软件开发高峰论坛

Rational software

开发的智慧 协作的力量

Jazz社区简介 (Jazz.net)

IBM Rational 朱育雄 (zhuyux@cn.ibm.com)

- 现场听众对jazz.net社区的了解情况：
 - 谁已经听说过了Jazz.net?
 - 谁已经访问过Jazz.net，或者进行了用户注册?
 - 谁曾经在Jazz.net的论坛上询问过问题？或者提交过缺陷报告？
- 本演讲包含下面内容：
 - 介绍Jazz.net网站，IBM为什么创建这个网站；
 - 介绍如何利用Jazz.net网站学习Jazz技术和Rational Team Concert (RTC) 产品，如何与Jazz研发团队进行交互；
 - Jazz.net功能展示；

- **Jazz.net 是一个网站...**

- 提供了Jazz技术平台和RTC等产品相关的信息；
- 社区用户可以下载RTC早期的Beta版本，也可以试用基于Jazz的试验性技术（incubator technologies）
 - (Incubator指的是一些还处于试验性阶段但非有用的技术)
- 帮助社区用户及时掌握Jazz和RTC的最新消息，以及新版本的开发计划和进度；
- 使用社区用户能够通过论坛（forums）和缺陷跟踪系统（bug tracking system）与IBM相关研发团队直接交互；

- 首先，我们来看看Jazz研发团队的构成：
 - Jazz项目领导层同样也是原来Eclipse项目的领导层；
 - Eclipse项目不仅产生高质量软件，同时也形成了全球非常广泛的用户和插件开发人员的社区，我们希望在Jazz项目取得同样的成功；
 - 与Eclipse不同的是，Jazz将是商业软件，但会保持开源项目的透明性；我们把这种透明性称为“开放式商业软件开发（open commercial development）”模式
 - Jazz关注开发团队和社区，因此Jazz项目团队一直使用Jazz/RTC进行Jazz/RTC本身的开发工作，为开发团队和社区树立样板；

- 为了实现两个目标：

1. 在Jazz项目团队与社区之间创建一条**直接的沟通渠道**，提升Jazz/RTC开发过程的**透明性**，使新的软件版本能够**更早地、更频繁地**给社区用户使用；
2. 使用社区和潜在客户能够实际地看到**我们是如何在一个跨地域的分布式开发团队中使用Jazz技术来成功地交付软件**（Jazz和Rational Team Concert等产品）；

- **从项目干系人的角度来看：**

- 容易去提交一个功能增强请求，或者是一个缺陷报告；
- 容易去订阅一个工作项，然后跟踪它的状态和进度；
- 容易通过工作项查询或迭代计划去跟踪一组工作的状态和进度；
- 有一个直接的、高速的通道去跟具有开发和做决策的人进行交互；

- **从开发人员的角度来看：**

- 有好的压力：承诺、问题和成功对所有人都可见的；
- 直接的交互：最终用户的输入能够直接体会，不会被过滤或隐藏；
- 一些公共疑问或问题在解决上会得到社区的强力支持；
- 多种多样的输入：帮助我们避免“闭门造车”；

People, not organizations, build great software.

What is Jazz?

Developing software in a team is much like playing an instrument in a band. Both require a balance of collaboration and virtuosity. Jazz defines a vision for the way products can integrate to support this kind of collaborative work, and a technology platform to deliver on this vision.

Jazz is a scalable, extensible team collaboration platform for integrating work across the phases of the development lifecycle. We believe Jazz will help teams build software more effectively while making the software development activity more productive and enjoyable.

Jazz is built on Eclipse and other open technologies, and will serve as the foundation for Rational's Software Delivery Platform and partner ecosystem.

