This is why we are important!

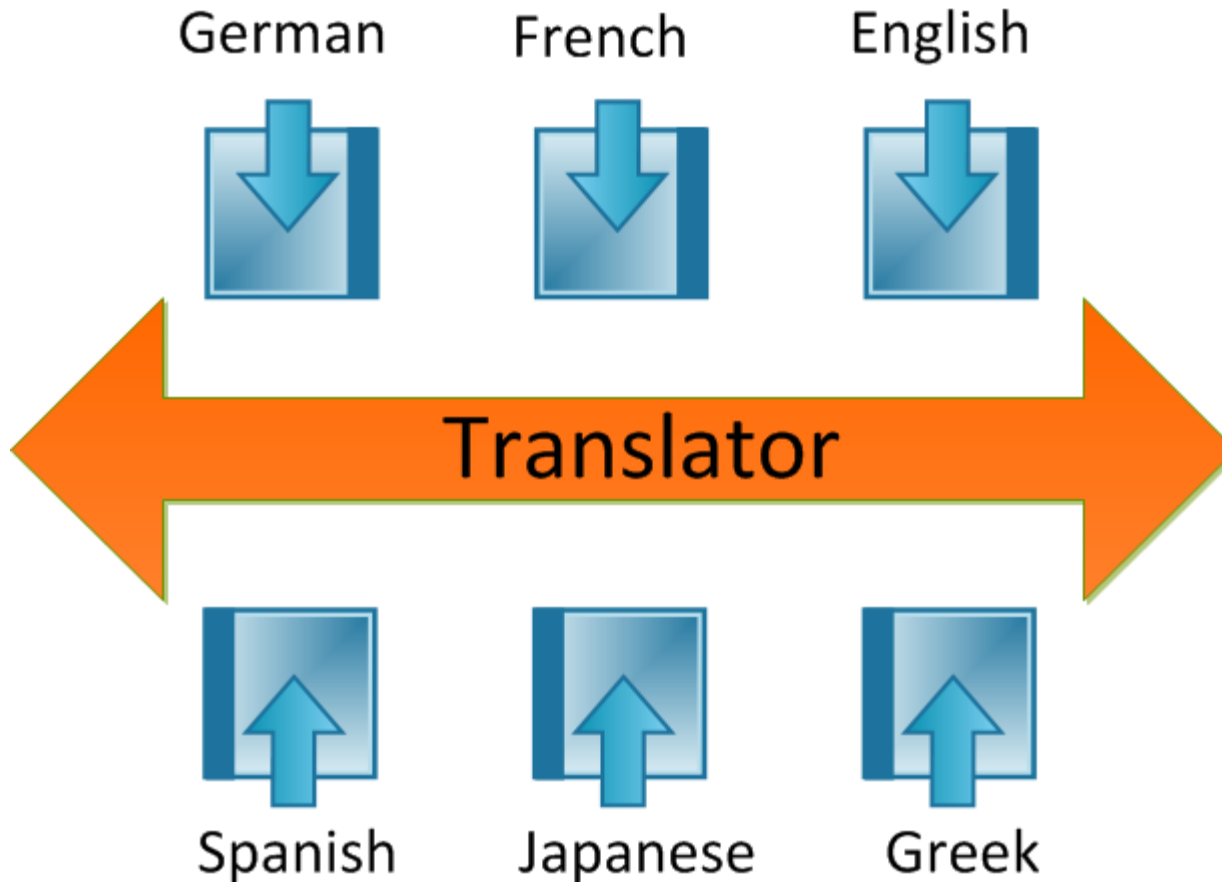

This is what we do

We are the integrators

This is what we do

We can translate your messages

Sowhy DataPower

What problems were we trying to solve?

We had a legacy B2B platform that needed replacing

Provide a self service solution for our customers

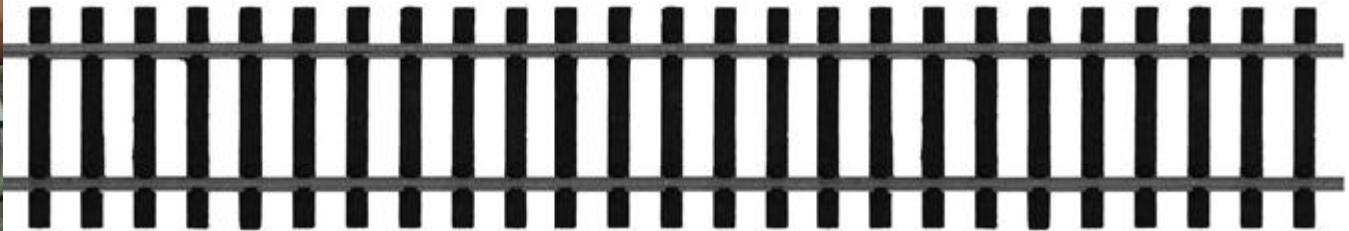

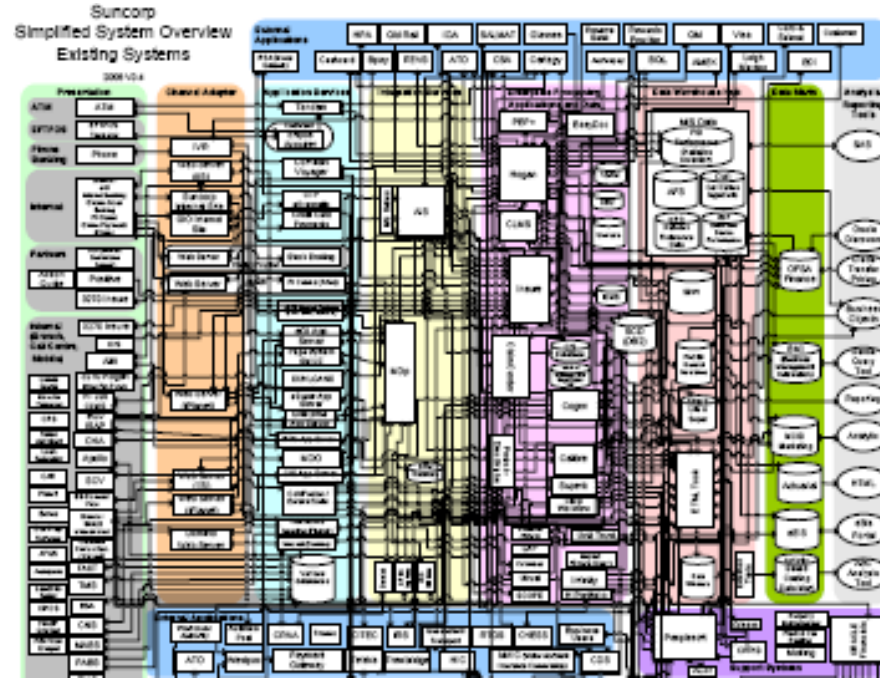

We needed to increase our productivity

The Journey Begins

Complex, Expensive, Slow

The Journey Continues ...

Continuous Solution Improvement

Where to now?

The Cloud

- Why cloud computing?
- Public or private cloud?
- Where do we fit in?
- Are we a consumer of cloud services?
- Are we a provider of cloud services (PaaS) ?

- We are already using cloud solutions internally

- IBM WebSphere Message Broker Hypervisor Edition
- IBM WebSphere DataPower Hypervisor Edition
- IBM Workload Deployer for Managing Private Cloud Deployments

Thank you
