The Use of Scorecarding to Develop Reporting Metrics

Joy Tracey
Mathew Cooper
Animal Health Board

The Animal Health Board (AHB)

Who are we?

- The Animal Health Board is an Incorporated Society and a management agency under the Biosecurity Act 1993
- The Regulatory Authority responsible for managing and implementing the National Pest Management Strategy (NPMS) for bovine tuberculosis (TB)
- Funded by The Crown, Regional Councils, and Beef, Dairy, Deer Industries
- Not for profit with any surplus funds held on behalf of the Industry funders

The Animal Health Board (AHB)

What do we do?

- The AHB carries out activities necessary for Strategy implementation including:

	\$m
Vector Control wild animal pest (vector) control using toxins and traps	\$55m
Disease Control control of the movement of cattle and deer management and testing of cattle and deer	\$20m
funding of research	\$2m
other activities	\$5m

Australian View - Possum

- Protected
- Cute
- Small (normal size)

New Zealand View – Possum

- No. 1 Pest
- Introduced 1837 for fur trade
- Thrive in NZ conditions
- Threat to NZ forests and birds
- Obese 8-12kg
- Non Protected
- Please come and take them home!

The Building Blocks

What did we have?

**Technical Data
Disease dbase**

**Operational Data
Vector dbase**

**Financial data
GL**

- Data rich but information poor

The need for Change

Step 1 - TM1

- Financial requirements driven
 - Poor reporting, static reports, data trend analysis manual, adhoc reporting difficult
- Planning and reporting efficiency
- Change in organisational structure
 - Organisation grown from 20 staff in 2004 to 100 staff 2008
- Requirement for effective non-centralised reporting
 - Head office plus 5 main regional offices, a further 4 satellite offices
- Efficient, simple budget templates and consolidation
 - Manual spreadsheet collection and consolidation frustrating and time consuming

The need for Change

Step 2 – Executive Viewer

- Organisational internal reporting driven
 - A living tool for active display of key data
- Need for simple key measure capture
 - **THE CHALLENGE**
- Effective means of combining financial and operational data
 - Ability to combine data from operational and financial sources
- Method to repeatedly / reliably update complex multi source information
 - A means to rapidly refresh data for time period comparison

Traditional Performance Measure

NPMS Period Prevalance
2001 Projections & Actual Annual Period Prevalance

Next Steps

- Expand the historic single measure focus
- Identify OTHER key drivers
- Clearly establish current position
- Link data sources to gather required information
 - Not all information held in required formats
 - Related data held in separate systems
 - Establish reproducibility of data
- Plan revised NPMS key reporting measures