Jazz开发人员撰写的最新博客

The screenshot shows the 'Jazz COMMUNITY SITE' with a navigation menu including Home, Learn, Community, Development, and Downloads. The 'Learn' section is highlighted with a red box and a callout bubble stating: '提供了许多快速入门的学习材料' (Provides many quick-start learning materials). Below the navigation, a sidebar lists 'Articles', 'Tech Notes', 'User Workshop', 'Presentations', and 'Videos', each with a red box and a callout bubble. The 'Videos' callout says: '收集以往研讨会比较精彩的演讲内容和视频材料' (Collects the most精彩 presentations and video materials from past seminars). The 'Tech Notes' callout says: '对于较深入的主题，例如：部署，提供了简单易懂的指导' (For more in-depth topics, such as deployment, provides simple and easy-to-understand guidance). The 'User Workshop' callout says: '让你可以在一个真实环境中学习与体验Jazz/RTC技术和操作' (Allows you to learn and experience Jazz/RTC technology and operations in a real environment). The main content area features an article titled 'The IBM Rational Jazz Platform Technical Overview' with a sub-header 'Getting Started' and a paragraph: 'This page provides a general technical introduction to the Jazz Platform architecture and components.' Below this is another article titled 'The IBM Rational Jazz Strategy for Collaborative Application Lifecycle Management' with a sub-header 'Industry analyst Liz Barnett discusses the broad vision for the Jazz project, the Jazz technology and associated products from Rational and its partners, and the community that will participate in all of these initiatives.' Further down, there is a section titled 'What is Rational Team Concert?' with sub-sections for 'Rational Team Concert Capabilities', 'Rational Team Concert Online Help', and 'Rational Team Concert User Workshop'.

The screenshot shows the Jazz Community Site interface. The top navigation bar includes links for Home, Learn, **Community**, Bug Tracking, Development, and Downloads. The left sidebar contains sections for Team Blog, Forums, Events, What's New, In The News, Open Services for Lifecycle Collaboration, Business Partners, Academic and Open Source Use, Alerts, and Related Resources (Online Help, Team Wiki). The main content area features a 'Community' header, a 'Special Event' section with a 'Tuesday' entry, and an 'Upcoming events' box for the Rational Software Development Conference UK. Three callouts provide detailed explanations for the 'Community' menu items: 'Event' (past seminars), 'What's New' (latest updates), 'In the News' (media news), 'Academic and Open Source Use' (academic and open source related), and 'Online Help' (product help documentation).

The screenshot shows the Jazz Community Site interface. At the top, there's a navigation bar with 'Home', 'Learn', 'Community' (highlighted with a red box), 'Bug Tracking', 'Development', and 'Downloads'. Below this is a sidebar with various links like 'Team Blog' (highlighted with a red box), 'Forums', 'Events', 'What's New', 'In The News', 'Open Services for Lifecycle Collaboration', 'Business Partners', 'Academic and Open Source Use', 'Alerts', and 'Related Resources' (including 'Online Help' and 'Team Wiki'). The main content area is titled 'Jazz Team Blog' and features a post from July 9, 2008, by 'jeux @ 9:12 am'. A callout bubble points to the 'Team Blog' link in the sidebar, containing the text: 'Jazz开发团队专家写的一些小文章(博客), 深入探讨了如何使用某些功能, 或者是有些功能为什么要这样使用等问题'. The post text begins with 'Before we get to the current self-hosting numbers, let's start from the beginning. A long, long, long time ago when Jazz was only a glimmer in our eyes, we started coding and tracking work using Bugzilla, Cruise Control, and CVS. Our teams had existing experience with these tools, so we stucked with what we knew. As development progressed we got to a point where things started to build, run, and demo. However, on a project the size of Jazz, we can't wait for all the stars to align and self host on all components at the same time, so we used an iterative approach and started by moving off Cruise Control and onto the Jazz Build component first. Then as the other components proved themselves worthy we moved iteratively. In a development organization, self-hosting is a big step. In many ways it's the graduation to the big leagues - it's big time pressure, camera, lights, action! For me, this was the most stressful part of the entire project; as lead of the Source Control team, I knew that if we made mistakes and lost code or corrupted files, our entire development team could have lost weeks of valuable coding time. All things considered, it actually went pretty well, and here we are 2 years later having migrated our database countless times across model refactorings and big code changes without major data loss. We had some minor data loss, but nothing that stopped the development team as a whole.' The post continues with 'Our first self-hosting server was a modest server class machine running Tomcat and Derby. Since our team size at that point was a lot smaller than today, the Team Concert Express-C configuration worked great to get started. The development team maintained the machine and we were in the mode of having to often run in debug mode to diagnose problems.' On the right side, there are sections for 'Search Blog', 'Latest Posts' (listing 'Self-hosting by the numbers - June 2008', 'The smoothest end game ever... but why?', 'The First Jazz.net Dashboard Beauty Pageant', 'The Journey to GA via Downloads', 'Rational Team Concert 1.0 Ships'), 'Highest Rated' (listing 'Refining the Jazz user interface (5 / 5)', 'Keeping a weekly rhythm (5 / 5)', 'Welcome to the Jazz Team Blog! (4.86 / 5)', 'I'm okay, are you okay? Self-analysis through Team Reports (4.83 / 5)', 'Let it shine (4.83 / 5)', 'The Team Concert User Workshop: behind the scenes (4.8 / 5)', 'Motivations behind the design of Jazz Team Build (4.75 / 5)', 'Jazz tiny tip #2: Work items and screenshots (4.67 / 5)', 'A brief history of the Jazz Team Server interface: Our journey from a J2EE server towards a RESTful server (4.67 / 5)', 'The Christmas gift (4.64 / 5)'), and 'Authors'.

