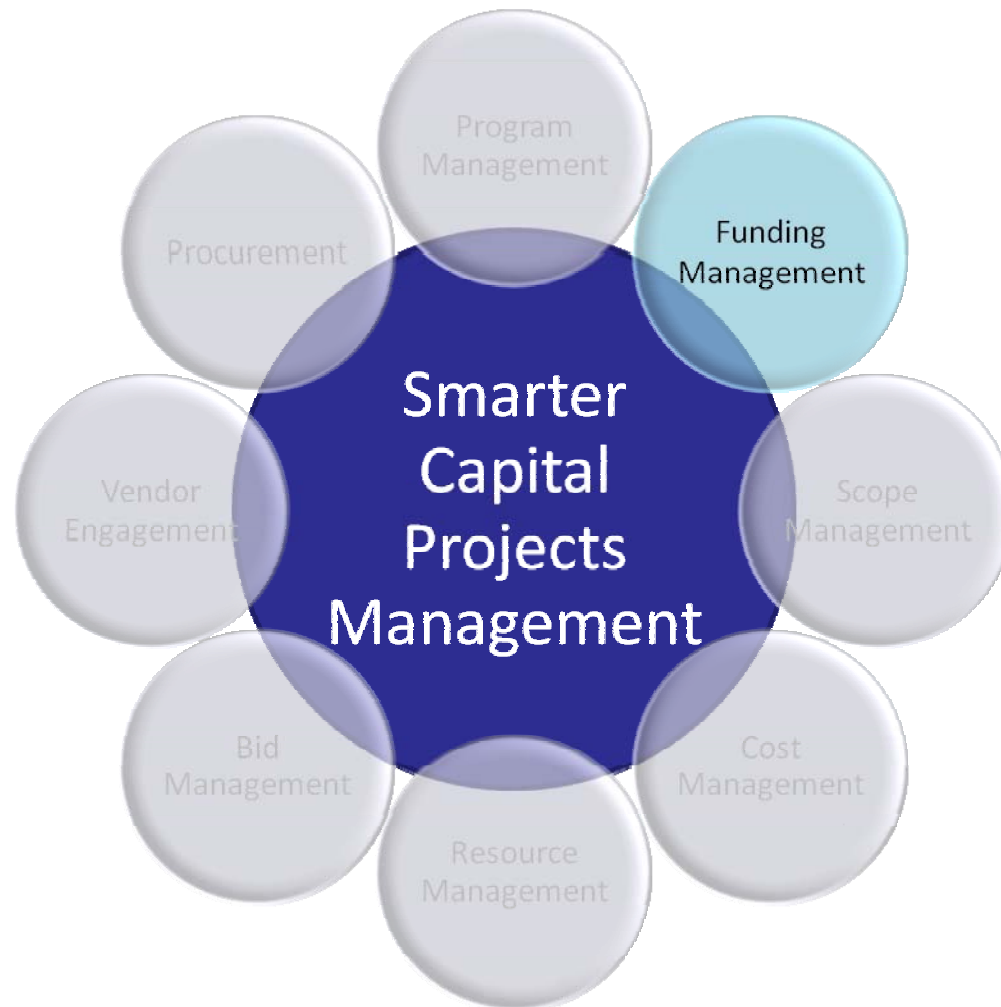

Create Programs

Analyze Funding Requests

Approve Projects

Allocate Funds

Funding Requests quantify costs and benefits to increase accuracy of project planning

Business Challenge

- Collect customer requirements
- Match requirements to current programs and funding

Key TRIRIGA Features

- Funding requests approval workflow
- Online opportunity analysis

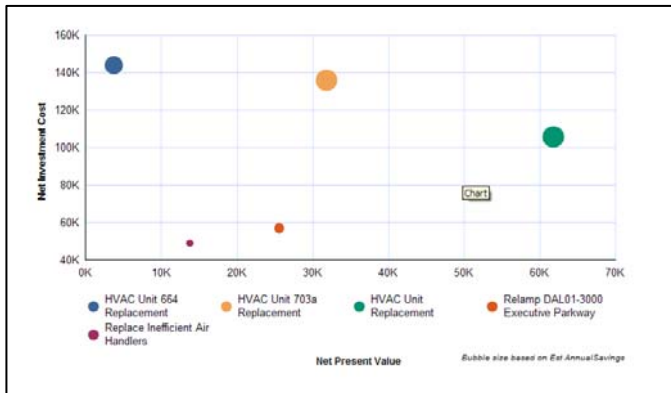

Deloitte automates project request process

Deloitte uses an extensive process for requesting projects before approvals. Their TRIRIGA project request process allows their Managers to determine scope and expense at a very low level before the Project can be initiated. This allows them to line up the third party resources earlier and allows the third party resources to better plan their resources.

Funding Requests quantify costs and benefits to increase accuracy of project planning

Critical-path schedules focuses resources to deliver programs and projects on-time

Business Challenge

- 54% Finish Behind Schedule
- Finish projects on time consistently by responding to potential delays early

Key TRIRIGA Features

- Critical path dependencies predict downstream impact of upstream schedule changes
- Templates increase compliance with best practices

Starbucks increases store revenues by opening stores faster

The Starbucks Store Delivery team recognized their impact on store revenue by focusing on shortening the timelines from site selection to first cup of coffee. Leveraging TRIRIGA's template based critical path scheduling and automated task assignments, they were able to shorten projects schedules by weeks.