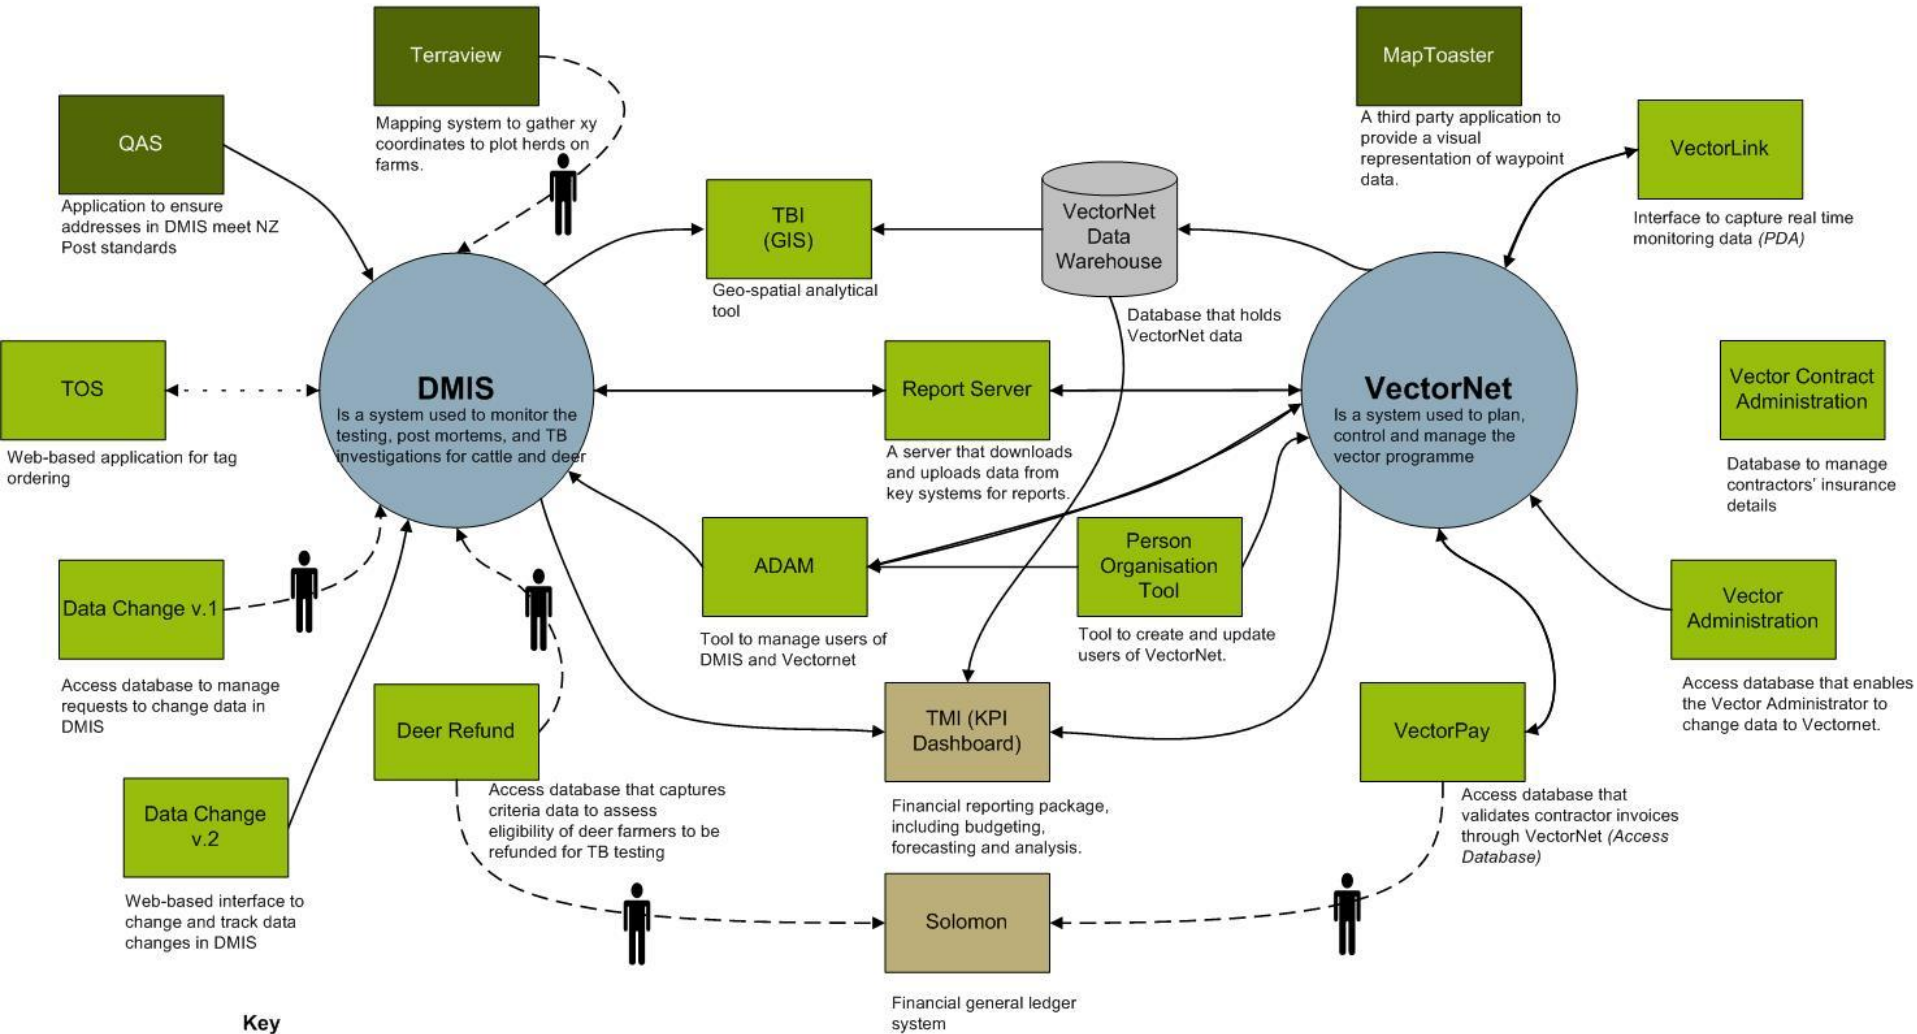

New HARDCOPY Summary Performance Report

Transfer to External Dashboard

- The TM1 Executive viewer dashboard is an internal management tool
 - A live update resource used to monitor operational performance
 - It provides monthly, quarterly and annual measures
 - Includes many different area key measures
- The Annual report presentation is a single external event
 - Reports few high level key measures
 - Static annual display
 - Strategic NMPS measure

