Complete Validation Process for DB2 9

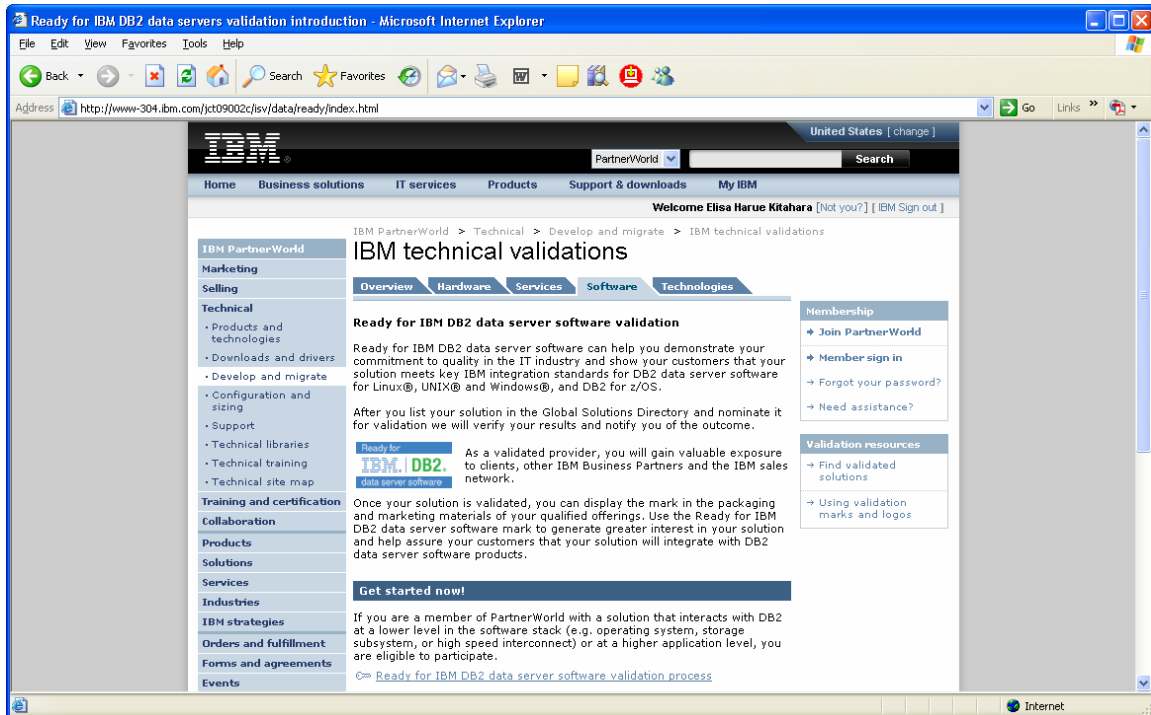

Including Time Requirements

Using Partner World to validate your IBM DB2 data server product

1) Visit the Ready for IBM DB2 data servers validation page hosted by Partner World

- <http://www-304.ibm.com/jct09002c/isv/data/ready/index.html>

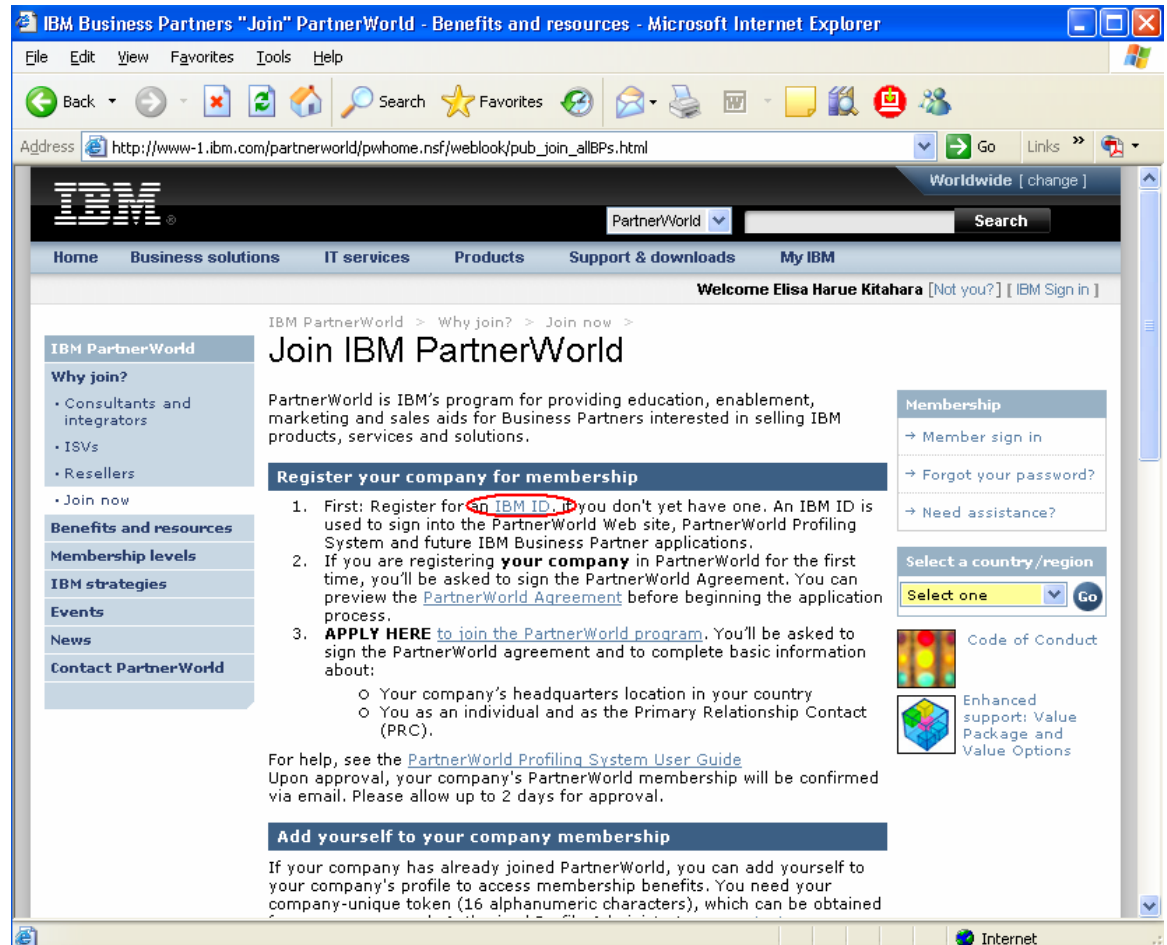

- 2) To view the validation process outline, you must first become a Partner World Member. Click the red outlined link below to start the process.

