

Innovate2011

The Premier Software and Product Delivery Event

 **Software. Everywhere.**

Software-driven Innovation

What Hinders Innovation?

In our customer's words

Evolving Business Models

"I need to transform product development to be more collaborative while removing redundant activities."

Increasing Product Complexity

"I need for mechanical, electrical, and software engineering to all be on the same page."

Extension of the Enterprise

"I need a way for all my design and supply partners to participate in a unified process for product development."

Disconnect with Operations

"I need to ensure that the products I build can be profitably supported and maintained over their lifetime."

IBM Software Group's Agile Transformation

Software and systems delivery

Integrate

- Common architectures
- Outside in design
- Process and tools
- Reuse
- Componentisation

Collaborate

- Open, common platform
- Whole team shared objectives
- Vibrant communities of subject matter experts

Optimise

- Economic governance
- Measured improvement (revenue / headcount)
- More efficient operations
- New product investment

Rational Transformation

Improved Efficiency Means More Innovation

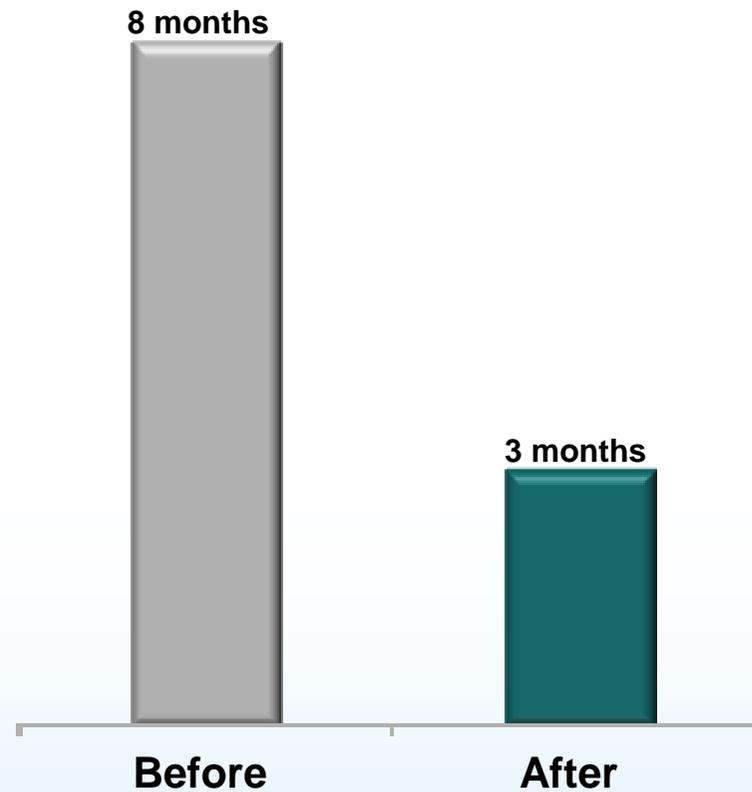

Efficiency Measures	2006	2011
On time delivery	47%	95%
Defect backlog in months	>9	2.7
Beta defects fixed before GA	3%	95%
Agile / iterative projects	5%	85%