Total VRA & VFA in New Zealand

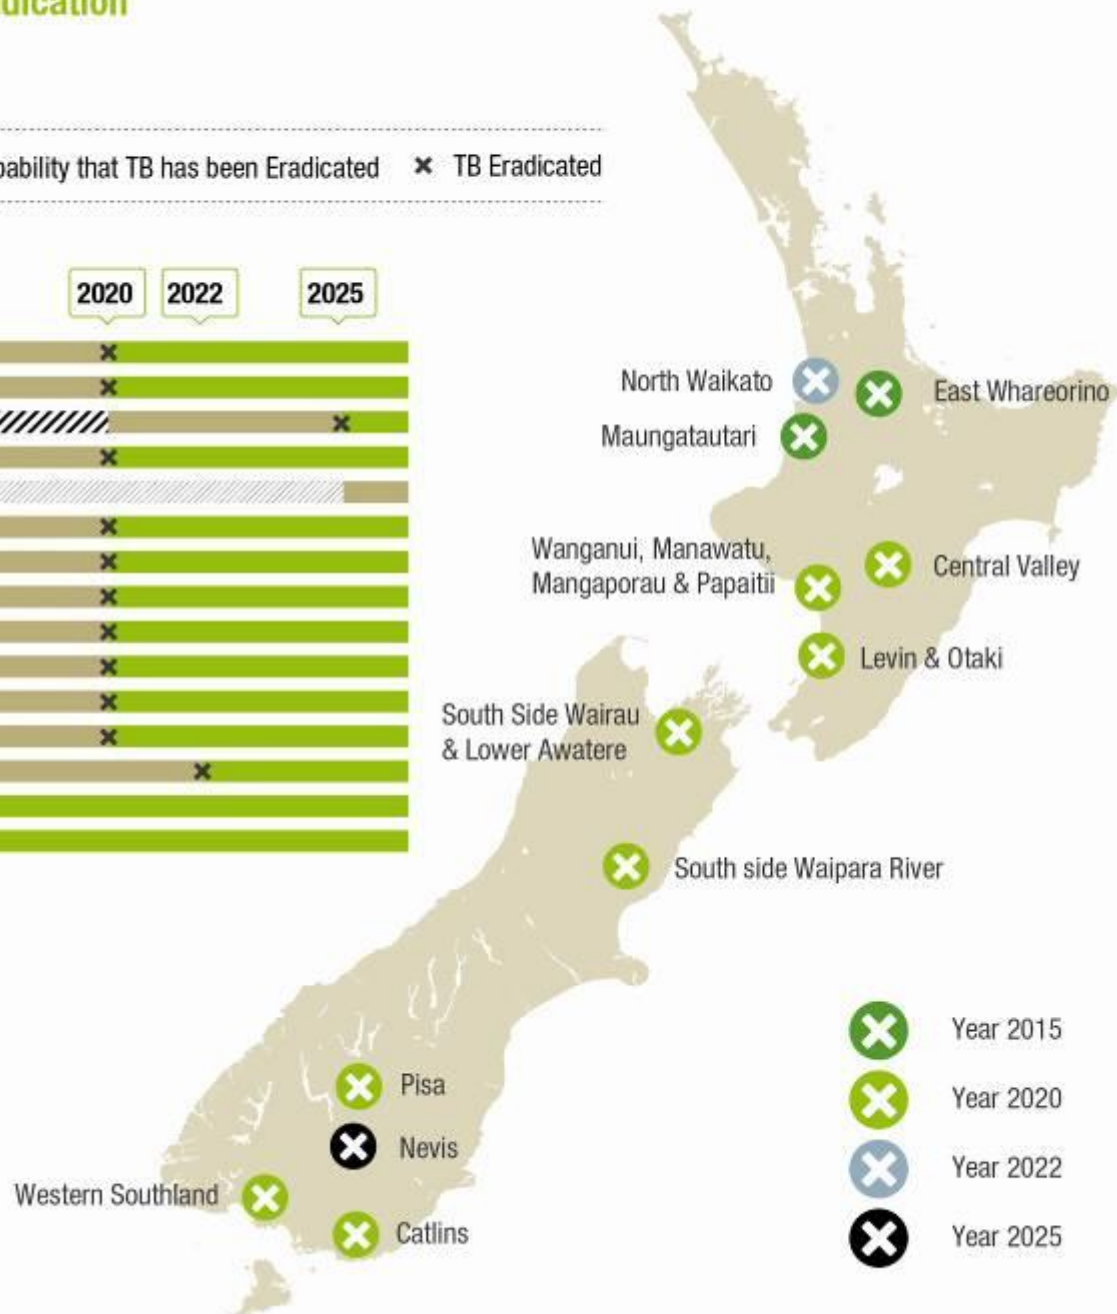

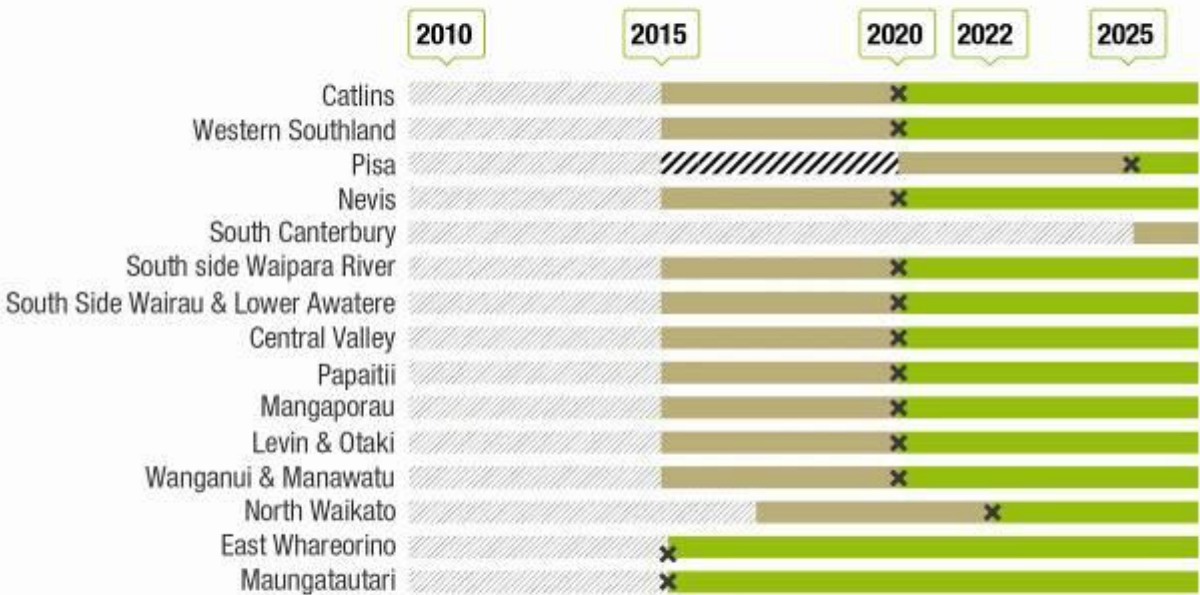

New Zealand is total of 26 million hectares

2.5 million hectares targeted for eradication of TB by 2026

Small Vector Risk Areas envisaged date of TB eradication

 ≥ 90% Probability that TB has been Eradicated
  ≥ 95% Probability that TB has been Eradicated
 ✕ TB Eradicated

 Year 2015
 Year 2020
 Year 2022
 Year 2025

Other IBM Cognos TM1 Add-ins

- Vector Reconciliation “Package”
 - Audit need to reconcile VectorPay system to General Ledger \$55m pa
 - High Integrity – menu driven
 - Reliable performance
 - Support staff processed
 - Finance staff review