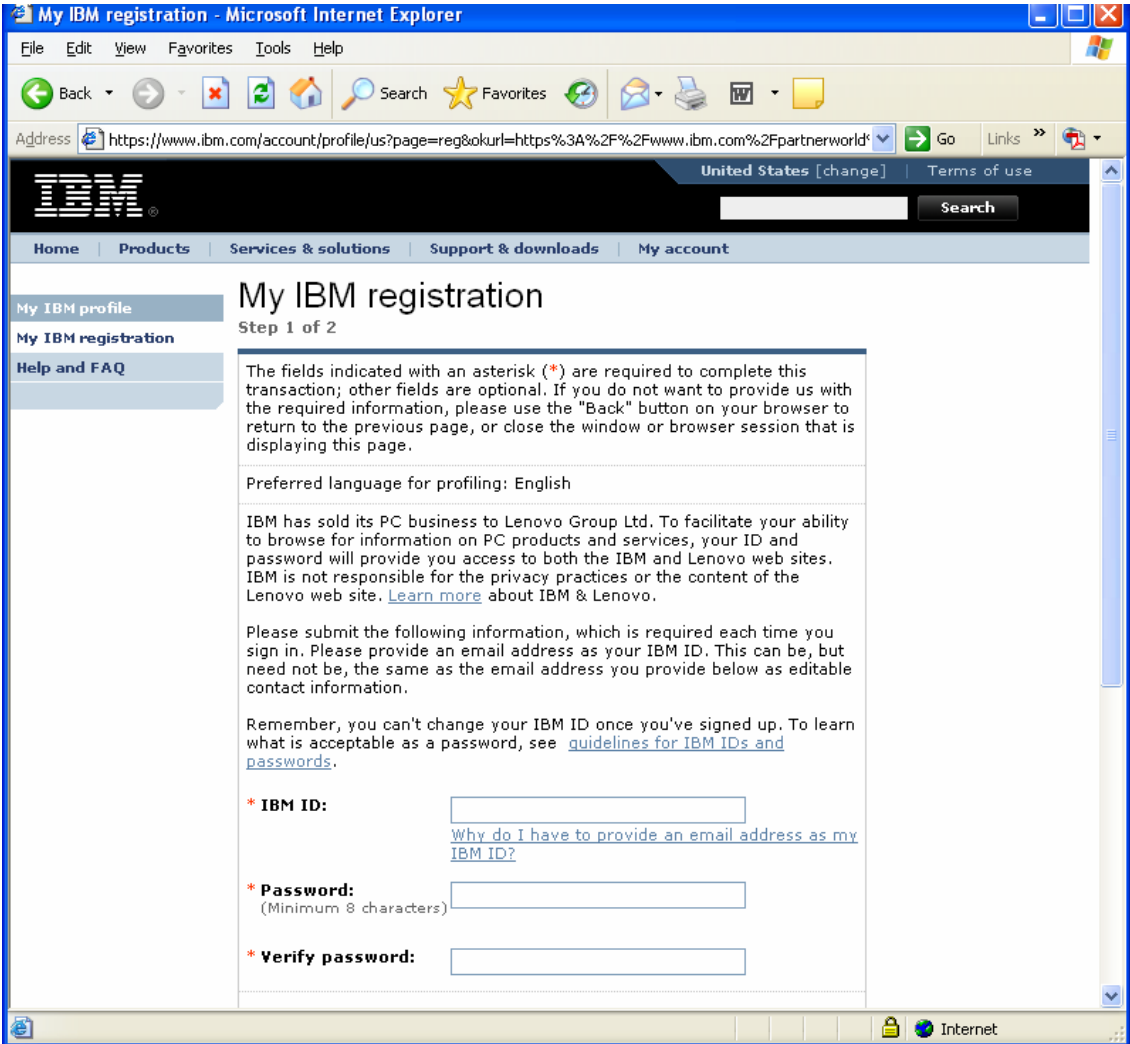

- 3) When you enter the Partner World website (from the link in step 3), figure out if your company has an **IBM ID**. If you need to create an IBM ID, move to step 3a. If you have an IBM ID already then move to step 4 and register your company for a membership as an ISV.