Critical-path schedules focuses resources to deliver programs and projects on-time

Integration to MS Project

Improve budget processing with automated approvals and on-line/offline data collection

Business Challenge

- Creating accurate budgets
- Manage plan, commitments, commitment changes and actual

Key TRIRIGA Features

- Detailed line item budgets
- Transaction based updates to commitments and actual
- Integration to ERP

OPUS improves budget process and accuracy with TRIRIGA offline forms

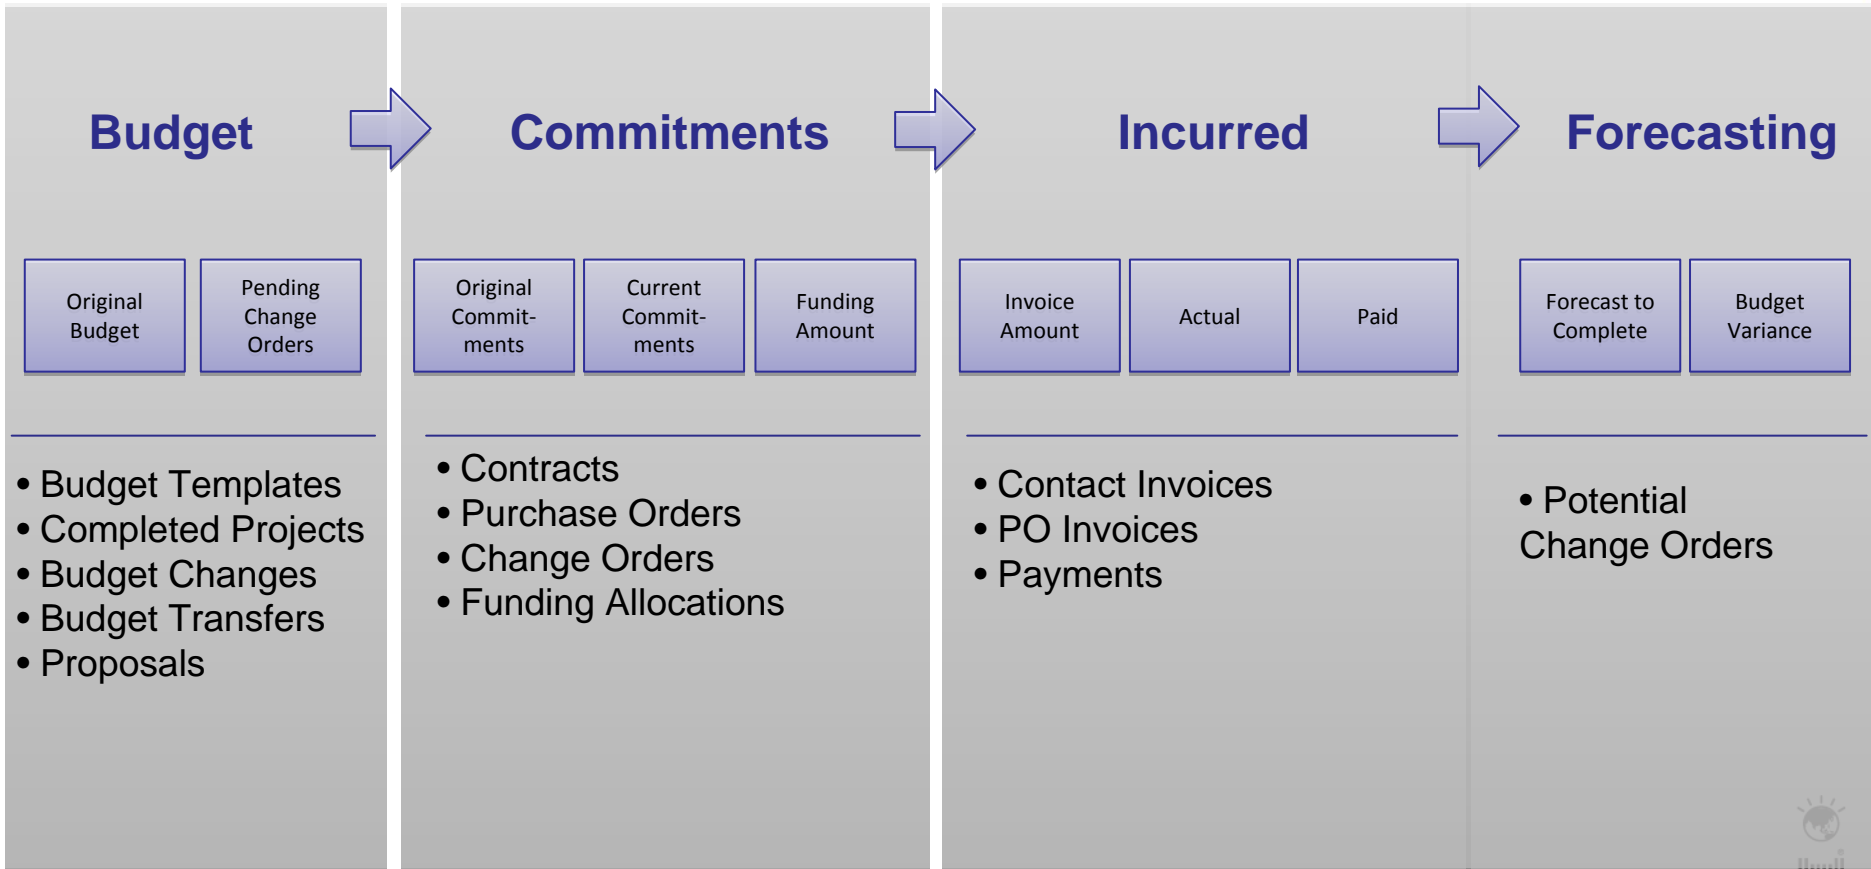

Leveraging TRIRIGA Offline, OPUS created budget forms in excel that the project manager can use to create their budgets. This offline process allows the PM to collect accurate data at the site and submit it back to the system via email to get approved.

Improve budget processing with automated approvals and on-line/offline data collection

