

Data warehouse solutions
To support your business objectives

Information Management software

IBM Balanced Warehouse D5100 offering for midsize to large businesses.

The high-availability and enterprise-level features you need at an affordable price

As your business grows and changes, one thing stays constant—you need information, and you need it now. Dynamically available information helps you make important decisions, understand customer needs, drive innovation, take action and gain competitive advantage.

But there are challenges to providing accurate, immediate information to employees, customers and suppliers. As volume and variety of data increases, it may end up in silos around your organization, where it is hard to maintain and manage. Your users need access to both structured and unstructured information, served up on demand in multiple formats. For expanding midsize businesses, needs change quickly. Data stores grow even more quickly. You need a data warehousing solution that is scalable, powerful and available, yet cost-effective.

The IBM Balanced Warehouse™ D5100 offering gives you enterprise-level capabilities priced for your expanding midsize or large business. The complete data warehousing solution combines IBM DB2® Warehouse information management software, IBM System x™ server technology, ample storage, optional high availability features and total solution support with one phone call.

A complete and reliable solution that's designed for growth

The IBM Balanced Warehouse D5100 adds enhanced features to the D-Class line of solutions, including increased resilience for support in mission-critical situations. With the power to grow, you can increase

■ Improves system uptime with optional high-availability features

■ Supports your system with proactive, automated service

■ Reduces system costs without sacrificing performance

■ Enables businesses to easily scale data warehousing systems

■ Puts structured and unstructured business data within quick reach of anyone who needs it

performance, reduce costs and grow your business from midsize to enterprise smoothly and simply.

- **Increase productivity by keeping data available.** Increase your system uptime and lower costs with optional automated failover and proactive troubleshooting and diagnostic tools, including IBM Light Path Diagnostics and IBM Predictive Failure Analysis software.
- **Get specialized support when you need it.** From software to servers, call just one number for specialized support for all Balanced Warehouse components. IBM support technicians also provide proactive alerts to keep you ahead of technical problems.
- **Reduce costs without sacrificing performance.** Get power at an affordable price with IBM System x server technology, designed to use less energy and save on power costs. IBM DS3400 storage gives you high density, high speed and high data transfer rates.
- **Grow smoothly and simply to the next level.** Start with plenty of space—room for one terabyte of raw data—and go up from there with a modular, building block approach. Simplify configuration both internally and externally.

- **Access data on demand in a variety of shapes and structures.** Store, manage and analyze both structured and unstructured data across your organization with IBM DB2 Warehouse information management software.

Why choose an IBM Balanced Warehouse solution?

IBM uses knowledge and thought leadership taken from years of enterprise hardware, data management software and business consulting experience to bring powerful, affordable solutions to midsize and large businesses. By combining essential components into a preintegrated and pretested Balanced Warehouse solution, IBM provides you with a way to quickly and cost-effectively implement a scalable data warehouse solution that can help you drive improved business performance.