Jazz开发团队和社区成员共同讨论问题的地方

way of communicating with the Jazz development team, and developing and using Jazz based tools. Ask questions and share insights. Please stick to technical issues - *and remember, no communication - these are public forums!*

Think about the following before you post to a forum:

1. You can access the forums via either [the web interface](#) (recommended) or NNTP. If you want to use NNTP, see the right sidebar for some tips.
2. If you are reporting a bug - use the [bug tracking system](#).
3. Consider reading "Netiquette" from Wikipedia.
4. Please see our [Terms of Use](#).

Available Forums

jazz.user Using Jazz - Questions and discussions about installing, configuring, and using Jazz client technology and Jazz Team Server. (NNTP)

jazz.extend Extending Jazz - Questions and discussions about extending jazz with new capabilities or Jazz-enabling existing tools. (NNTP)

Please send forum-related issues to the [Jazz.net webmaster](#).

Web Forums or NNTP?

There are two ways to access the forums. We recommend that you use [the web interface](#), but if you wish you can also access the forums via an NNTP newsreader (or NNTP compatible email program such as Outlook Express). Either way, you'll see the same content.

TIP: If you wish to use NNTP, point your newsreader at [news.jazz.net](#) and be sure to set it up with the same user ID and password you use to log into Jazz.net.

IBM Rational Ensemble

Welcome to the IBM Rational Ensemble--a gathering of business partners around IBM's exciting Jazz technology! Our vision and purpose, is to create excitement and buzz around this new technology with the help of our Ensemble members at the Rehearsal Hall to learn more about the business of Jazz and join in the exchange of ideas and information at the Jam Session. This site is new but we're planning lots of exciting content in the near future. Please bookmark and visit often to stay up to date on all the latest news and gain some insight into the future of Jazz.

Ensemble

Listed below are the members of the Ensemble who share the Jazz vision and are offering their services. If you are interested in joining please send us an email.

➤ **Open Services for Lifecycle Collaboration**是由IBM发起旨在简化软件开发生命周期中的工具集成和协作。

➤ **IBM Rational Ensemble**是一个围绕Jazz技术进行相关产品开发的IBM合作伙伴计划。

to build a business ecosystem around the Jazz technology. If you are interested in becoming a Rational Business Partner at Jazz.net please contact us to do so. If you meet these criteria, we will be happy to have you on board.

Cognence Inc

Cognence helps integrate best practices, automation tools and training, increasing development productivity by 50% or more. As experts in RUP, Agile, CMMI, and Rational's integrated tools, our three-pronged approach optimizes your development efforts... and your people.

Jazz/RTC缺陷跟踪系统 (4)

查看功能增强请求的
详细描述和状态信息

The screenshot displays the Rational Team Concert (RTC) user interface. At the top, the navigation bar includes 'Home', 'Project Areas', 'Dashboards', 'Work Items' (highlighted in red), 'Iteration Plans', and 'Reports'. The user 'Joe Zhu' is logged out, and the current project is 'Jazz Project'. The main content area shows an enhancement request titled 'Enhancement 50197' with a summary: 'Add shortcut to import process templates via the "Process Templates" view'. The request is in a 'New' state and is 'Unresolved'. The 'Details' section provides various attributes: Type (Enhancement), Severity (Normal), Found In (0.6 M6), Creation Date (2008-4-7 下午06:05:33), Created By (Michael Schneider), Project Area (Jazz Project), Team Area (Process), and Filed Against (Process). The 'Description' section contains the text: 'I was searching quite a bit for this functionality in the view, especially because it is the place to deploy the predefined process templates'. Below the description is a 'Discussion' section with one comment from Ryan Manwiller dated 2008-8-12 上午08:09:02, stating: 'I think the view should have import and export actions either on the template nodes or as buttons in the view toolbar.' On the right side, a 'Quick Information' panel shows 'Subscribers (1)'. A callout bubble points to the 'Subscribers' section with the text: '订阅功能。当缺陷信息有变化时，立即发送邮件通知。'

Defect 59955 Save

Summary: * Cloudburst process creates users who are not in external user registry -- they are not in the external user registry. Status: New Unresolved

Overview Links Approvals History

Loaded: 2008-8-17 下午 02:18:23

Details

Type:	Defect	Owned By:	Unassigned
Severity:	Major	Priority:	Unassigned
Found In:	Unassigned	Planned For:	Unassigned
Creation Date:	2008-8-17 上午 07:45:11		
Created By:	Martha Andrews		
Project Area:	Jazz Project		
Team Area:	Process		
Filed Against:	Process	Estimate:	Correction:
Tags:			

Quick Information
No Links.