Effective resource management maximizes personnel utilization

Business Challenge

- Streamline matching of tasks with resources
- Report on resource workload

Key TRIRIGA Features

- Automated role based assignment quickly communicates new assignments to resources
- Resource workload reports help mitigate conflicts and bottlenecks

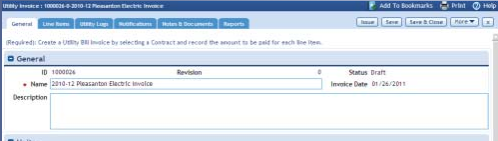

UC Irvine reduces task notifications from days to instant access

By leveraging TRIRIGA Templates and automated task assignments, UC Irvine improved service delivery. Project task assignments that took from 1-3 days to process are now done instantaneously.

Effective resource management maximizes personnel utilization

Task template specifies role

Task Template 

Specified Roles 

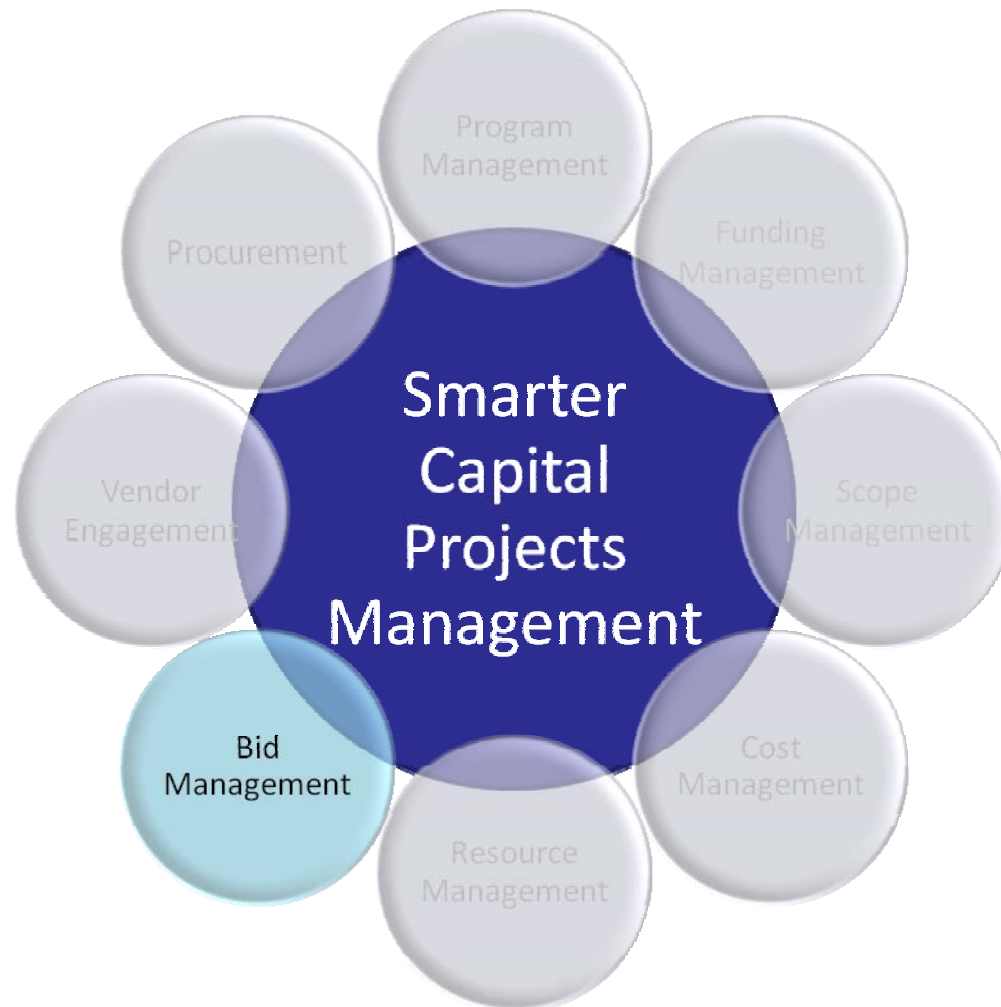

System looks up role in the project contacts and assigns each task to an individual