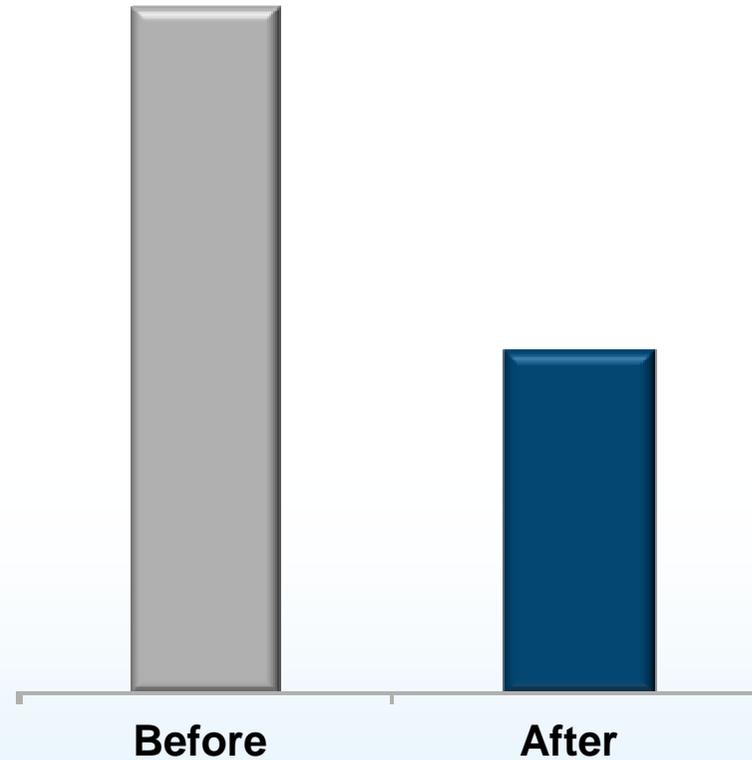

Innovate2011

Cut delivery
cycles by
5
months

Danske Bank

Cut
time-to-market
by more than
50
percent

How did these teams improve their efficiency?