Description Edit

Problem:

The Cloudburst Sample Process creates users who are items in the repository but are not in the external user registry. Trying to log in as one of these users fails with an invalid user id/password message.

To recreate:

Log in as a user in the JazzAdmins repository group.
Create a new project area. Specify the Cloudburst Sample Process as the template.
When the project area is created, check the Team Organization view. User Kim Cloudburst has been created.
log out and try to log in as kim_cloudburst.

The screenshot shows the IBM Jazz Community Site. The top navigation bar includes links for Home, Learn, Community, Bug Tracking, **Development** (highlighted with a red box), and Downloads. A search bar is located in the top right corner with the text "Type to search" and a magnifying glass icon. The user "Joe Zhu" is logged in, with links for "Edit Profile" and "Log Out".

The main content area is titled "Development" and contains the following text: "The Jazz team uses Jazz to develop Jazz Work Items, Iteration Plans, and Reports server through its web interface. Open a report about how the Jazz project operates." Below this is a link for "Rational Team Concert 1.0 / Jazz Plans" with the text "This document lays out the schedule and the Jazz project."

On the left side, there is a sidebar with the following sections: "Mailing Lists", "Dashboards", "Work Items", "Iteration Plans", "Reports", and "Related Resources" (Forums, Online Help, Team Blog, Team Wiki).

On the right side, there are two boxes: "Repository Version" (1.0:I20080618-1642) and "Accessibility Notice" (This is beta code under development and may contain areas with limited accessibility functions. If you need help with access to this content please contact webmaster@jazz.net).

Two callout boxes provide additional information:

- A speech bubble pointing to the "Development" link in the navigation bar contains the text: "通过把Jazz/RTC开发团队的状态数据透明化给社区用户，意味着Jazz/RTC开发过程直接受到用户的监督" (By making the status data of the Jazz/RTC development team transparent to community users, it means that the Jazz/RTC development process is directly supervised by users).
- A rectangular box contains the text: "访问Jazz/RTC开发团队的RTC服务器：
➢ 仪表板 (Dashboards)
➢ 工作项 (Work Items) -> 缺陷跟踪系统
➢ 迭代计划 (Iteration Plans)
➢ 报表 (Reports)"

The footer of the page includes the IBM logo, links for "Contact | Privacy Policy | Terms of Use", and the Rational software logo.

We use developer mailing lists to coordinate the ongoing development of Jazz itself. These lists are the way design and implementation issues are discussed and decisions voted on by the Jazz development team. Mailing lists are generally the right place to ask questions about using or extending Jazz - those questions are best asked in the [forums](#).

Before you post to a developer mailing list:

1. Did you already ask the question in a [forum](#)? If in doubt, try the forum first! The [bug tracking system](#) is the "smart way" by Eric Raymond and Rick Moen.

So if you still think the mailing list is the way to go, then subscribe for a few days to get a feel for what kinds of topics are appropriate, and if someone still asks you to take your question to the [forum](#) instead!

Development mailing lists should be forwarded to the [webmaster](#).

Developer Mailing Lists

<input checked="" type="checkbox"/> jazz-dev	(archive) All contributors to the Jazz Project
<input checked="" type="checkbox"/> open-services	(archive) Parties interested in Open Services for Lifecycle Collaboration
<input checked="" type="checkbox"/> build-dev	(archive) Contributors to the Team Build component
<input checked="" type="checkbox"/> connector-clearcase-dev	(archive) Contributors to the ClearCase Connector component and underlying source control connector infrastructure
<input checked="" type="checkbox"/> connector-clearquest-dev	(archive) Contributors to the ClearQuest Connector component and underlying item connector infrastructure
<input checked="" type="checkbox"/> jrs-dev	(archive) Contributors to the Jazz REST Services component
<input checked="" type="checkbox"/> planning-dev	(archive) Contributors to the Agile Planning component
<input checked="" type="checkbox"/> process-dev	(archive) Contributors to the Team Process component
<input checked="" type="checkbox"/> reports-dev	(archive) Contributors to the Reports component

可以加入到开发团队使用的邮件列表中，第一时间掌握开发团队内部的决策和设计问题讨论，也可以直接发送建议给开发团队，参与到开发中来。

Welcome

Welcome to the Jazz Project dashboard. You can visit this space often to monitor all the vital signs of the Jazz Project at a glance, fed by the live data from the repository. Most place in the Jazz Development dashboard.