a. Create an IBM ID

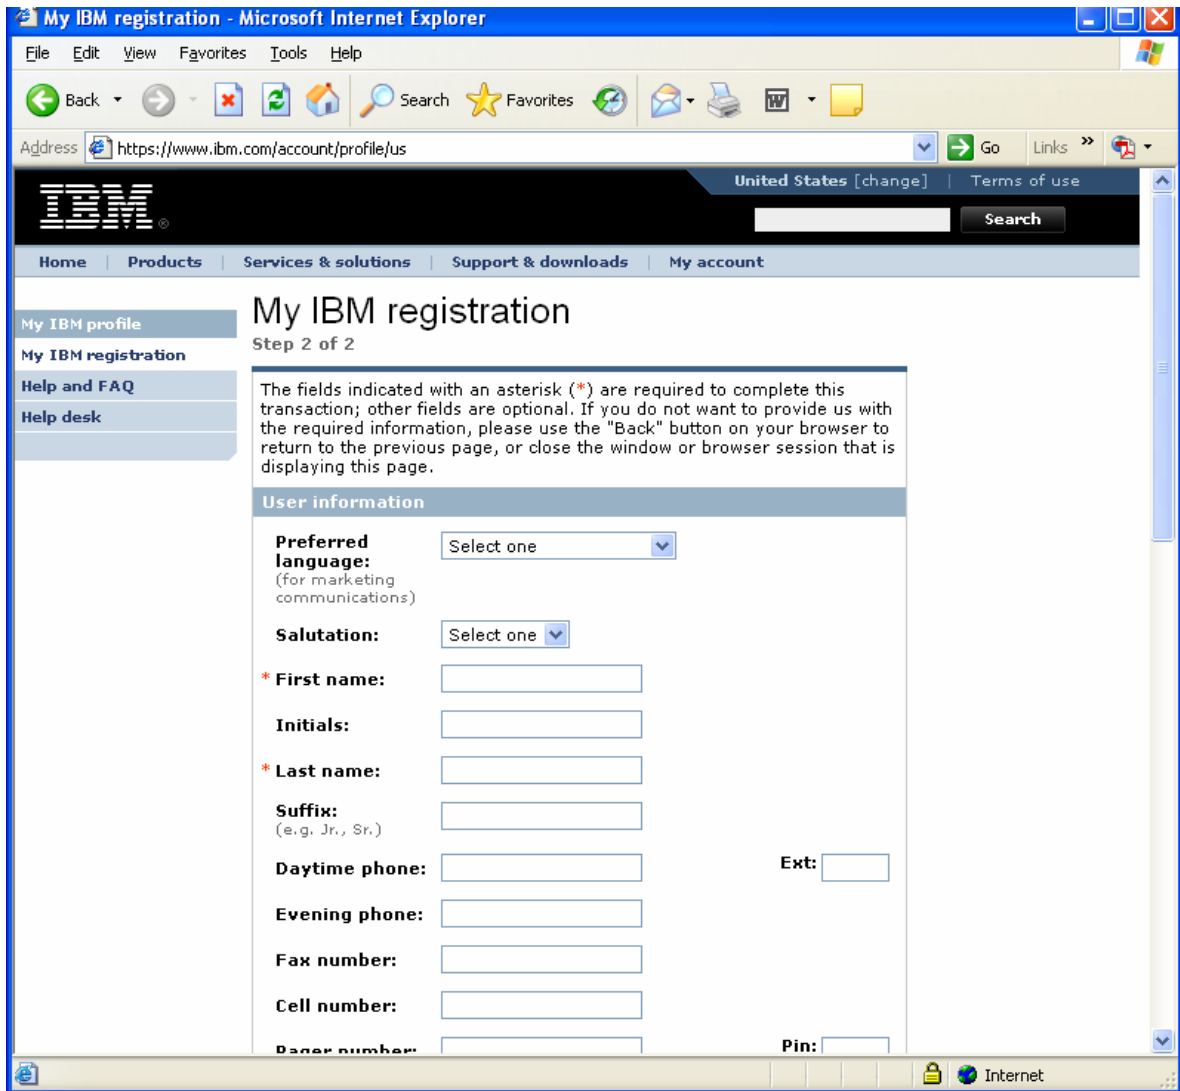

b) Enter Information – IBM ID, password, security question, country.

When you have finished entering this information, select  Continue

c) Enter Information – Personal Information. When you have finished entering this information, select  Submit

Step 2 of 2

The fields indicated with an asterisk (*) are required to complete this transaction; other fields are optional. If you do not want to provide us with the required information, please use the "Back" button on your browser to return to the previous page, or close the window or browser session that is displaying this page.

User information

Preferred language:

Salutation:

* First name:

Initials:

* Last name:

Suffix: (e.g. Jr., Sr.)

Daytime phone: Ext:

Evening phone:

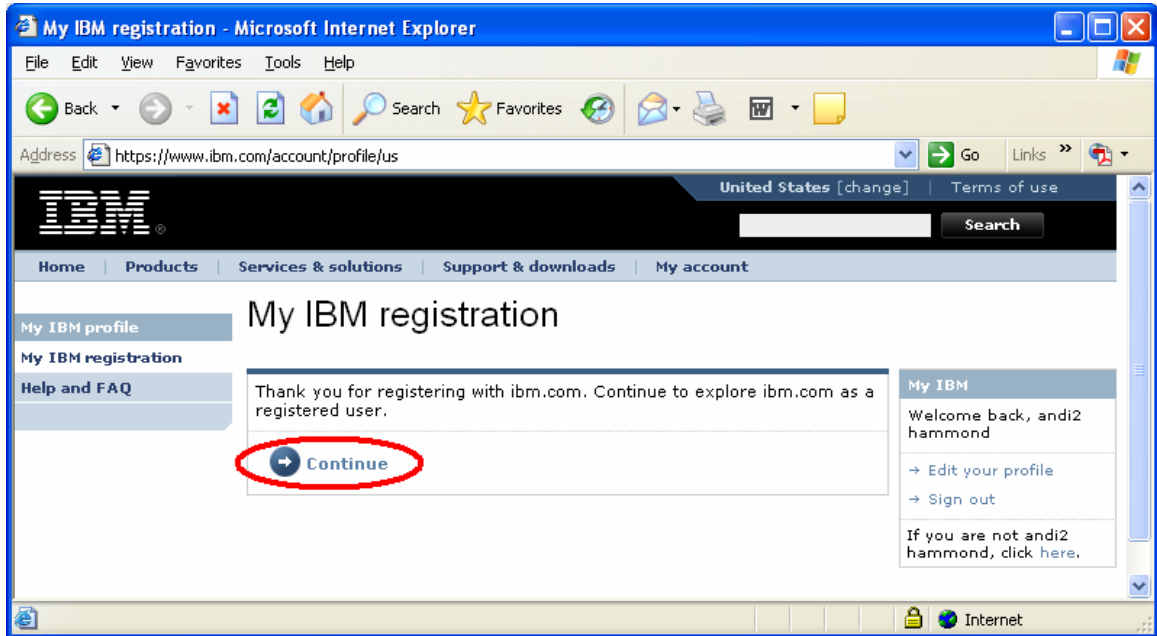

Fax number:

Cell number:

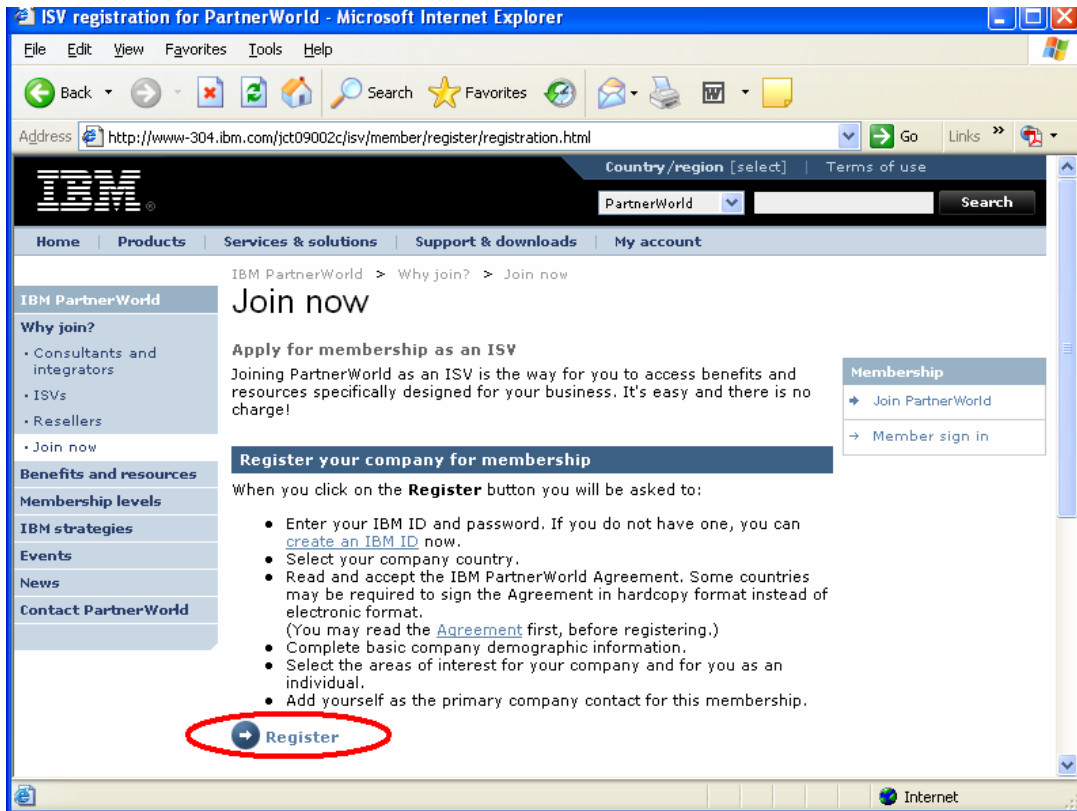

Pager number: Pin:

Internet

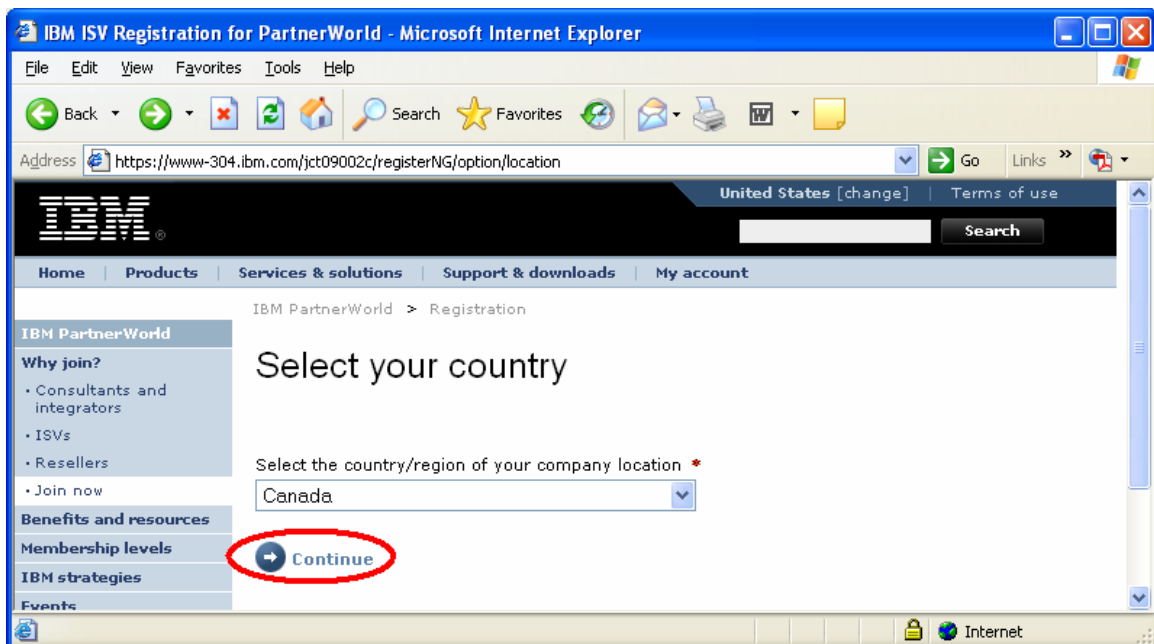

c) Navigation back to the main page. When you have finished submitting your IBM Registration, select 'Continue'. This will take you back to apply for a Partner World membership.

- 4) **Partner World Membership** - If you did not have to register your company for an IBM ID, then click the link below to apply for a membership as an ISV.