Notification of new assignment sent via email and TRIRIGA Portal

Reports and Graphs measure resource workload

Automated bid responses eliminate data entry, improves quality and shortens project timeline

Business Challenge

- Communicate efficiently with vendors
- Compare and award proposals
- Efficiently generate contract data

Key TRIRIGA Features

- Online vendor portals and offline forms facilitate electronic interaction
- Vendor performance metrics

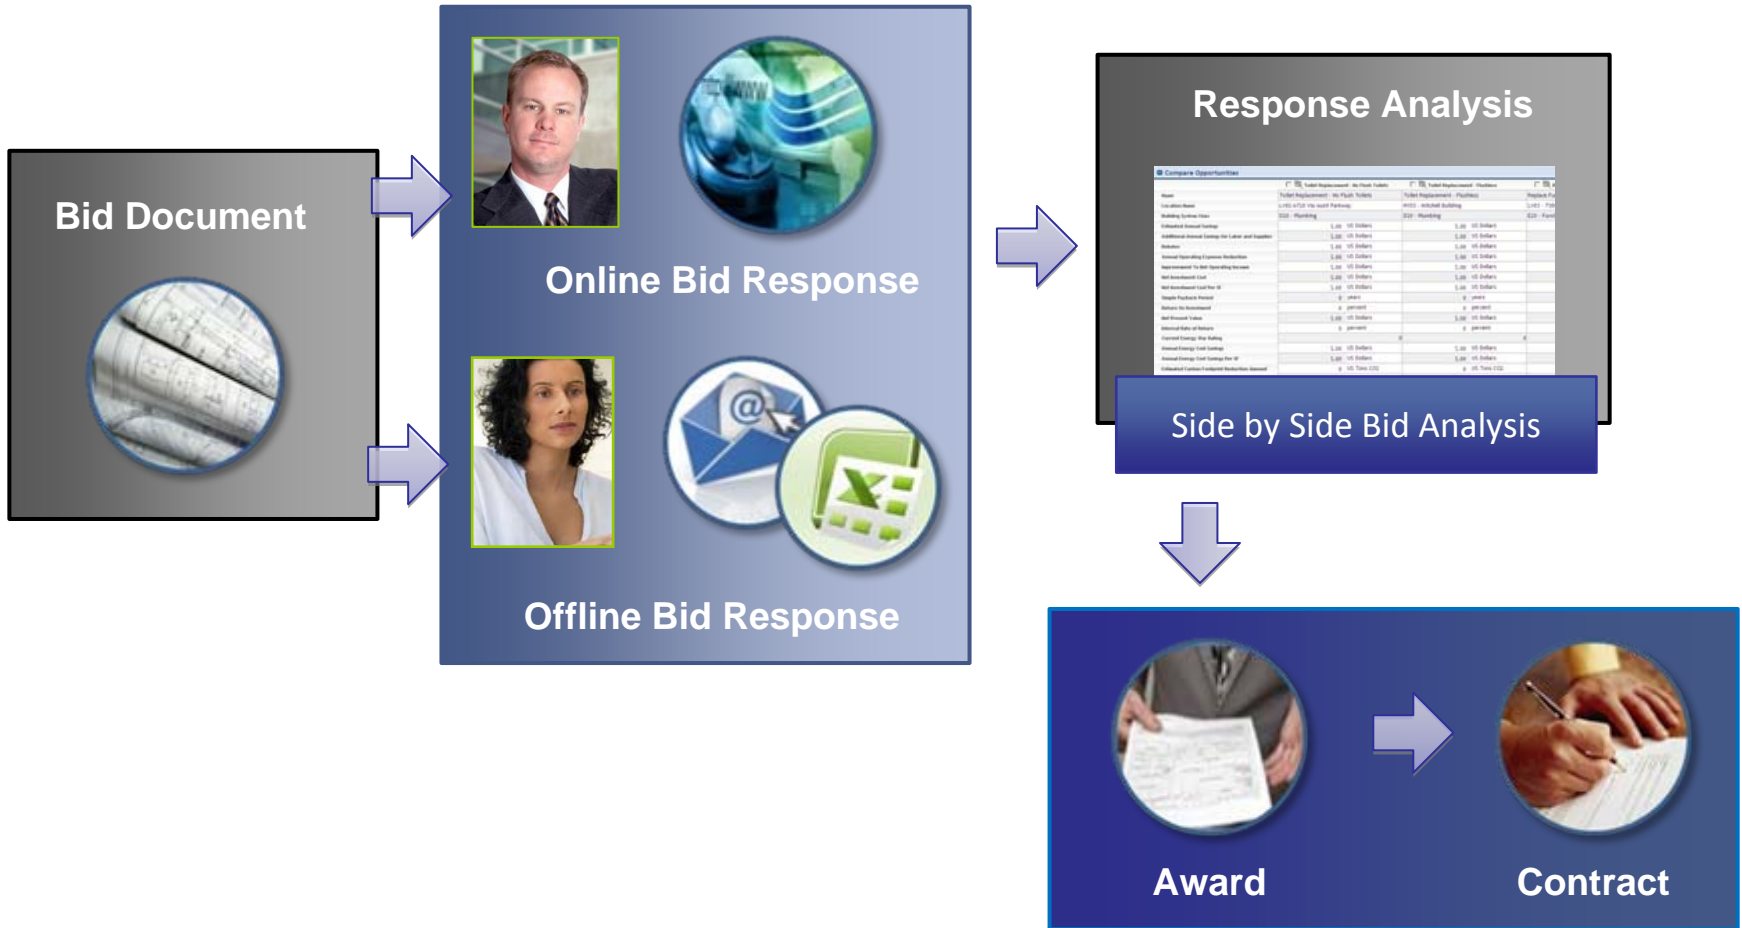

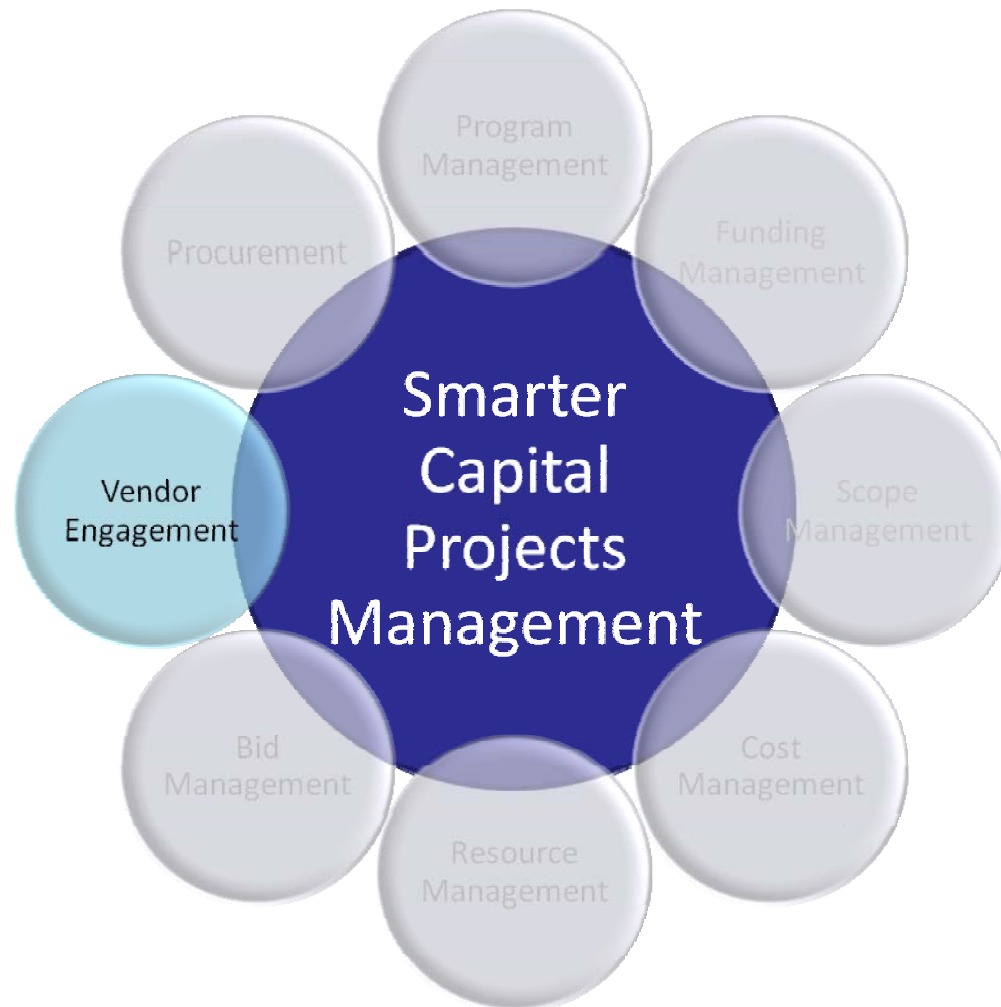

Canadian Tire reduces store construction schedule by 8% allowing stores to open sooner and generate revenue

Canadian Tire utilizes the TRIRIGA Offline feature for vendors to submit bids. This shortens their cycles by days. Automated this process alone saved days off their store construction schedule, turning the store into a revenue producer sooner.