Jazz Project Description

Process enabled team

The goal of the Jazz project is to create a team collaboration platform for seamlessly integrating tasks across the software lifecycle. The new technology is called the Jazz Platform. The Jazz project is defining the overall architecture of the Jazz Platform, and building an initial set of Jazz components that plug in to the Jazz Platform.

The work in the Jazz project is divided into development work and maintenance work. Development work produces a consecutive line of releases. Maintenance work produces bug fix releases of the released produced by the development work.

Development as well as maintenance work is overseen by the PMC. The team members listed in this project area constitute the PMC.

The screenshot displays the 'Jazz Project Dashboard' interface. At the top, navigation tabs include 'Home', 'Project Areas', 'Dashboards', 'Work Items', 'Iteration Plans', and 'Reports'. A search bar is located below the navigation. The dashboard is divided into several sections:

- Left Sidebar:** Contains 'Create Dashboard', 'Recently Viewed' (Build, Agile Planning Explorations, Jazz Project), and 'Shared Dashboards' (My Profile, Jazz Project, All Dashboards).
- Top Section:** 'All Dashboards' dropdown, 'Home', and 'Trend Reports' tabs. A callout bubble points to 'Trend Reports' with the text '查看项目的工作项状态、报表' (View project work item status, reports).
- Recently modified (1) Tags:** A message stating 'No work items found using this query contain values for the grouping parameter: 'Tags'.'
- Open Work Items by Priority:** A stacked area chart showing work items by priority (Unassigned, Low, Medium, High) over iterations. The y-axis ranges from 0 to 2000.
- Open vs Closed Work Items:** A stacked area chart comparing 'Open' (yellow) and 'Closed' (purple) work items over iterations. The y-axis ranges from 0 to 24000.
- New Work Items by Severity:** A bar chart showing the number of new work items by severity (5 to 8) over iterations. The y-axis ranges from 150 to 500.
- Blocking Work Items:** A bar chart showing the number of blocking work items (5 to 8) over iterations. The y-axis ranges from 150 to 500.
- Bottom Section:** 'Closed Work Items by Priority' and 'Blocking Work Items' charts.

General Bug Tracking Event Logs End Game

The Jazz Source Control (SCM) component is a version control system built on the Jazz platform. It's built from the ground up to support a highly integrated collaborative development environment, integration with defect tracking, integration with builds, and process-centric automation. In addition to artifact traceability, it's focus is on supporting geographically distributed teams with advanced parallel development features.

Date	Version
2008/07/22	Rational Team Concert Beta1

Rational Team Concert for System z 1.0

Date	Version
2008/07/22	Rational Team Concert Beta1

Incubators

A Jazz Incubator is technology that is at a pre-Beta stage. It provides functionality that is available at an experimental stage, and may or may not be included in a future Beta product. A product Beta is the pre-release of a defined commercial product. The incubators will work with this version of Rational Team Concert.

To install an incubator, unzip it to the same directory where you have, or intend to have, this version of Rational Team Concert. For example: C:\Program Files\IBM\TeamConcert

Description	Platform
ZIP	
Rational Team Concert Help - Deployable Web application (.war)	All (23.64 MB)
Jazz Mylyn Integration	All (190.7 KB)
Jazz Code Coverage - Build System Toolkit	All (645.36 KB)
Jazz Code Coverage	All (1.05 MB)
Jazz Static Analysis - Build System Toolkit	All (319.13 KB)
Jazz Static Analysis	All (534.6 KB)
Jazz Performance Tuner	All (433.05 KB)
Jazz Ajax Framework	All (3.58 MB)
Jazz Plain Java Client Libraries	All (12.18 MB)
Client for Mac OS X	Mac OS X (146.27 MB)

Source Code

This section includes a mix of pre-Beta and 1.0 release source code. Unless otherwise marked, the code is pre-Beta.

Description	Platform
ZIP