- a) **Select your Country**

b) Read the IBM PartnerWorld Agreement – International Basic General Terms. If you agree to the terms specified in the agreement. Click ‘I agree’.

c) Partner World Registration – Fill out all applicable information about the company, business and primary contact.

IBM PartnerWorld > Registration

PartnerWorld registration

PartnerWorld membership is available to ISVs who develop and sell software in the commercial marketplace. To register your company and get access to valuable information and services, complete the following steps.

- **Tell us about your company**
- **Tell us about your business**
- **Add yourself as the primary contact for this membership**

The fields indicated with an asterisk (*) are required to complete this transaction; other fields are optional. If you do not want to provide us with the required information, please use the **Back** button on your browser to return to the previous page.

The company name entered in this form may be used in the future electronic acceptance of certain contracts. Please make sure that you use the correct legal name in the Company full legal name box.

Tell us about your company

Company full legal name *

Street address *

City *

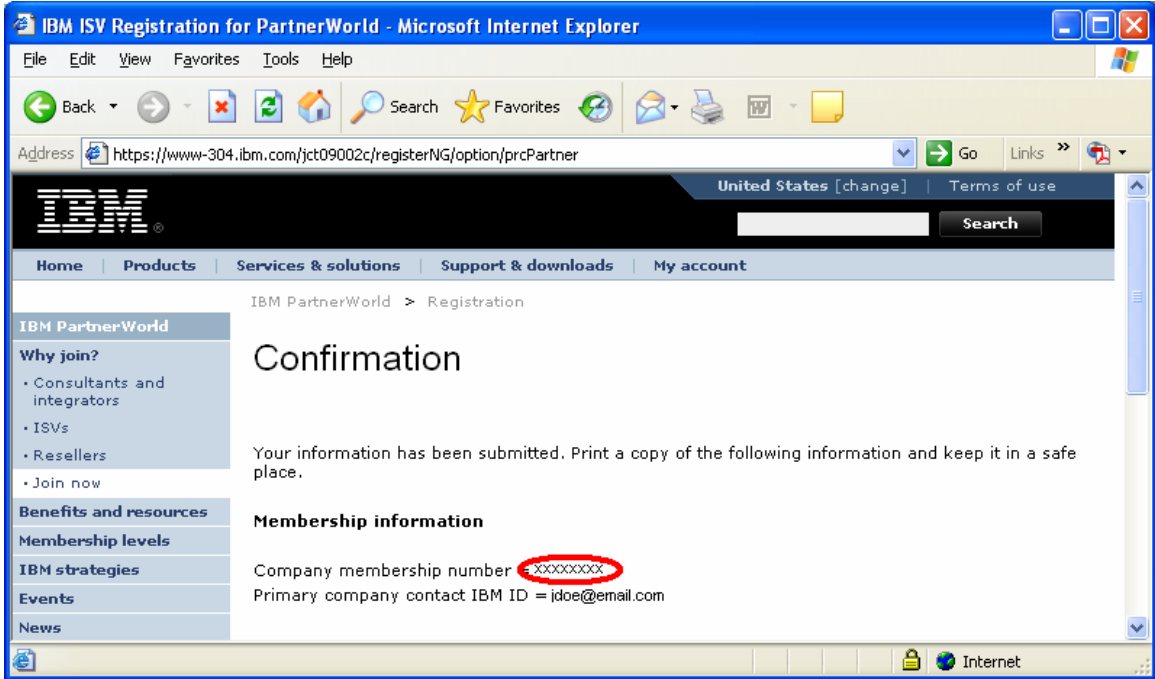

Country/region *

Canada

Internet

When your registration is complete, you will see your confirmation screen as below. The confirmation screen that you see will display your companies' relevant details.