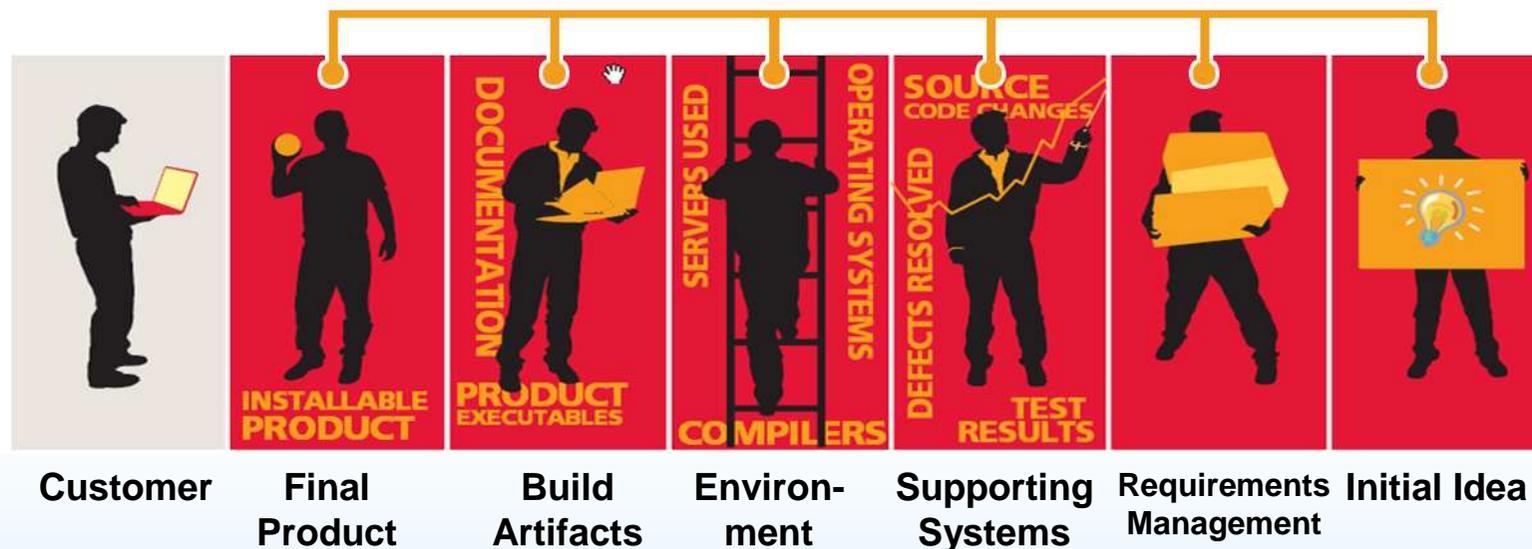

Imperative 1: Real-Time Planning

Imperative 2: Lifecycle Traceability

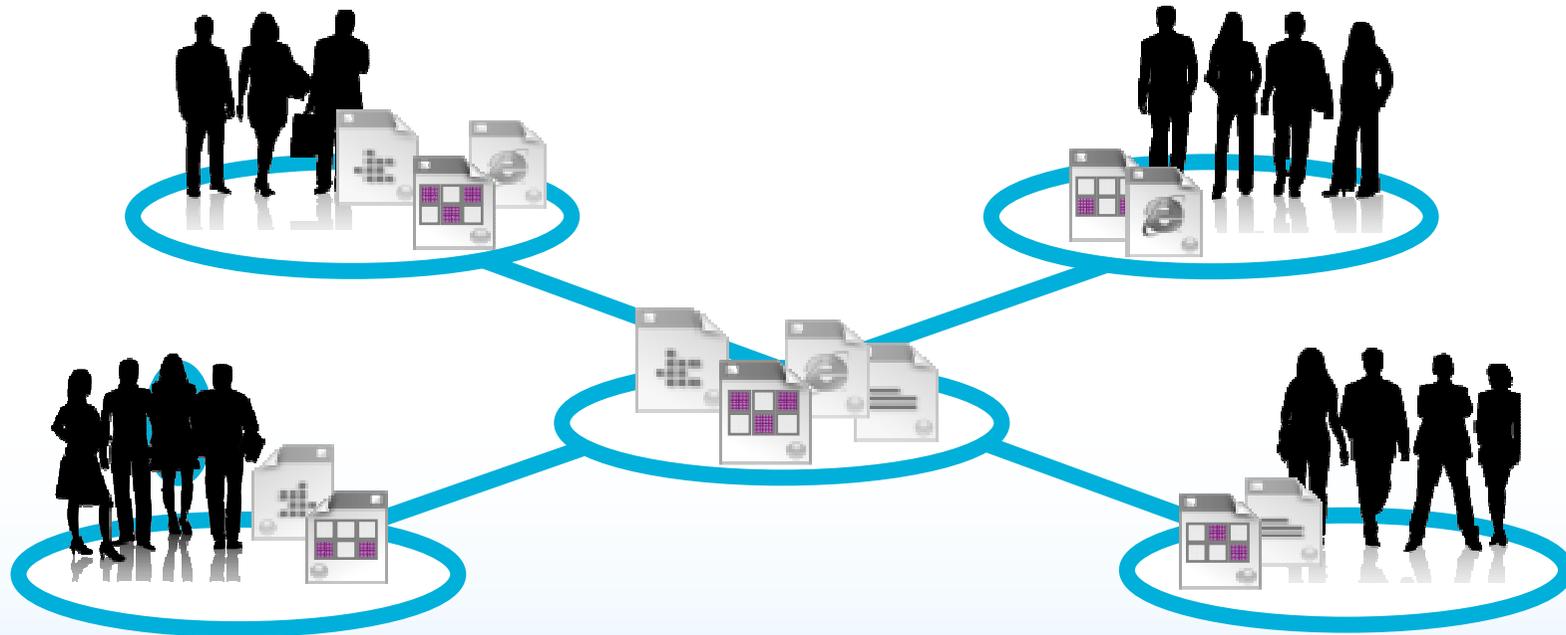

Instant access to details from any point in the development process

Innovate2011

 Software. Everyware.

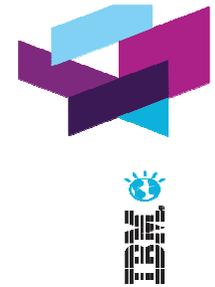

Imperative 3: In-Context Collaboration

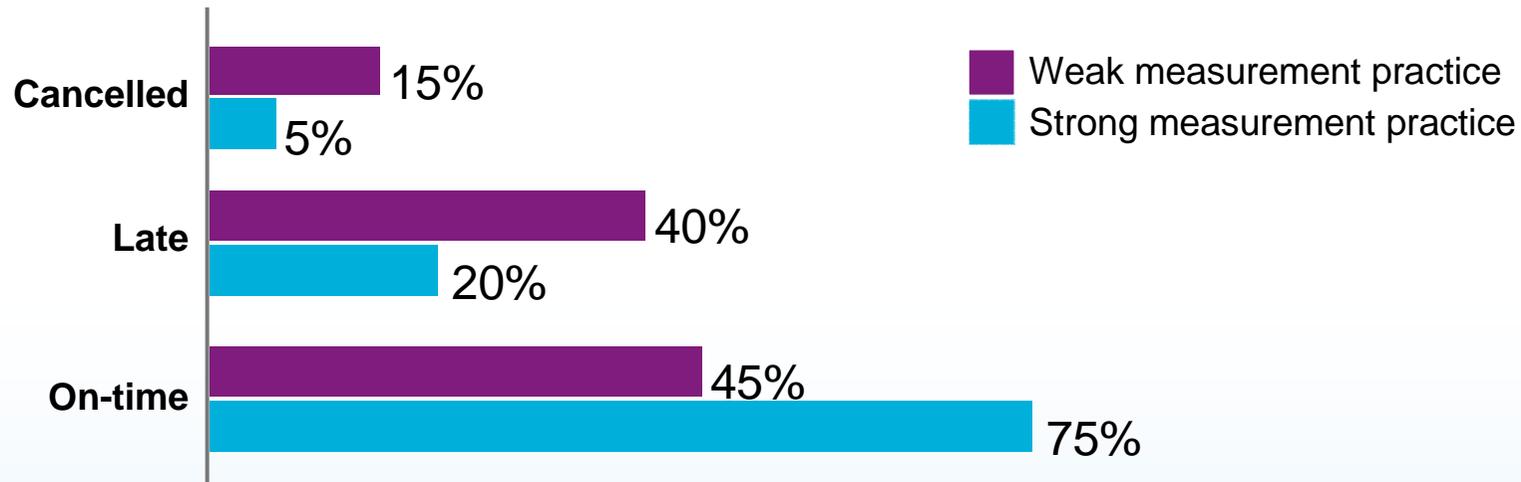

Innovate2011

 Software. Everyware.

