cubewise

Customer Success Stories

Mid Market Companies...

... have many of the same challenges as enterprise clients

- Multiple GLs
- Would like to do operational planning
- Have a reliance on operational system reports
- Have multiple, “point” solutions
- Multiple countries and currencies are normal

The Challenge

- Decisions made were more “Art” than “Science”
- Transactional reporting was very cumbersome
- No vision of Retail Analytics
- Massive cost in “dormant” inventory

The Solution

- Huge ROI and business turnaround from:
 - Product Range Optimisation
 - Ideal Labour Model
 - Inventory Management
- Understanding Retail Analytics is at least as important as having the right technology.

The Challenge

- Different levels of data thru the value chain
 - Manufacturer
 - 3PL
 - Retail (majority franchise)
- Don't own the data – reliance on business partners
- Need to stay lean and agile

The Solution

- Xcelerator for financial reporting / planning
- Xcelerator Information Warehouse for full flow of product / margins thru the value chain.

The Challenge

- Financial Reporting & Planning
 - 3 reporting standards
 - Complex modeling for planning
- Operational reporting
 - Large data volumes
 - Claims triangulation in massive XL models

The Solution

- Integrated Xcelerator Information Warehouse from DW – now by Product & Class
- Xcelerator for financial reporting / planning
- Advisor for Operational reporting
- Fast / Accurate / XL replacement for accountants / actuaries / management

The Challenge

- Acquisitions over the years have led to fragmented and complex reporting
- Forecasting and Budgeting clunky and error prone
- Data Warehouse solution is a “sledgehammer”

The Solution

- Drive accountability through a reliable and accurate Excelerator solution
- Consolidate multiple GL systems into a single view of the business
- Develop a centralised, managed forecast

The Challenge

- Very cost conscious
- Ease of use is key
- Data Warehouse is out of the question

The Solution

- Xcelerator for financial reporting
- Xcelerator for analysis of rosters / sizes and profiling of child care centres

The Challenge

- Very tight margins
- Need for a highly flexible tool
- Avoidance of a data warehouse
- Ease for end users to create reports

The Solution

- Unlocking dormant data
- KPI reporting on 70,000 security shifts each month by company, state, customer and site
- Incorporating operational information as part of the forecasting has had immense business benefit.

IBM Cognos Express

Easy to Install

Pre-configured solution includes everything required for simple deployment and management