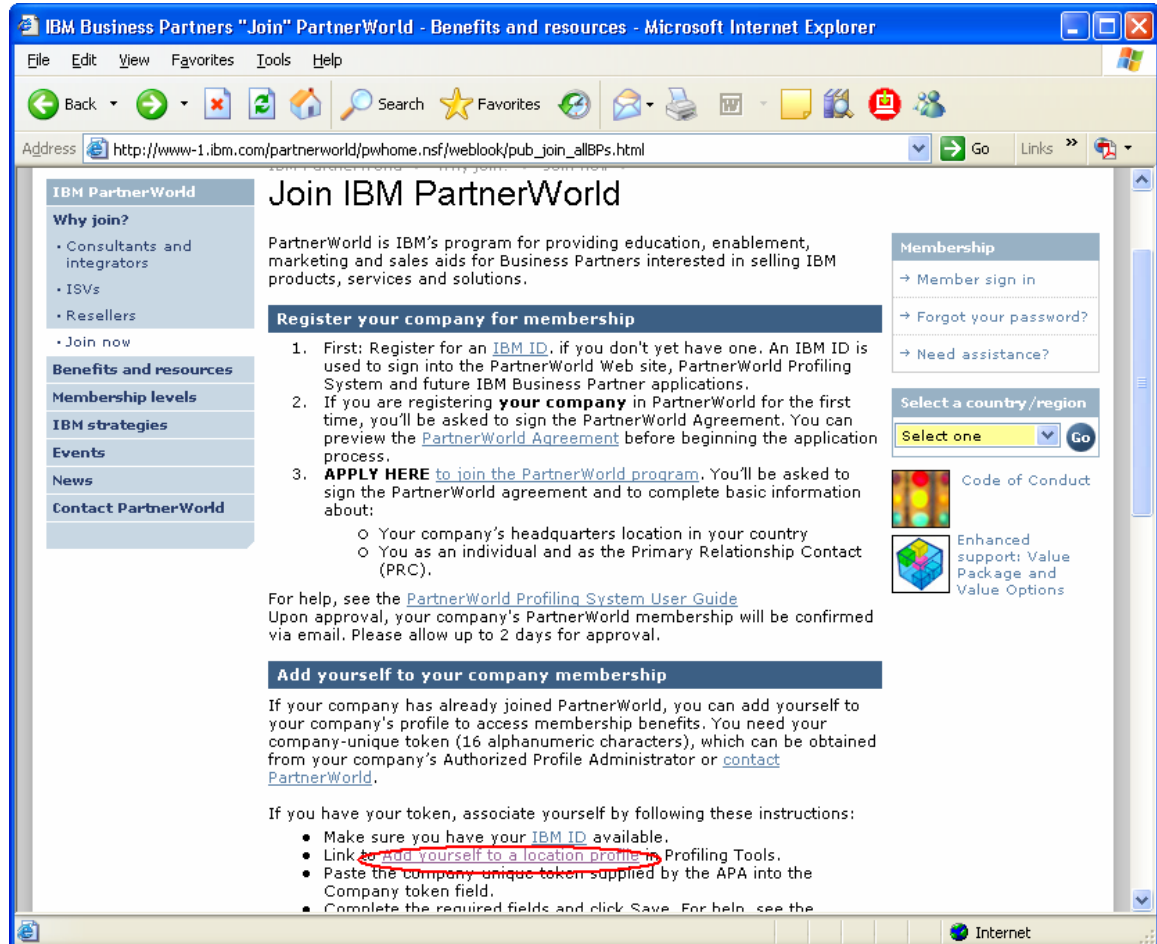

IMPORTANT: Take note of your Company membership number. You will need it to add yourself to the company membership later

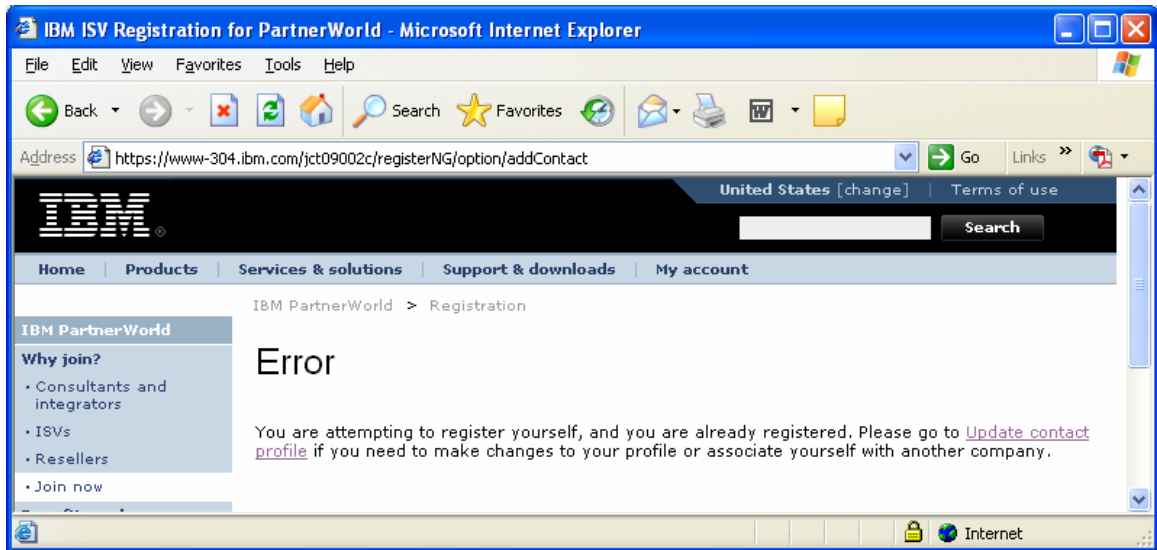

5) Add yourself to the Company Membership – Go back to the IBM PartnerWorld registration page:

<http://www-304.ibm.com/ict09002c/isv/member/register/registration.html>

Click on “Add yourself to a location profile”

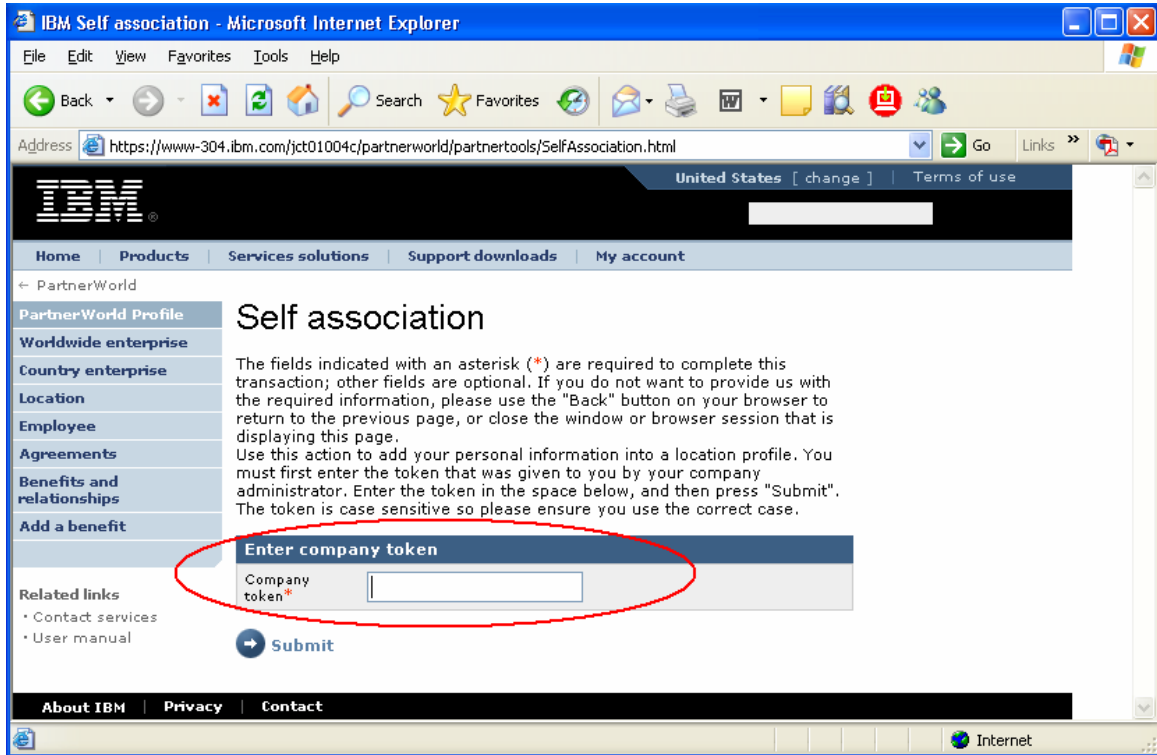

6) Make sure that you have your IBM ID and Company Membership #/token available to you.