Automated bid responses eliminate data entry, improves quality and shortens project timeline

Vendor management controls increase contract compliance to reduce costly schedule delays

Business Challenge

- Manage contract fulfillment, billing and payment
- Manage vendor performance

Key TRIRIGA Features

- Online invoicing and retention
- Vendor performance metrics

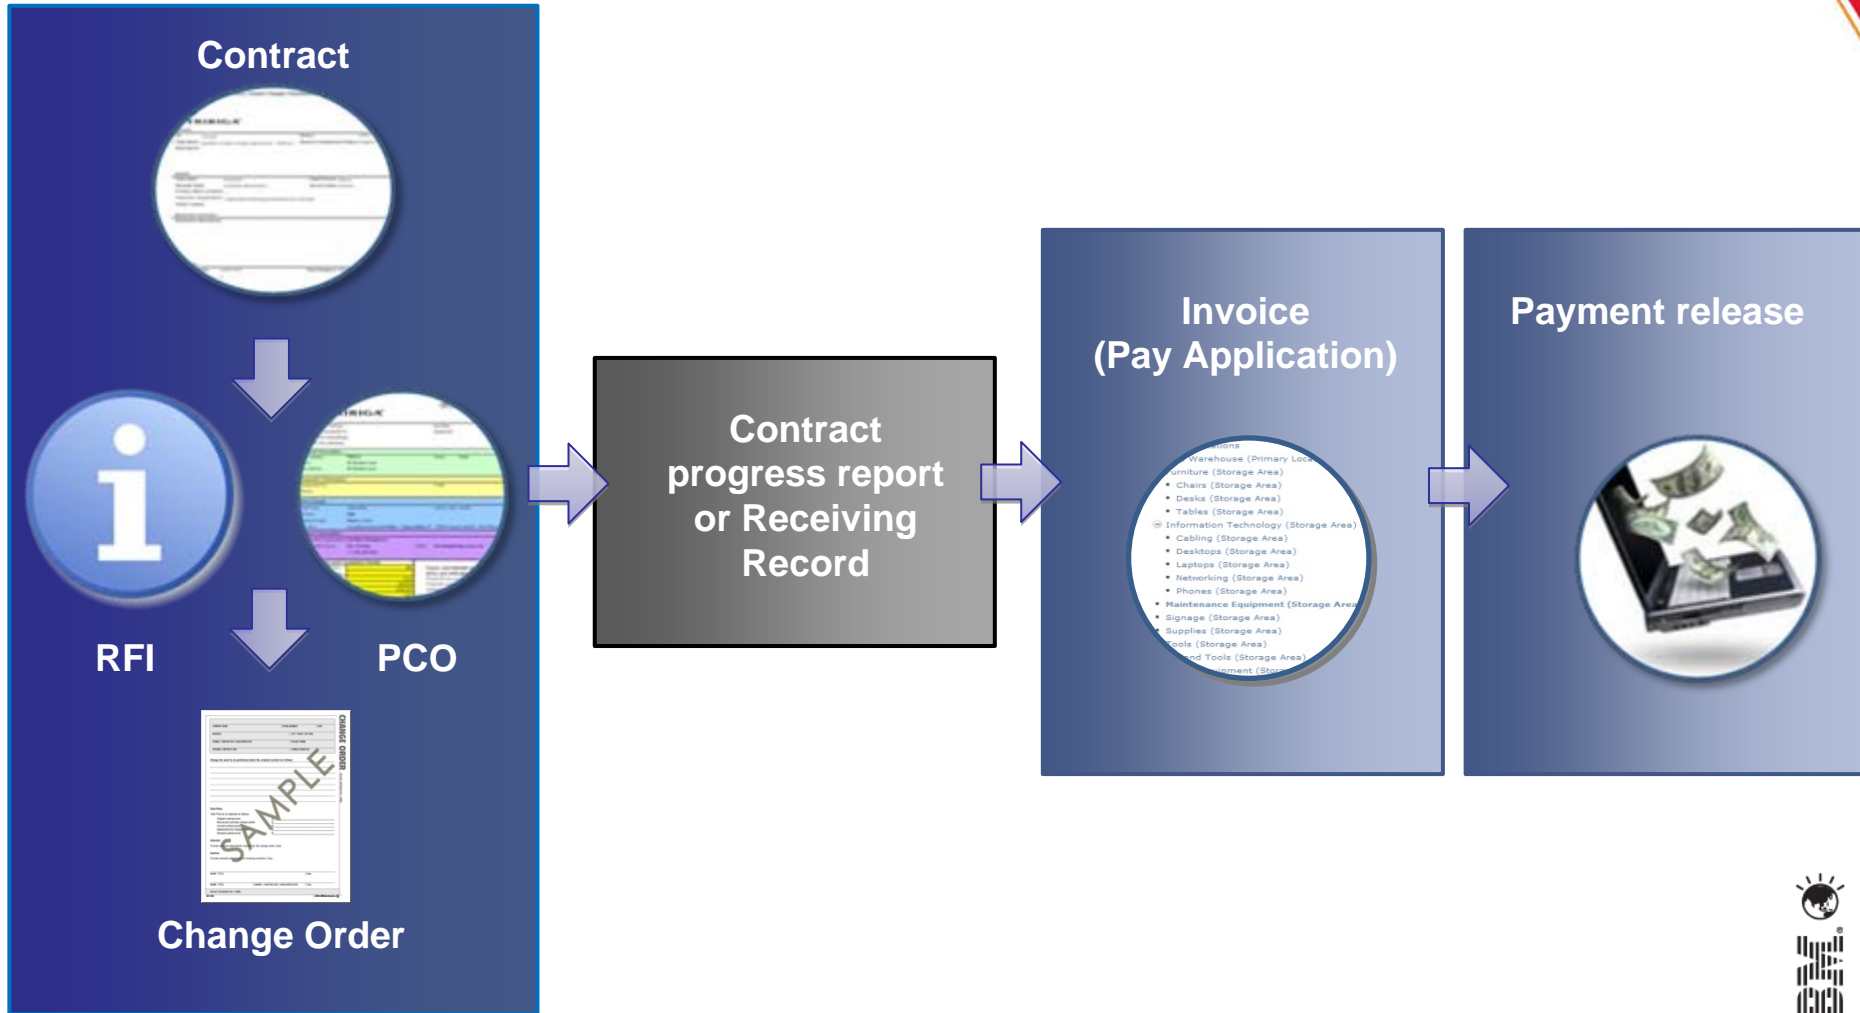

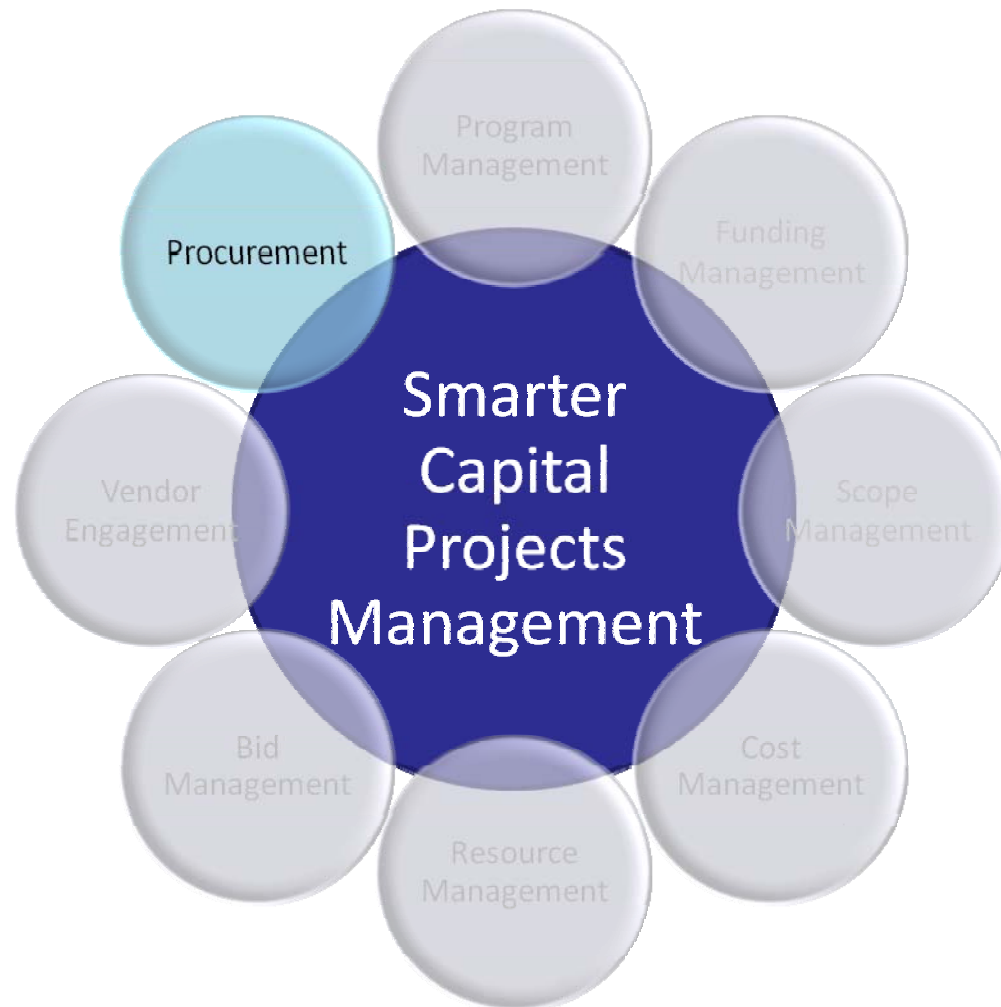

Ontario Realty Corporation leverages over 20 off-line forms for vendor project updates

Ontario Realty Corporation utilizes over 20 TRIRIGA Off-Line (excel) forms that their vendors use in continually updating their project Management activities provided on an outsourced basis for the ORC

Vendor management controls increase contract compliance to reduce costly schedule delays

Managing the full procurement life-cycle helps eliminate errors and insures proper accounting

Business Challenge

- Keep control of orders from proposal, contract, receiving, invoice and payment.

