Suggested Quote

**Please provide us with a quote here about your company and the use of DB2*

Example:

JustSystems

"IBM and Justsystems have been working together closely to design an end-to-end native XML solution for SOA and the Web 2.0 era. IBM DB2 9 and IBM DB2 9 Express-C pureXML data servers with xfy Enterprise Solution, the native XML information solutions builder, enables enterprise customers to integrate information from arbitrary sources in a variety of combinations of vocabularies and transform the information into unified, manageable and reusable assets. xfy will change the way enterprise customers to use database and applications."

- Hideki Hiura, CTO, Justsystems, Inc.

Release Statement and Contact Information

I have reviewed all information (company details, quotations, images, etc.) listed in this document, and IBM has my permission to use this information, in whole or in part, without further permission and without fees, for marketing and/or public relations purposes, including on IBM web pages, publications, presentations, press releases, advertising, and other promotional materials. I hereby release IBM, its officers, directors, employees and agents from any claim or demand arising out of, or in connection with, the use or publication of the foregoing quotations/information/images. ("IBM" means International Business Machines Corporation, and all entities that it directly or indirectly owns or controls.)