8) Add yourself to the company that you have registered in PartnerWorld

When you are finished, select  Submit

9) **IMPORTANT:** Please allow 24-48 hours from the date of PartnerWorld registration until access is granted to the Global Solutions Directory (Next step). If you would like to check the status of your application, please visit the contact PartnerWorld page:

http://www-1.ibm.com/partnerworld/pwhome.nsf/weblook/cpw_index.html

Select your country and call the number provided. Press three when prompted, so that you can discuss your PartnerWorld membership. Remember to have your membership ID handy. If you are having difficulty, please ask to speak with a member of 'ISV Member Services'.

10) Sign into the Global Solutions Directory

<http://www-304.ibm.com/jct09002c/gsdod/logon.do>

11) List your solutions – Select your company and then select ‘Create and update your solutions’

Select a language
Select a language for the Global Solutions Directory
English

The Manage solutions area of the Global Solutions Directory allows you to not only create and update your solutions, but use your solution to qualify for additional marketing and technical benefits IBM offers. It also allows you to view requests from customers about your solution. See the list below for the opportunities available to you for expanding your relationship with IBM.

- [Create and update your solutions](#)
Create new solutions; view or update your company's existing solutions; and add or change company logo, sales support collateral and reseller information.
- [Apply for or renew your PartnerWorld Advanced level as an ISV](#)
Apply for or renew your PartnerWorld Advanced level status by submitting a customer experience that demonstrates your application is installed in a customer environment running on IBM hardware with IBM middleware. As an IBM Advanced Business Partner you are entitled to a rich set of benefits, including the right to use the IBM Business Partner emblem. Additionally, you may qualify to use the [ServerProven](#) or [IBM System Storage Proven](#) emblems.

12) Create a new solution

18) View the confirmation screen – Congratulations, you have now nominated your solution for the ‘Ready for IBM DB2 data server software’ validation program. The validation team will contact you shortly with the validation details. Thank you!

Technical Validation Overview

The first part of the validation process involves gathering information about your company, your solution and your testing process. We do this through the ISV Validation Questionnaire (Appendix B). “Section B: Component Test Plan Strategies” is the most important section of the document. This section gives our validation staff an overview of how your application is tested internally. It allows us to ensure that your application is properly validated against the IBM DB2 data servers.

The second part of the validation process involves the actual testing of the application and DB2 9 integration. As indicated in the “Client Instructions.txt” file, the tester must perform the following steps:

- Install DB2 9. To do this you need the latest version of DB2 9. To do this please visit our download page at :
https://www14.software.ibm.com/webapp/iwm/web/preLogin.do?lang=en_US&source=swg-dm-db2ese
- Do not move on to the next step until you have received DB2 9 and successfully installed it!
- Once DB2 9 is installed, delete the files - db2diag.log, db2eventlog.000 (see Appendix A as to where these files reside).
- Ensure that the DIAGLEVEL is set to 3 (the default)
 - The DB2 command is:
 - DB2 UPDATE DBM CFG USING DIAGLEVEL 3
- Run the entire test suite (as outlined in Section B: Component Test Plan Strategies of the questionnaire)
- When the test suite is complete, please compress (zip file, tar file, win rar etc) the log files

When both parts of the validation process have been completed, please send the questionnaire from part one and the log files from part two to db2validate@ca.ibm.com . If the files are too large and you are having problems sending them, please let us know and we will make extra accommodations.

Appendix A: Validation Instructions

Ready for

data server software

Validation Instructions

1) Delete the files - db2diag.log, db2eventlog.000

- Where to find the files for the windows system:

- If the DB2INSTPROF environment variable is not set, the information is placed in DB2PATH\instance_name. DB2PATH is the environment variable that indicates where DB2 is installed on a Windows system.

- If the DB2INSTPROF environment variable is set, the information is placed in DB2INSTPROF\instance_name, DB2INSTPROF is the environment variable that indicates the location of the instance directory. The DB2INSTPROF variable is normally not set; therefore instances on Windows are created under the directory specified in DB2PATH.

- Where to find the files for Linux/UNIX operating systems:

- The information is placed in \$HOME/sql/lib/db2dump, where \$HOME is the home directory of the instance owner

2) Ensure that the DIAGLEVEL is set to 3 (the default)

- The db2 command to execute is:

- DB2 UPDATE DBM CFG USING DIAGLEVEL 3

3) Run the entire test suite (as outlined in section B: Component Test Plan Strategies of the questionnaire)

4) When the test suite is complete, please compress (zip file, tar file, win rar etc) the log files and send them to: db2validate@ca.ibm.com

Appendix B: ISV Validation Questionnaire

Ready for

data server software

Ready for IBM DB2 data servers

ISV Application Validation Questionnaire

Ready for

data server software

Please complete the questionnaire below and return it by:

- E-mail: validate@ca.ibm.com
- Fax: 845-489-9554

Once completed, the document will be considered confidential.

If you have questions regarding this questionnaire, please contact partnerline@us.ibm.com

Section A: Questionnaire

1. Company Details

Company Name:

Company Address:

IBM Representative:

IBM PartnerWorld ID:
(8 digits, starts with 19.)