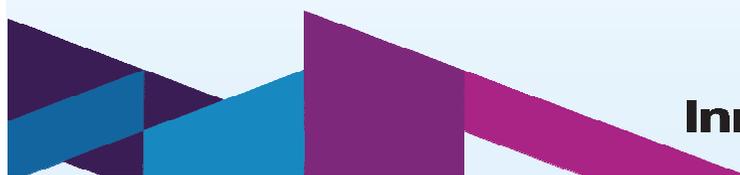

Imperative 4: Development Intelligence

Measurement Practices Impact Project Success

Source: Capers Jones, Measurement, Metrics and Industry Leadership, 2009 and [Software Engineering Best Practices](#), McGraw Hill, 2010.

Imperative 5: Continuous Improvement

“Successful analytics requires taking it beyond software and reporting, and into the realm of management practices and operations improvement.”

Information Management Online, February 23, 2011

Innovate2011

 **Software. Everywhere.**

The Five Imperatives of Application Lifecycle

Management Improve productivity 4-6% annually

1. Accelerate **time to delivery** with real-time planning
2. Improve **quality** with lifecycle traceability
3. Maximise **time to value** with in-context collaboration
4. Refine **predictability** with development intelligence
5. Reduce **costs** with continuous improvement

Rational Collaborative Design Management

Enhance cross-team collaboration on software and systems design

- Reduce cycle time by engaging all stakeholders and accelerating design review process
- Reduce complexity and increase flexibility with impact analysis and automated reporting

Innovate2011

 Software. Everywhere.

Rational Collaborative Lifecycle Management

Improve productivity across organisations, languages & platforms

- Real-time planning
- Lifecycle traceability
- In-context collaboration
- Development intelligence
- Continuous improvement
- Single install
- Robust educational content
- Best practice templates

Innovate2011

 Software. Everywhere.

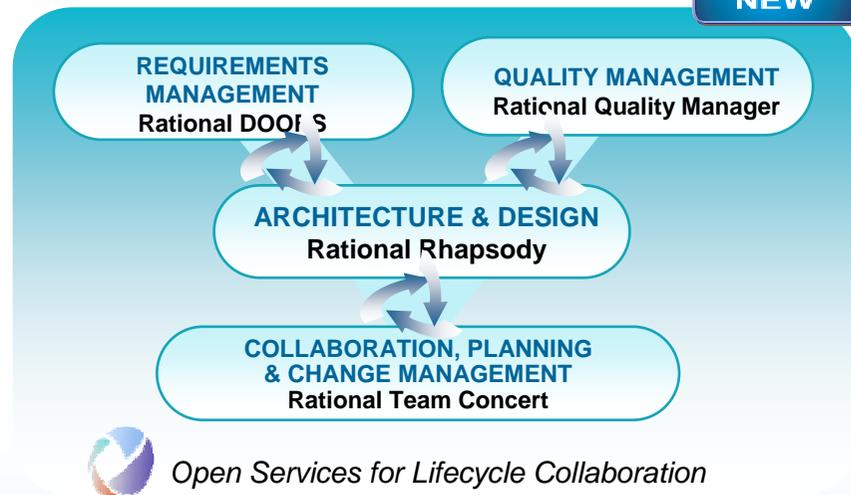

Rational Systems and Software Engineering

Use an end-to-end approach to build and validate complex products, systems and the software that powers them

NEW

- Practice library on demand
- Tool mentors
- Process execution templates
- Solution support to meet industry specific standards

Open Services for Lifecycle Collaboration

✓ *Integrated tools*

✓ *Automated workflow*

✓ *Proven practices*

✓ *Experts to help*

Innovate2011

Software. Everywhere.

IBM Collaborative Development & Operations

Transform your development-operations process

- Image management
- Workload optimisation
- End-to-end lifecycle automation
- Federated asset repositories
- Deployment planning and automation
- Collaborative incident management

Innovate2011