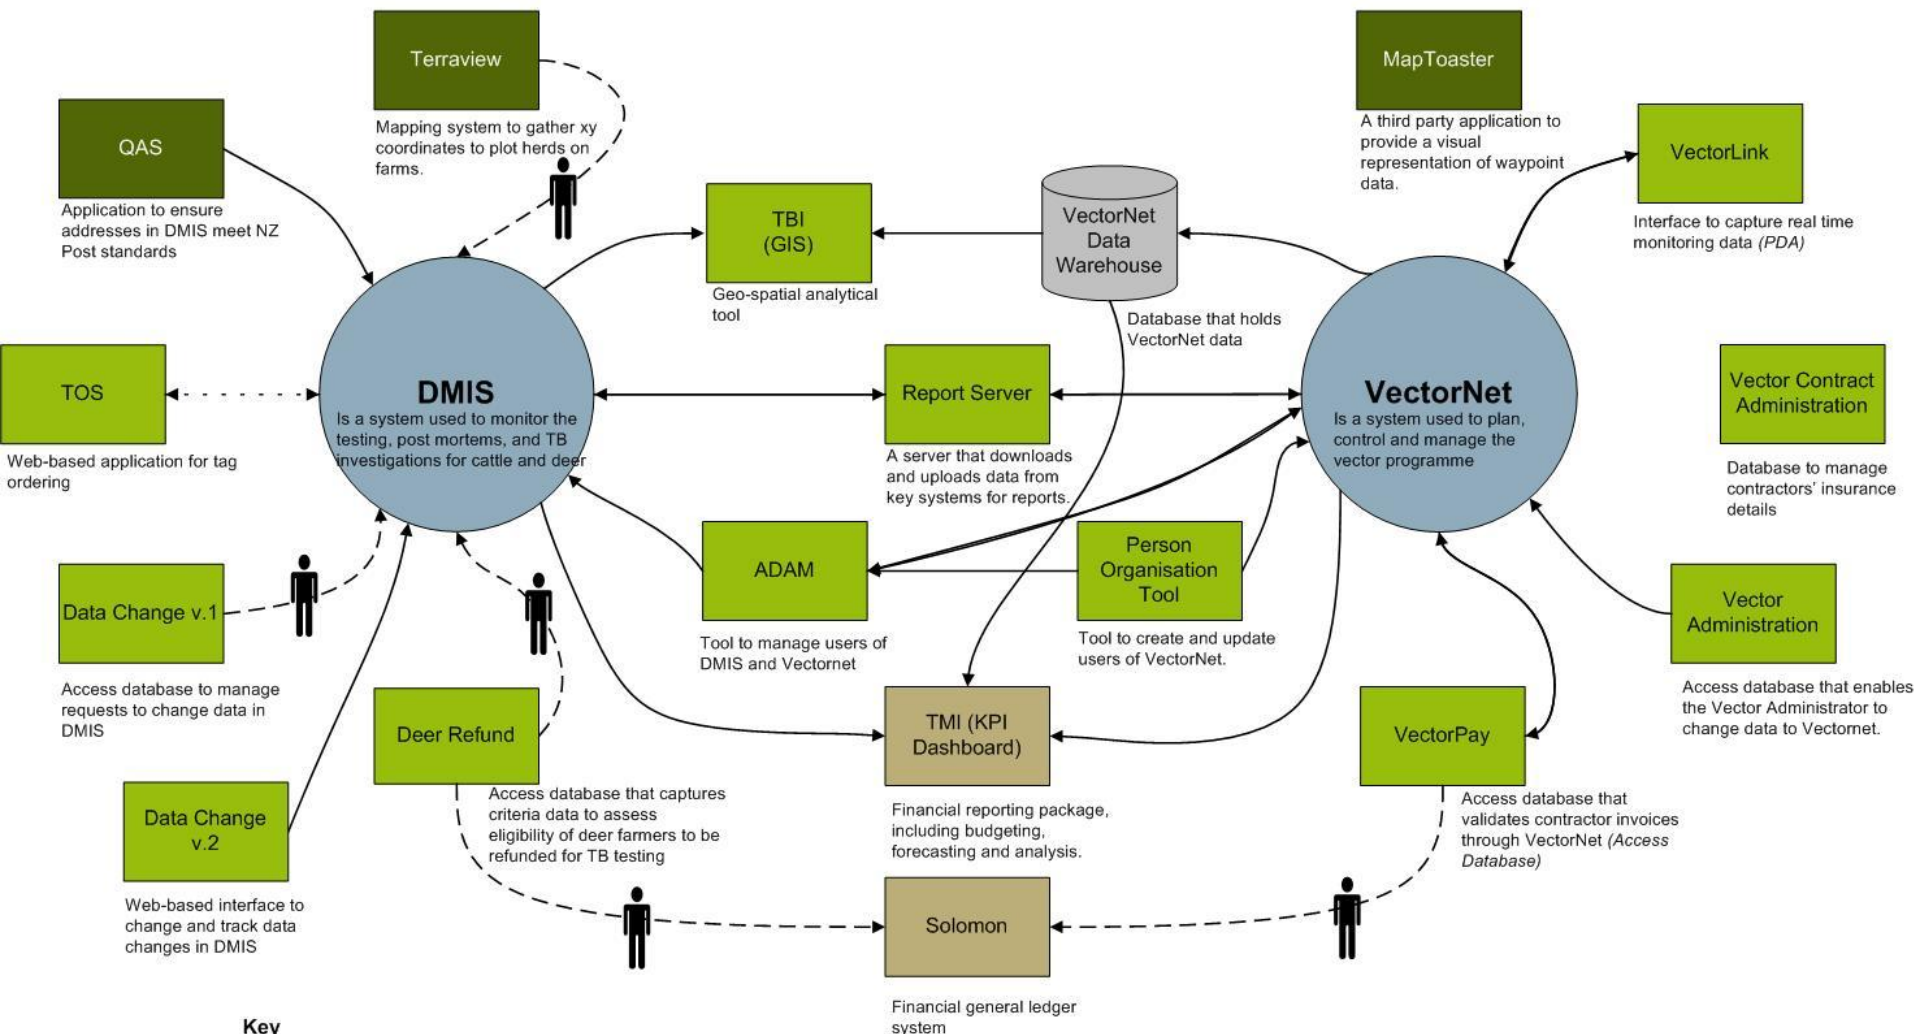

AHB IT Systems

Illustration of the core IT systems that enables the AHB to achieve their strategy objectives, along with how the systems inter-relate.