Company URL:

Application URL:

2. Contact for Inquiries Relating to this Questionnaire

Name:

Position:

E-mail:

Telephone:

Fax:

3. Supported Platforms

Target client operating system(s):

(Windows 2000 SP2, web browser, etc.)

Target server hardware platform(s):

(IBM Series, Compaq, HP, Sun, etc.)

Target server operating system(s):

(Windows NT SP2, AIX 4.3, RedHat Linux 9.0, etc.)

Typical configuration of your data server(s):

(# of boxes, # of CPUs, # of RAM, # of disks, etc.)

Additional Comments:

4. Application/Data Server Overview

Application Name:

Application Version:

Application GA Date:

DB2 Version used:

DB2 FixPak level used:

Primary function of the application:

Primary function of the data server:

The data server is installed: with the application (embedded install)
 before the application is installed
 after the application is installed

When is the database created:

When are the database objects created:

When does the application connect to the database:

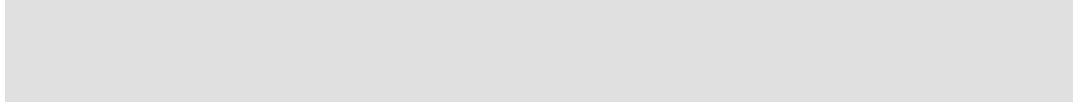

Does the application use other non-relational or proprietary data server technology: YES NO
If YES, describe in more detail:

Application's architecture:
(Host, Client-Server, N-Tier, etc.)

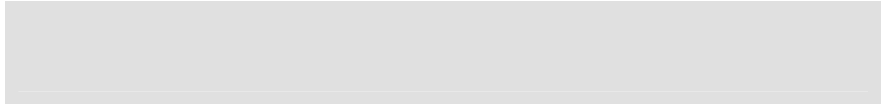

4. Application/Data Server Overview (continued)

Is the application web-based: YES NO

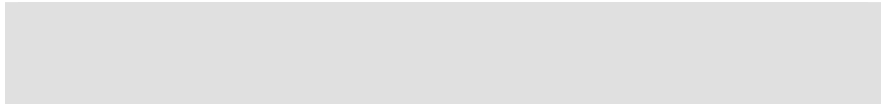

If YES, list the Web Technologies used:
(EJB, ASP, JSP, CORBA, Web Services, Other)

Describe where the application interacts with the data server:
(e.g. application source code files, batch)

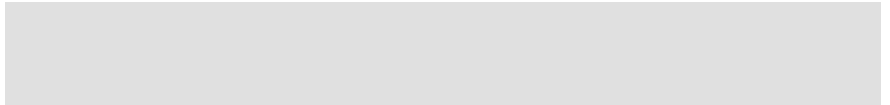

Data servers currently supported:
(include version numbers)

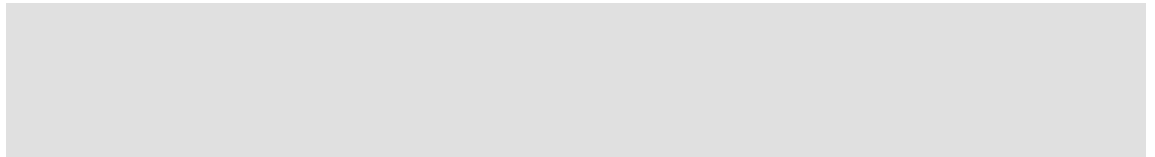

Will users be notified if the application encounters a data server related error: YES NO

If YES, how:

Additional Comments:

5. Data server Characteristics

Database name(s):

Approximate size of the database (in GB):

Average Size:

GB

Largest Known Size:

GB

Is more than one data servers used by the application:

YES NO

If YES, describe how:

How many tables are defined in the database:

Is data pre-loaded into the database:

YES NO

If YES, describe how:

Does the application import or export data:

YES NO

If YES, describe how:

Additional comments:

6. Database Objects

Are Stored Procedures used:

YES NO

Are User Defined Functions (UDFs) used:

YES NO

Are Triggers used:

YES NO

Additional comments:

7. Components / modules of the application - Functional Areas

Please describe the components and/or modules of the application.

Component Name <i>(billing, inventory, sales, etc.)</i>	Programming Language(s) <i>(C++, Java 1.3.1, Perl, etc.)</i>
1. <input type="text"/>	<input type="text"/>
2. <input type="text"/>	<input type="text"/>
3. <input type="text"/>	<input type="text"/>
4. <input type="text"/>	<input type="text"/>
5. <input type="text"/>	<input type="text"/>
6. <input type="text"/>	<input type="text"/>
7. <input type="text"/>	<input type="text"/>
8. <input type="text"/>	<input type="text"/>
9. <input type="text"/>	<input type="text"/>
10. <input type="text"/>	<input type="text"/>

Additional Comments:

8. Data Server Interface

Please describe the interfaces that are used to interact with the data server.

	Interface <i>(Embedded-SQL, JDBC, OCI, Perl, .NET, Stored Procedures, etc.)</i>	Type / Version
1.		
2.		
3.		
4.		
5.		
6.		
7.		
8.		
9.		
10.		

Additional Comments:

9. Additional Components and Tools

FRONT/BACK-END	MIDDLEWARE	TOOLS / COMPILERS / LIBRARIES

Section B: Component Test Plan Strategies

Please provide a description for each component or module of the application (components described in Question 7 of this questionnaire) that is interactive with the IBM DB2 data servers. This section describes the **basic** testing strategy for each component. The types of testing discussed in this overview are: smoke testing, functional testing, integration testing, performance testing and destructive testing. If a specific type of testing does not relate to the particular component, fill in the row value with "N/A". Please include as much detail as possible.

Please note: This is only a *suggested* format for your test plans based on QA testing principles. If your test plan is already written out in a different format, you can send that in replacement of this section.
