

E15 SIA/Cedborsa IMS/ESA Shared Message Queue Implementation

Luigi Cetorelli

This topic describes a customer's, SIA/Cedborsa, implementation of IMS/ESA Shared Message Queues. SIA/Cedborsa provides electronic services to all stock exchange investors. The presentation covers the different phases that were involved to bring IMS/ESA SMQ from the test to the production environment. Starting from customer needs, the session will go through sizing, challenges, requirements and experiences. Adjustments and others options considered during the project are also discussed. Come to this session to learn about a real SMQ customer experience.