Key TRIRIGA Features

- Embedded contract and change order controls reduce risk of project schedule overruns

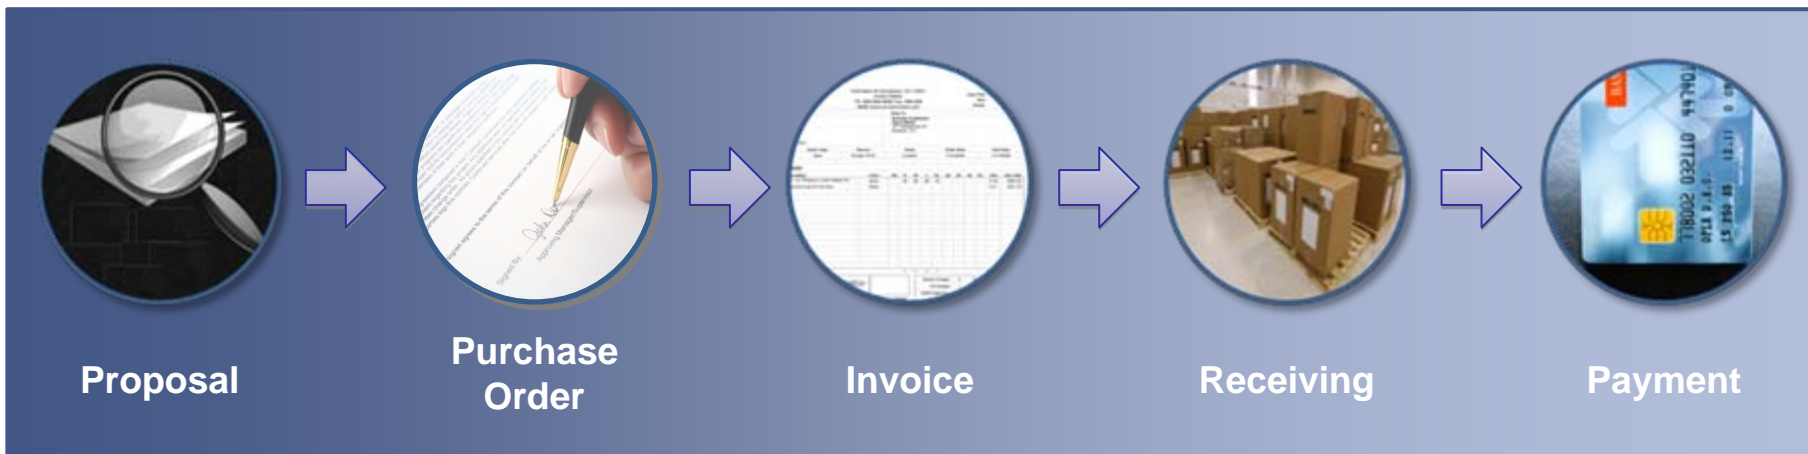

Grainger maximizes inventory delivery efficiencies

Grainger manages inventory of parts very carefully in their distribution centers. By using TRIRIGA to track inventory, process orders, and track inventory receipts, they are able to maximize the efficiency of inventory delivery, and be aware of inventory discrepancies that could indicate inappropriate use of inventory.

Managing the full procurement life-cycle helps eliminate errors and insures proper accounting

TRIRIGA Capital Projects.... The net benefits

Complete Projects on Time	Use schedule and task management tools and critical path scheduling	Decrease project cycle time by 5-10%
	Increase productivity through improved document and contract management, schedule automation, and invoice and budget management	
	Reduce schedule delays through increased visibility into and global oversight of all project costs, schedules, assets, contracts, vendors and supplies	
Reduce Construction Costs	Support construction and financial reporting with end-to-end budget and cost management tools	Reduce construction costs by 3 - 5%
	Improve budget controls with Change Management capabilities	
	Increase efficiency and minimize errors with Vendor Bidding and Payment Management tools	
Streamline Resource Management	Assign resources based on availability and skills	Decrease labor costs by 4 - 8%
	Track vendor performance	
	Reduce errors and increase productivity with document and contract management tools	

So if you don't want your next project to look like this....

Or this.....

Or Face this.....

Or do this.....

We need to have a talk about what
IBM TRIRIGA can do for you!

Thanks

The customer examples described are presented as illustrations of how those customers have used IBM products and the results they may have achieved. Actual environmental costs and performance characteristics may vary by customer.

Information concerning non-IBM products was obtained from a supplier of these products, published announcement material, or other publicly available sources and does not constitute an endorsement of such products by IBM. Sources for non-IBM list prices and performance numbers are taken from publicly available information, including vendor announcements and vendor worldwide homepages. IBM has not tested these products and cannot confirm the accuracy of performance, capability, or any other claims related to non-IBM products. Questions on the capability of non-IBM products should be addressed to the supplier of those products.

All statements regarding IBM future direction and intent are subject to change or withdrawal without notice, and represent goals and objectives only.

Some information addresses anticipated future capabilities. Such information is not intended as a definitive statement of a commitment to specific levels of performance, function or delivery schedules with respect to any future products. Such commitments are only made in IBM product announcements. The information is presented here to communicate IBM's current investment and development activities as a good faith effort to help with our customers' future planning.

Performance is based on measurements and projections using standard IBM benchmarks in a controlled environment. The actual throughput or performance that any user will experience will vary depending upon considerations such as the amount of multiprogramming in the user's job stream, the I/O configuration, the storage configuration, and the workload processed. Therefore, no assurance can be given that an individual user will achieve throughput or performance improvements equivalent to the ratios stated here.

Prices are suggested U.S. list prices and are subject to change without notice. Starting price may not include a hard drive, operating system or other features. Contact your IBM representative or Business Partner for the most current pricing in your geography.

Photographs shown may be engineering prototypes. Changes may be incorporated in production models.
