

IBM CICS Transaction Gateway for OS/390 - README v3.1.0

Welcome to the IBM CICS Transaction Gateway.

This file contains important information about the IBM CICS Transaction Gateway that may not be available in the printed documentation.

In the following information <ctg-dir> refers to the directory in which you installed the Transaction Gateway.

Summary of Topics

=====

- Installation issues
 - Java Development Kit
- CICS Transaction Gateway SSL support and VAJ v3.0
- IBM NetStation support
- Service and Updates

Installation issues

=====

Java Development Kit

The Java Development Kit is required.

Version 1.1.8 PTF1 is recommended. See <http://www.s390.ibm.com/java> for details.

Please ensure that you are using build m118-19990911 or later.

IBM NetStation support

=====

Applets running within the JVM supplied with the NC browser fail to make successful connections with the CICS Transaction Gateway. Message number 6652E is returned to the Applet. Currently there is no solution to this problem.

CICS Transaction Gateway SSL support and VAJ v3.0

=====

When importing the CICS Transaction Gateway v3.1 classes into Visual Age for Java v3.0 you may be warned that a package containing `com.ibm.sslight.*` has been replaced. This is because the CICS Transaction Gateway ships with a later level of SSLight (SSL). Please ensure that this level of `com.ibm.sslight` remains available to your client application when developing with Visual Age for Java.

Service and Updates

=====

Service and updates will be made available via the Internet.

See:

<http://www.software.ibm.com/ts/cics/support/details>

Making ECI calls

=====

When making ECI calls, the length of the communication area (COMMAREA) passed to the ECI must not exceed 32 500 bytes.

APAR Fixes in v3.1.0

PQ27201 The Comma (,) is not allowed as a decimal point

PQ28840 TERMINAL SERVLET DOES NOT SUPPORT COLOR

PQ28843 CTG TERMINAL SERVLET HTML FIELD SIZE

PQ28312 CURSOR LOCATION SPECIFIED BY BMS PAGE IGNORED BY TERMINAL SERVLET

PQ30148 TERMINAL SERVLET DOESN'T ACCESS MULTIPLE SERVERS AS IT SHOULD
