

# SESSION ABSTRACT

## **E40 DBRC, IMS Tools and Database Recovery**

*Rick Long*

Some of the new IMS tools have changed how database recoveries can be accomplished. This session will look at two of them, IMS Recovery Saver and IMS Index Builder. It provides a practical look at how to integrate these two products into the operational environment. It concentrates on what changes are required to build working procedures for everyday use. It will also look at how DBRC interfaces with these two products.
